DO NOT FAIL TO USE THIS ORDER BLANK.

Office and Yard, Euclid Ave., D to E Streat, Ontario, California

# Please Observe When Placing Your Order

Use the Order Sheet. The order sheet is for your convenience. Its use will save both your time and ours, and will greatly eliminate the possibilities of mistakes. If in doubt as to the method of shipment, it may be left to our judgment.

**Terms.** Cash. Send postoffice or express money order, registered letter, bank draft or check. No order will be sent C. O. D. unless accompanied by one-half the amount.

**Substitution.** Please state when ordering an assortment whether substitution will be allowed, as we are at liberty, when no instructions accompany the order, to use other varieties as nearly similar as possible. It often happens we can offer a better selection than named in the order, and will gladly do so when permitted. We never substitute on large orders for commercial planting without consulting the customer.

**Packing.** No charge is made for packing on retail orders to any point in the United States, Canada or Mexico. When extra packing is necessary for shipments to Foreign Countries, a charge is made only to cover cost of material.

**Inspection.** Every shipment we send out will carry a certificate of inspection. Immediately upon making the shipment, we mail to the Commissioner of the County of destination a manifest with the name of the party to whom shipped, giving a list of contents and where stock is grown. The local inspectors, being thus advised, examine the stock again on arrival at destination.

**Errors and Omissions.** With the best of us, mistakes sometimes occur. If our customers will notify us promptly, we will cheerfully rectify any mistakes that may occur.

**Guarantee.** The Armstrong Nurseries will exercise care to have all stock true to name, nevertheless it is understood and agreed that should any stock prove untrue to name, the Armstrong Nurseries shall be liable only for the sum paid for the stock which may prove untrue, and shall not be liable for any greater amount. The Armstrong Nurseries book all orders with the understanding that same shall be void should injury befall the stock from flood, drouth, frost or any other causes beyond their control. All freight and express charges are to be paid by the purchaser.

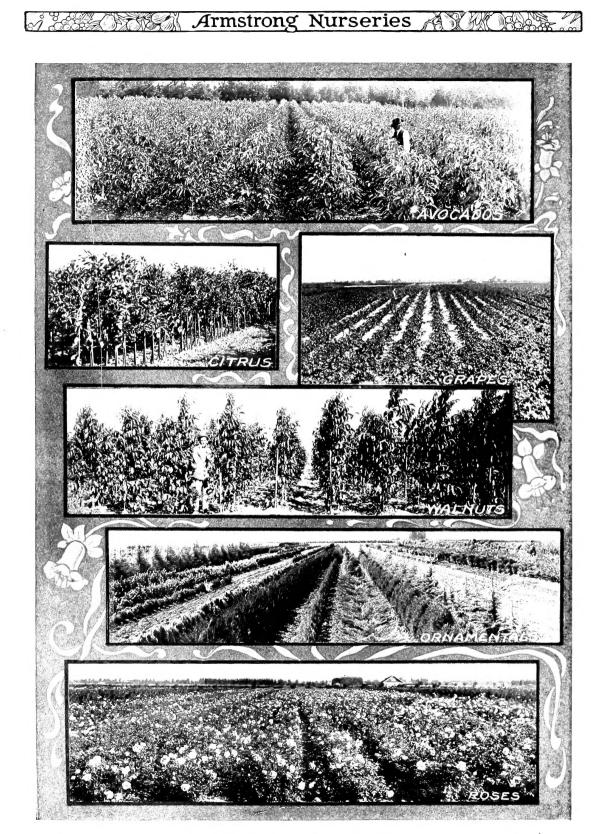

**Visitors.** Our nurseries are open to visitors. Inspection will prove our products are the best that experience, good cultivation and favorable conditions can produce. Not open on Sunday.

Sincerely

#### **Armstrong Nurseries**

SCENES IN THE ARMSTRONG NURSERIES 500 Acres Devoted to Growing Trees and Plants

# Select Avocado and Sub-Tropical Fruits

Avocados are divided into two classes: the thick-skinned varieties and the hardier, thin-skinned sorts, each having its own advantages and different climatic requirements, so that the fruit may be grown successfully over a large range of territory. The thick-skinned varieties are best adapted for commercial planting, owing to their large size and shipping qualities.

The thin-skinned sorts are smaller and are poor shippers, but because of their hardiness, it is possible to grow them successfully over a comparatively wide range of country, particularly where the climate is not too severe for the hardier varieties of citrus fruits, and because of their excellent flavor and quality and unusually prolific bearing, are highly esteemed for home use and nearby markets.

New varieties of avocados are constantly appearing, and from these we select the most promising to add to those of established merit. The old unprofitable varieties have been weeded out.

No definite conclusions in the field of avocado pollination have been reached, but doubtless mixed plantings of several varieties will produce more abundant and uniform crops. If customers are not sure which varieties will be most satisfactory in their location we will be glad to make the selections from the information which we have.

The ripening dates given for each variety are only approximate since the exact time of ripening varies with the location.

Our avocado trees are grown upon selected hardy Mexican seedlings and the buds are obtained from the best fruiting trees to be found. We have specialized in avocados since the industry started in California and there is no better avocado nursery stock in the state than ours.

We invite commercial planters to visit our nurseries and make personal inspection.

Instructions for planting and caring for Avocado trees will be found on page 63. A copy of these instructions will accompany every shipment of Avocado trees, also a yucca protector for covering the trunk of each tree.

# Thick-Skinned Avocados

These find congenial conditions where the Lemon thrives, and include most commercial varieties.

Balled, field grown, weight 75 to 100 lbs.

Prices are for all varieties except Lyon which are \$1.00 per tree higher.

T	en a	ass	orted Avocado trees at 10 rate	Each	Per 10
6	to	8	feet	\$5.00	\$45.00
5	to	6	feet	4.00	35.00
			feet		32.50
3	to	4	feet	3.25	30.00

**Dickinson.** Medium size fruit, averaging 9 to 16 ounces; oval shape. Has a very thick skin, and is therefore an excellent shipper, and the color is an attractive dark purple. A vigorous grower and very prolific bearer, but is not as hardy as some other Guatemalan varieties. June to October.

Benik. One of Wilson Popenoe's Guatemalan introductions recommended for `experimental planting. Pear shaped fruit, weighing about a pound; of exceptional quality; purplish maroon in color, with a small seed. Ripens May to August.

**Dickey A.** A pyriform fruit, 12 to 16 ounces in weight; purplish brown in color, with a very thick skin. Smooth, clear yellow flesh of fine quality. The seed is very small as compared with other varieties. February to May.

as compared with other varieties. February to May. **Fuerte.** Holds the commanding position among Avocados at the present time, both for home and commercial planting. The rich quality and high flavor of the fruit keeps it in the lead. The fruit is pyriform to oblong; medium size, with a smooth green skin which separates readily from the creamy, yellow, buttery flesh. Seed medium; tight in cavity. Fruit usually picked in winter fall and early spring, the fruit hanging on for a long time after ripening. Possibly the hardiest of its type. October to June.

FUERTE AVOCADO TREE In Full Bearing 28 Months from Our Nursery

#### SPINKS AVOCADO A Large Thick-Skinned Variety

**Dutton.** A new variety originating near Anaheim which is rapidly gaining favor. Pyriform in shape, averages one pound in weight; dark purple with a thick slightly pebbled skin; very rich flavor; an early and heavy bearer. The tree is a vigorous grower and ranks only slightly below Fuerte in hardiness. February to April.

Ishim. A promising new midwinter variety which is thought to be a cross between Guatemalan and Mexican strains. Fruits average 14 ounces; dark purple, roundish oval, with thin skin and medium seed. Of good quality but not thoroughly tested. January and February.

Linda. The largest avocado commonly grown in California, averaging 2 pounds; round, with a rough purple skin, and its immense size does not detract from its quality, which is very high. The tree has very beautiful bronze foliage, but is rather tender and should only be planted in the warmer sections. May to October.

Lyon. For early and prolific bearing the Lyon has no superior, as it usually bears the second or third year after planting. Fruit large, 16 to 18 ounces; conical in shape, with a rough green skin; very finely flavored. Tree is an upright, slender grower, requires little space and is suitable for interplanting. Difficult to grow in the nursery, hence bringing a higher price. April to July.

Mayapan. Although only recently introduced from Guatemala by Wilson Popenoe of the U. S. Dept. of Agriculture, this variety is showing up well as a commercial fruit, because it bears young and consistently. Nearly round, averaging I pound; brownish purple, with a thick skin, and of very fine quality. The fruit seems to hang on well in heavy winds and the tree is tall and slender. May to August.

Nabal. One of the most attractive of the new Guatemalan introductions with green, nearly round fruits, slightly less than a pound in weight. Characterized by an extremely beautiful tree. The name, from the native dialect means "abundance" and was given because of the heavy crops on the parent tree. June to September.

**Puebla.** As with the Fuerte, the tree has proven exceptionally hardy and vigorous. Flesh has a rich nutty flavor; color cream, buttery in texture. Skin thin and might be classed among the thin-skinned varieties since it belongs to the Mexican race. Form roundish oval; of February.

**Panchoy.** A very promising introduction from Guatemala with pear shaped fruits about one pound in weight, with a rough thick dark green skin. Beautiful clear flesh with a very small seed. Ripens in the summer but the fruit will hang on until Christmas. A spreading, fast growing tree. June to August. Queen. Very large, pear-shaped fruit, somewhat corrugated, weighing  $1\frac{1}{2}$  to 2 pounds; purplish maroon in color, and of excellent quality. Makes a beautiful spreading tree but is rather tender. March to October.

Spinks. Fruit nearly round; 16 to 20 ounces; purplish black; rough, thick skin. The cream colored flesh is of wonderful quality and the seed is small. Although not a good long distance shipper, the heavy crops, borne while the trees are young, and the fine quality, makes the Spinks a good home fruit. February to November.

Ward. Tree vigorous with handsome foliage. Fruit weighs from 12 to 20 ounces. Flesh rich yellow to medium green; quality good with high oil percentage; skin turns to dark purple; smooth, medium thickness. Blooms in April. December to February.

# **Thin-Skinned Avocados**

The thin-skinned varieties are the hardiest and therefore, may be planted in a large range of territory in California, but where high winds prevail care should be taken to plant the trees in protected places.

The young trees should be protected when the thermometer goes as low as 28 degrees above zero. Older trees—five years or more—have passed through weather 20 degrees above zero without serious injury.

The fruits of these varieties weigh from 4 to 10 ounces, and as the skin is thin there is practically no waste in paring. The flavor compares very favorably with the larger thick-skinned varieties.

Balled, field grown, weight 75 to 100 lbs.

T	en a	ass	orted Avocado trees at 10 rate	Each	Per 10
6	to	8	feet	\$5.00	\$45.00
5	to	6	feet	4.00	35.00
4	to	5	feet	3.50	32.50
3	to	4	feet	3.25	30.00

**Blake.** Quite hardy, passing through the freeze of 1922 successfully in all sections. Shape pyriform, bottlenecked, 4 to  $4\frac{1}{2}$  inches long; skin very thin; color light green; flesh creamy yellow, smooth and buttery; highly flavored. Tree of vigorous upright growth. Season September and October.

FUERTE AVOCADO The Standard Variety for Commercial and Home Use

#### Armstrong Nurseries FACTOR OF

Blackbird. An exceptionally good hardy Avocado for home planting. Shape elongated oval; dark purple skin; medium size; flesh not very rich but mild and buttery. Bears well and is the earliest thin skin on our list. The purplish black skin has a beautiful gloss. August to October.

Caliente. A hardy thin skin fruit of excellent quality. which has the distinctive reputation of bearing heavy and regular crops in all sections in which it has been planted. The purple fruits are larger than most thin-skinned vari-eties and are borne almost immediately after planting. Fine quality. September and October.

Ganter. Medium size, form oval to oblong; skin thin of greenish color; flavor and quality excellent; tree vig-orous, uniform and one of the most dependable bearers, fruiting early; desirable for home use in interior sections. October to December.

Gottfried. A Mexican variety originating in Florida and worthy of trial in California. Oval fruit, about a pound in weight, with greenish-purple skin and rich buttery flesh. August to October

Mexicola. A new thin-skinned Mexican variety nating in Pasadena. The parent tree has never failed to bear heavily and regularly each year and is quite hardy. Usually bears fruit the second year after planting. Fruit averages 4 to 6 ounces; purple in color; of excellent quality. September and October.

Northrup. Form pear-shape, of medium size, weighing 6 to 10 ounces; of fine texture; excellent quality and flavor; skin thin and of purplish color; seed cavity tight; keeps well. This variety bears two crops a year, the main crop from October to December, and a lighter crop from April to June. Tree hardy and vigorous.

**Robertson.** One of the best thin-skinned varieties. Fruit round, medium size; tree a very fast grower and has proven a good bearer. Recommended for home gar-dens. September and October.

## Two Varieties on One Tree

The subject of the pollination of Avocados has engaged the attention of Avocado growers for some years. Our method of growing two varieties on one tree is designed to help solve this problem, and they are especially recommended for planting in gardens where space is limited.

mended for planting in gardens where space is limited. These trees are grown by placing a bud into a seedling in the fall of the year when the seedling is one year old. The bud then grows to a tree five feet in height in the summer following, when a second bud of another variety is inserted which starts to grow at once, making a two variety tree with good strong body and branches by December 1st, when it is dug.

We can supply the following combinations only: Black-bird, Ganter, or Puebla budded on Caliente; Dutton on Puebla; Puebla on Fuerte; Lyon on Puebla.

Thrifty trees, ball pounds. Each, \$7.50. balled, 5 to 6 feet, weight about 80

CALIENTE AVOCADOS More Than 100 Fruits on This 2-Year Tree

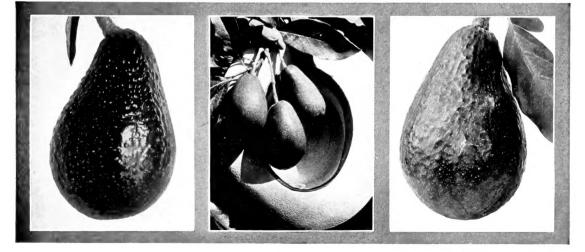

#### Extra Large Combination Avocado Trees

These trees are especially grown to meet a demand for large Avocado trees which with proper care should bear in one or two years. Because of their size it is not safe to move these trees with balls of earth around the roots hence they are put in boxes about 2 feet square when taken from the grow-ing fields and then thoroughly established, after which they may be removed safely and planted where the trees are desired permanently. Please note these are two-variety trees. One of the varieties named below being budded into a Fuerte tree thus giving fruit through a long season. Size about 1<sup>1</sup>/<sub>4</sub> inch caliner near bud. 7 to 8 feet bich

Size about  $1\frac{1}{2}$  inch caliper near bud, 7 to 8 feet high, heavily branched.

Varieties: Dutton, Mayapan, Lyon and Puebla budded into the Fuerte.

Price, \$12.50 to \$15.00 each.

#### Armstrong Nurseries 4 FALLE

CHOICEANA FEIJOA **Pineapple-Banana Flavored Fruit** 

#### Feiioas

#### (Pineapple Guava)

(Pineapple Guava) This attractive tree or large shrub attains a height of about 15 feet, but can be made into a smaller compact shrub by pruning and can be used for a large hedge or border. The upper side of the leaves is glossy green and the lower side silver-gray, while the showy flowers are whitish purple with conspicuous red stamens. The oval or round fruit is delicious to eat and has a penetrat-ing and delightful aroma which lasts for days and is sug-gestive of pineapple, strawberries and bananas. It is a valuable plant for most of California, since it makes a beautiful ornamental shrub, and its perfumed

fruits are excellent for eating fresh, for jelly and jam. It is not injured by temperatures as low as 16 degrees above zero.

It also stands considerable heat and may be planted in any of the interior valleys of California, making a beauti-ful ornamental shrub, producing at the same time its use-ful, perfumed fruits. It is advisable to plant two vari-eties in order to provide cross-pollination and insure a crop.

**Choiceana.** We have coined this word, pronounced Choic-e-ana, for this variety, because the fruit is indeed choice and has a pleasant banana flavor. The fruit is the size of a large hen's egg, 3 inches by  $2\frac{1}{4}$  inches. Ripens in November. Specimen plants, extra size, \$3.50; bushy plants, balled, \$2.50 each, \$20.00 per 10; quart containers, 75c each, \$6.50 per 10.

**Coolidge.** Not as large as the Choiceana but of the same shape. Skin smooth; flavor very good; an excelent bearer. Ripens in November. Balled bushy plants, \$2.00; potted, quart containers, \$1.00 each, \$9.00 per 10.

Superba. So named because it is a superb Feijoa. Sim-ilar to Choiceana but almost round. Ripens in November. Fine bushy plants, balled, \$2,50 each, \$20.00 per 10; quart containers, 75c each, \$6.50 per 10.

Seedlings. Suitable for ornamental plantings and often bear crops of good fruit, but there is no certainty as to its size or quality; makes a striking hedge or low back ground. Potted, 1 to  $1\frac{1}{2}$  ft., 60c each, \$5.00 per 10.

#### Guavas

#### (Psidium Cattleianum)

The Guava is much sought for jelly making and pre-serving, and is greatly relished eaten out of the hand when fully ripe. The Strawberry Guava may be used as an ornament.l shrub to advantage, either as a single specimen plant, in groups, or as a hedge or large border. Ripens in October and November. See planting instructions page 63.

See planting instructions page 63. Strawberry Guava. (Psidium Cattleianum.) A fine glossy-leaved shrub or small tree, which produces in abundance a luscious fruit about the size of a large strawberry; round and deep reddish-brown color. The fruit is highly prized for table use when fresh, and for jams and jellies has few equals. Field grown. Extra large fruiting size,  $2\frac{1}{2}$  to 3 ft., balled, \$1.75; balled, 2 to  $2\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; potted, gallon con-tainers,  $1\frac{1}{2}$  to 2 ft., 75c; quart containers, 1 to  $1\frac{1}{2}$  ft., 50c each, \$4.00 per 10.

Yellow Strawberry Guava. Similar in habit of growth to the above. Fruit is yellow, being large and of milder flavor than the common red variety. Field grown, balled,  $1\frac{1}{2}$  to 2 ft., \$1.00 each, \$9.00 per 10; potted, gallon containers, 2 to 3 ft., 75c; quart containers,  $1\frac{1}{2}$  to 2 ft., 50c each, \$4.00 per 10.

Lemon Guava. (Psidium Guajava.) One of the finest of the Guava family; large, pear shaped, yellowish fruit; the bush is somewhat tender and should be grown only in the most favored localities. Potted, gallon containers,  $1\frac{1}{2}$  to 2 ft., \$1.00; 4 in pots,  $1\frac{1}{2}$  to 2 ft., 75c.

NATAL PLUM

STRAWBERRY GUAVA Three Sub-tropical Fruits for Preserving and Making Jellies

YELLOW STRAWBERRY GUAVA

## Loquats

#### (Eriobotrya japonica)

The Loquat is widely grown in California not alone for its fruit, but also as an ornamental tree. Since it is the earliest of the spring fruits, it is much relished. It is used for making jellies, sauces, and also for dessert pur-poses; fruit ripens from February to June. The tree does best in our coastal regions.

See planting instructions page 63.

Ten assorted Loguats sold at the 10 rate	Each	Per 10
Balled, 4 to 5 feet	\$3.00	\$27.50
Balled, 3 to 4 feet	2.50	22.50

Write for special prices on quantities.		

Advance. One of the best Loquats for general use; large pear-shaped fruits; borne in compact clusters; skin deep yellow in color; flesh white, juicy and of pleasant flavor. Bears well and consistently. Ripens March to June.

**Champagne.** The individual fruit is larger than the Advance, and of the very finest quality, but it does not bear quite so heavily. Clusters of fruit large and loose; skin deep yellow with grayish bloom; flesh white, melting and very juicy. Ripens April to June.

Early Red. The earliest variety. Medium sized fruit in compact clusters, the surface being yellowish orange, sometimes tinged with red. The flesh is pale orange, very sweet and juicy. Ripens February to April.

**Premier.** One of the finest Loquats for home use, bear-ing large orange-yellow fruits of excellent flavor. Flesh white, sweet and juicy. A very heavy bearer. Ripens April and May.

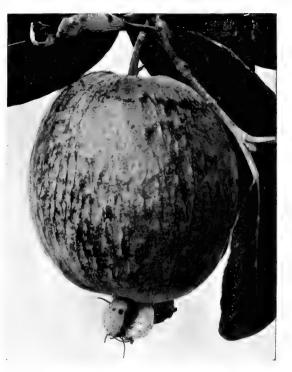

Thales. A fine Chinese variety; one of the largest loquats grown. The shape is round to pyriform; the skin is thin, tender and orange in color. The flesh is orange colored, firm and meaty, with rich, distinctive flavor. A different type from the other varieties. May to June.

#### Sapotas

#### (Casimiroa edulis)

(Casimiroa edulis) The White Sapota or Casimiroa Edulis grows to a height of 20 to 30 feet. The tree is a strong grower of rather spreading habit, with large five-fingered leaves. It thrives well near the coast and in the milder sections of California. About as hardy as the Lemon. The fruit is one of the most delicious of the sub-tropical fruits which may be grown in California.

Galloway. (New.) From a seedling Sapota tree sold by us to Mr. A. E. Zapf of Orange, some years ago comes this new variety. Tree is a good strong vigorous grower and serves as an ornamental shade tree. Fruit usually as large as a medium sized apple, flattened in shape, with a rich sweet aromatic pleasing flavor. Begins bearing early and so far has borne full crops of excellent fruit, which ripens from December to May. In 6x6 in. boxes, \$3.00.

SUPERBA FEIJOA New Large Apple-Shaped Feijoa

# Natal Plum

(Carissa Grandiflora)

A striking and exceedingly ornamental flowering A striking and exceedingly ornamental flowering and fruiting shrub for specimen planting, also for hedges. Grows to a height of 8 to 10 feet with a spread of 6 to 8 feet, but may be trimmed to any desirable shape. Branches spiny with beautifully shaped, glossy leaves; flowers large, white and fragrant. Fruits which ripen almost continually—although the largest crop matures in the late fall—are of an attractive brilliant red color, about the size of a date and are edible. When cooked the fruit makes a delicious sauce hardly distinguishable from Cranberries. Excellent for jams. Recommended for home planting. Tender, suitable for planting only in warm loca-tions. Potted, gallon containers, \$1.25 each, \$11.00 per 10; 4 in. pots, 75c each, \$6.00 per 10. and

EARLY RED LOQUAT CHAMPAGNE LOQUAT THALES LOQUAT Varieties Which Cover the Season; Early, Mid-season and Late

HADEN MANGO A Wonderful Fruit for Frostless Locations

# Mango

#### (Mangifera indica)

Only a few trees of the Mango are now growing in California and these are mostly seedlings. They bear well and fruit is very good. Tree tender, and should only be planted in protected, almost frostless situations. See planting instructions page 63.

Haden. Size medium to large; average weight one pound; shape oblong; color rich golden yellow, carmine on side exposed to light; purple bloom; skin smooth; flesh golden yellow, tender, melting, sweet and delicious. Sea-son July-August. In 6x6 inch boxes, \$5.00.

## Queensland Nut

(Macadamia Nut)

A sub-tropical nut tree from the Eastern Coast of A sub-tropical nut tree from the Eastern Coast of Australia. It is a beautiful ornamental tree with a dense rounded head of long narrow dark green leaves, and attains a height of 20 to 35 feet. The nuts are about  $1\frac{1}{4}$  inches in diameter, round and hard shelled, with a tender white kernel very rich in oil. In delicacy of flavor they resemble the Brazil Nut but are milder and more tender.

more tender. The trees begin to bear in 5 or 6 years from planting and usually bear good crops. It is healthy and vigorous, is not subject to serious pests or diseases and does not require more than ordinary care. Even when young the trees are not damaged by temperatures higher than 26 degrees.

degrees. For ornamental planting alone the Macadamia is a beautiful tree and with the additional value of annual crops of excellent nuts it should be generally planted. Potted, 3 gallon contriners, 2 to 3 ft., \$3.00; 6x6 in. boxes,  $1\frac{1}{2}$  to 2 ft., \$2.50.

#### Cherimovas

#### (Anona Cherimolia)

Commonly known as Cherimoya or Custard Apple. One top, the delicious sub-tropical fruits worthy of cultivation. The tree grows to a fair size and forms a well-rounded top. The fruit is much relished when eaten out of the hand or as a table delicacy; pulp of a custard-like con-sistency. Plant only in favored situations.

Booth. A new sort from Mr. Booth's place in Holly-wood. Fruit large, elongated in shape; skin rough; flesh light yellow; exceedingly delicious and rich in flavor. February to April. Budded trees, \$3.00.

Deliciosa. A fine variety originating on the grounds of Mr. C. F. Wagner, Hollywood; fruit large; shape irregular; quality good; flavor delicious. Single fruits weigh up to 1½ pounds. January. Budded trees, \$3.00.

# **Fruiting Bananas**

#### (Musa)

Fruiting Bananas are too tender to plant in most on Southern California but there are some frostless districts where they will thrive and bear fruit. Our plants are strong and well established and should bear fruit within 2 years.

2 years. Cavendish. A dwarf Banana attaining a height of 6 to 10 feet, and bearing large bunches of big fruit. One of the hardiest of the fruiting species, and not damaged by winds because of its small size. 5 gal containers, \$6.00.

Harts Choice. Taller and more tropical looking than the Cavendish, growing to 25 feet. Shows a pink color on trunk and leaf stems and with its big leaves is very orna-mental. Bears large fruit of a very fine flavor. The leading Florida variety. 5 gal. containers, \$5.00.

## Carob-St. John's Bread

(Ceratonia Siliqua)

The Carob is a handsome evergreen tree of great value The Carob is a handsome evergreen tree of great value for street and shade planting. For this purpose seedlings are usually planted (see page 42 for seedling trees). However the Carob also bears pods very rich in protein and sugar and which make valuable food for stock. Budded trees of known quality and bearing habit, such as the variety we list below, must be planted in order to secure pods. The trees do well in practically all parts of California and Arizona where the temperature does not go below 20 degrees. Bolser A prefact flowering variety (with both male

Bolser. A perfect flowering variety (with both male and female flowers) which bears very heavy crops, often producing the first year. Chemical analysis by University of California shows 52% sugar. An excellent ornamental also. In 5 gallon containers, 5 to 6 ft., \$3.50; 4 to 5 ft., \$3.00; 3 to 4 ft., \$2.50.

# Olives

The quality of our olive trees is best proven by the olive groves now producing in all sections of the State from the far north to the southern boundary. In advance of digging and shipping we prune olive trees back usually to two or more feet in the nursery row, according to size and caliper of tree. See planting instructions page 63. Prices for Manzanillo and Mission.

Prices for Ascolano and Sevillano 25c per tree higher.

Manzanillo. Fruit large, purplish black with light colored specks. The tree is a free grower of rather spreading habit, and a prolific bearer. The ripe olives when cured, are unexcelled in flavor and quality. The fruit ripens early, and therefore this variety is the best for planting where early fall frosts occur. October.

for planting where early fall frosts occur. October. Mission. The well-known standard variety introduced by the Spanish Padres. Large trees of this variety are still growing and bearing fruit at some of the old Mis-sions in California. The tree is a handsome upright grower, hence the best for roadside or border planting. Fruit medium to large; makes a rich-flavored, well-colored pickle and a good quality of oil. A heavy producer. November.

Ascolano. A superb Italian olive of large size and fine appearance, fruit often equaling in size the French Prune to which it is similar in shape. Its size permits its being sold under the brand "Queen Olive." Ripens in October.

Sevillano. Of largest size; the variety imported from Spain under the brand "Queen Olive;" the best variety for green pickles. October.

Olive Trees in Nursery Rows

# **Select Citrus Fruits**

Extra care at all times is necessary in order to grow a good citrus tree, since if the trees are neglected at one stage they may be stunted for life. At all stages in the growth of our citrus trees they are under the constant care of men who have been trained by years of experience in this work.

The seedlings are carefully selected for vigor and root growth, and our buds are taken from trees of true type and known vigor. Buds of commercial varieties are sup-plied by the Fruit Growers Supply Company from per-formance record trees. The varieties we list include the best of all citrus fruits for California and they have all been tried out thoroughly in this state.

With our careful methods of packing we ship citrus trees safely to any part of the world. For long distance shipment the earth is entirely removed from the roots and the tops cut back to reduce the weight.

#### **Fruiting Size Citrus Trees**

We can furnish extra size Citrus trees that have already borne fruit in a number of varieties, including Washington Navel, Valencia and Lue Gim Gong Oranges; Lisbon and Villa Franca Lemons; Marsh Seedless Pomelo; Tangerine, Tan-gelos, and Citron of Commerce. Price, in large boxes, \$10.00 to \$15.00 each.

Write for special prices on quantities. Prices are for trees with roots in a ball of burlap-tied

Prices are for trees with roots in a ball of burlap-tied earth, weighing, packed, from 40 to 60 pounds each. Washington Navel. Seedless. Easily heads the list of all oranges, and by reason of its superiority, is largely responsible for California's world-wide citrus fame. The tree is a thrifty grower, making a well rounded, uniform top; a prolific bearer. Fruit is large; flesh meaty, ten-der, sweet and highly flavored; peel smooth and tough; ideal for shipping. Ripens November to April.

Valencia. The only orange which shares the popularity of the Washington Navel. As the Navel season closes the Valencia season begins and lasts through the sum-mer and fall months. The two varieties will supply oranges for the table throughout the year. Tree a strong, vigorous, upright grower; very prolific; fruit medium, oblong, firm and heavy; few seeds. Having no competitor when reaching the market, it usually commands good prices. Ripens April to October.

St. Michael. Tree strong and vigorous; fruit medium round and heavy; skin thin and smooth, light color; an abundance of juice; flavor sweet and sprightly; ships well. Tree productive. Ripens February to June.

Lue Gim Gong. A variety resembling a high quality Valencia and ripening about the same time, but the fruit is deeper orange red in color, and has been known to hang on the trees for two years in an edible state. Fruit large, rich and juicy.

Mediterranean Sweet. Tree of somewhat spreading habit, but does not attain the size of the Navel although somewhat hardier. Fruit uniform size; pulp and skin of fine texture; solid and nearly seedless; flesh orange yel-low. Ripens March to June.

**Ruby Blood.** Fruit medium size, nearly round; skin thin; pulp rich, juicy and sweet, streaked with red when fully ripe, which extends through the peel showing a reddish blush on the outside. The tree is hardy; sym-metrical grower and regular bearer. Ripens Feb. to May.

Thomson's Improved Navel. Medium size; skin thin, smooth and rather tender; highly colored. Fruit matures earlier than the Washington Navel. November to April.

ST. MICHAEL ORANGE A Thin-skinned, Very Juicy, Sweet Orange

## Pomelos—Grape Fruit

Grapefruit is becoming more and more popular as a table fruit. There is much satisfaction in picking fine, large, luscious, juicy fruits from your own trees almost every day of the year, so plant plenty of Grapefruit trees. See planting instructions page 62.

On Sour Orange Roots

			Per 10
2	year,   inch caliper	\$2.75	\$25.00

Prices are for trees with roots in a ball of burlap-tied earth, weighing, packed, from 40 to 60 pounds each.

**Foster.** This variety has gained quite a reputation in Florida but has not shown up so well in this state, although of fair quality. The flesh is streaked and tinged with a faint pink color. Bears well and the flavor is good.

Marsh Seedless. All commercial plantings of grapefruit in California and Arizona are of this variety and it is superior to all others tried. The fruit is large and practically seedless, with a thin rind, abundant juice, and exceptionally fine flavor. The tree is a vigorous and compact grower and bears very heavily. The very finest pomelo. Ripens February to September.

#### Lemons

In considering trees for the home garden, too often the Lemon is omitted. From one or two trees, the family may enjoy an abundance of ripe, juicy, healthful fruit all the year round.

Lemon trees are not as hardy as Orange trees, but in planting home orchards, it is not necessary to consider this difference.

## See planting instructions page 62.

carta, weigning, packed, from 40 to 60 pounds each. Eureka. The leading commercial lemon; fruit uniform and of medium size; rind of fine texture and color; rich in juice; quality the highest; few seeds; tree almost thornless, an important consideration in picking and pruning. Bears heavily and continuously especially during the summer when lemons are in greatest demand. Shipping qualities the best. Fine for home garden planting.

#### MEXICAN LIME Boars Heavy Crops of Fine Quality Juicy Fruit

Lisbon. This lemon has no superior in quality. Fruit very juicy, with strong acid flavor, free from bitterness; fine texture; good size; few seeds; keeps well. Tree grows strong and bears heavily. Branches thorny. Its hardiness renders it a favorite in many outlying districts. Main ripening season December to May.

**Ponderosa.** A novelty fruit for home planting, the fruit attaining enormous size, often 12 inches in circumference. The tree is dwarf, quite hardy, and the fruit is of good quality. Usually bears the first year after planting and ripens continuously throughout the year.

Villa Franca. Several types of Villa Franca lemons are extant, some quite thorny and somewhat shy bearers. Our trees are grown from buds selected from trees of the thornless, open, fruitful type. Trees are of strongest growth. Fruit of superior quality, large and juicy. Ripens from December to May.

WASHINGTON NAVEL ORANGE

MARSH SEEDLESS GRAPEFRUIT The Three Leading Commercial Citrus Fruits VALENCIA ORANGE

#### ALGERIAN TANGERINE Three Year Bearing Tree

## Tangerines and Mandarins

Mandarins and Tangerines are known as "Kid Glove Oranges" because the rind is thin and peels off readily. These delicious oranges are greatly relished by all; the trees should be planted generously in small orchards; are also profitable for commercial growers.

Te	en ass	orted	Citrus	trees	at the	10	rate	Each	Per 10
									\$22.50
I	year							2.25	20.00

Dancy Tangerine. This is the leading commercial Tangerine and the most popular of the Mandarin family; orange-red skin; pulp of best quality, not very seedy; rind separates readily from flesh; juicy, highly flavored; tree strong grower and very prolific. Desirable for home orchards. Ripens February to May.

Algerian Tangerine. Like the Dancy, this new variety Algerian Tangerine. Like the Dancy, this new variety is an upright, vigorous growing tree. The attractive feature of this valuable new Tangerine is that it ripens before Christmas and three months earlier than the Dancy. One may have tangerines for six months in the year by planting both Algerian and Dancy. Fruit deep, reddish orange when ripe; almost round, with a slight protuberance at the stem end. Ripens December to March.

King Mandarin. A very high quality Mandarin, par-cularly well known in Florida. The fruit is very large Ang Mandarin. A very high quality Mandarin, par-ticularly well known in Florida. The fruit is very large and flattened, with a rough, thick peel which adheres loosely to the flesh. Deep orange in color. Very few seeds and a delightful aromatic flavor. The latest Man-darin, ripening from March to August.

darin, ripening from March to August. Satsuma (Unshui). The hardiest orange that we grow, and for this reason can be planted where other citrus fruits will not succeed. Fruit is large, flattened; deep orange in color, with a thin rind which peels off very easily, and the fruit is sweet, tender and juicy. The tree is slow growing, semi-dwarf and somewhat of spreading habit, with heavy, dark green foliage, bearing while very young. True Owari type. November to April.

Willow-leaved Mandarin. A very ornamental tree with whow-leaved Mandarin. A very ornamental tree with its dense, dark green, willow-like foliage in a dense sym-metrical head. The fruit is of medium size, flattened; deep yellow in color, with a very thin skin. Of excellent quality, with a spicy aromatic flavor. A heavy bearer even while young. January to May.

## Limes

Limes are perhaps the most valuable of all citrus fruits for beverage purposes because of their characteristic quality and flavor. Hardy as the lemon.

Ten assorted Citrus trees at the 10 rate Each year \$2.50 year 2.25 \$22.50 20.00 Ripening season of all limes from December to May.

Bearss Seedless. (Tahiti.) The largest and finest lime, the fruit resembling a small lemon. Seedless; very juicy; a high degree of acidity and abundance of the delicate lime flavor. A vigorous, dense, round-topped tree. Fruits mature all the year around.

Mexican. An old standard variety, with very acid green fruits of small size. Largely planted commercially because of its very heavy crops. A semi-dwarf tree.

Rangpur. This is one of the hardiest of the limes, and bears extremely heavy crops of small fruit of a beautiful deep orange color. Fruit is extremely acid and a little juice makes a lot of ade.

Sweet Lime. A very mild lime with little acid. The fruit is large, almost round, very juicy, and the tree grows larger and is hardier than most other varieties, bearing heavy crops.

**Thornless.** A beautiful semi-dwarf tree with dense, dark green foliage in a rounded head. Probably the most ornamental of the limes, and in addition bearing excel-lent, medium sized fruit with the true lime flavor. Tree has no thorns.

Chinese Dwarf Lemon. A dwarf lemon introduced sev-Chinese Dwarf Lemon. A dwarf lemon introduced sev-eral years ago from China, and which bears heavy crops of excellent fruit while very young. It is hardier than any of the commercial varieties now grown, and is also valuable as an indoor plant in cold climate. The fruit is almost round and has a deep orange color. Citron of Commerce. The variety from which the can-died Citron peel of commerce is made. The fruit is very large and oblong, skin thick and usually rough; tree of low spreading habit; a heavy bearer. Ripens continuously. Sommer Tongelo. This bathyrid citrus fruit is the result

Sampson Tangelo. This hybrid citrus fruit is the result of a cross between a Tangerine and a Pomelo, but the fruit is entirely different from either parent, being round, of medium size, golden yellow in color, and with a distinct and very pleasant flavor. Bears young and heavily. Ripens February to May.

# **Combination Citrus Trees**

For the accommodation of home planters who have For the accommodation of home planters who have room for but one Citrus tree in their garden, we offer Combination Citrus Trees upon which will be found a Washington Navel and Valencia orange and a Marsh Seedless Pomelo, all budded on a Eureka Lemon. These varieties being all strong growers, will do well on the same tree, and will produce the various fruits at different times during the year. An interesting novclty for your garden which at the same time is extremely convenient and useful.

2-year, balled, 70 to 85 lbs. packed. Each \$4.00.

# The Chinese Juiube

The Chinese Jujube is a hardy fruit from the Orient, sometimes called "Chinese Date" because the appearance and texture of the fruit are very similar to those of the date. Grafted varieties of the Jujube were offered by us two years ago for the first time, and we have had many reports of trees heavily laden with fruit only six months after planting, which illustrates the early and satisfactory results. results obtained.

The planting, which illustrates the early and satisfactory results obtained. The Jujube is a small, deciduous tree. The fruit of the larger kinds is from  $1\frac{1}{2}$  to 2 inches in diameter, may be round, oval, or pear shaped according to variety, has a smooth, brittle skin rich dark brown in color. The flesh is sweet, crisp and rather dry when fresh. The fruit is excellent when eaten fresh, and when picked and allowed to stand, it dries and gains an added flavor. It makes an excellent jam or butter when cooked, but the best way to enjop the fruit is to cook it in a sugar syrup and allow it to dry, when it becomes a delicious confec-tion which we believe will eventually rival the date as a commercial product. The tree is a heavy and consistent bearer, never failing to produce a large crop, and it begins to bear usually at the age of one year. It blooms very late in the spring, avoiding all danger from spring frosts, and the fruit ripens in September and October. Because the Jujube is a sure producer, because it is a highly nutritious, deli-cious fruit, capable of being used in many ways, and because it thrives in locations where many fruits will not grow, it will be a valuable addition to the orchards and gardens of the West and South. We have tested the large-fruited varieties introduced by the U. S. Department of Agriculture and have selected four of them as being the best for propagation. We list those under the original Chinese names. Price for stocky, grafted, field grown trees: Each Per10

Price for stocky, grafted, field grown trees:

Lang. Large pear-shaped fruit,  $1\frac{1}{2}$  to 2 inches long. Bears the first year after planting and produces heavier crops than any other variety.

Li. Has the largest fruits of any variety yet intro-duced; round and flattened on both ends, often 2 inches in diameter. Flesh crisp and sweet, of excellent quality.

Mu Shing. Medium sized fruit of excellent shape and size for processing and with a very fine flavor being treated. Olive shaped. after

Sui Men. Olive-shaped fruit very much like Mu Shing but a little smaller, and bears heavier crops. Bears first vear.

CHINESE DWARF LEMON A New Citrus Variety, Bearing Young and Heavily

# **Select Deciduous Fruit Trees**

The best time for planting all deciduous trees in California is during January, February and March. The trees at this season of the year are in a dormant condition. Fall planting is not advisable in the Southwest, since the trees are not in a sufficiently dormant condition to dig before December. Aside from this fact fall planting is impractical and not necessary in our mild climate.

While we list all the commercial varieties, and by this we mean varieties especially adapted for shipping fresh to eastern markets and for canning and drying, as well as for local market consumption, we also list all the best varieties of deciduous fruits for planting in home orchards in California.

The commercial varieties have their place, but are not always varieties of the highest quality. To plant a home orchard, where quality is one of the essentials, one must read carefully the descriptions we give, and make careful selection of as many varieties of each kind of fruit as the space may warrant, carefully selecting varieties ripening throughout the season and of fine quality. If this is done, you will have in your orchard fruits ripening from early to late, which will be a source of much satisfaction to you. With exceptionally favorable climatic advantages we have in the great southwest, one may easily have, by making proper selections, an orchard consisting of varieties that are not surpassed anywhere.

Please observe that we list each kind of fruit, as for instance peaches which ripen from June to November, in order of ripening.

As a precaution against sunburn, the use of tree wraps or protectors is advisable. These are listed on page 62. Complete planting instructions will be found on page 63.

## Peaches

All peaches are freestones except where the word  $\operatorname{Cling}$  follows the name.

#### PEACHES-On Peach Roots

Palora, J. H. Hale, Peaks, Phillips, Sims and Tuscan also supplied on Apricot roots.

Ten assorted fruit or nut trees, or five of a single variety are sold at the 10 rate; 50 peach trees but not less than 10 of a single variety are sold at the 100 rate.

			Ŀ	Lach	Per 10	Per 100

#### Listed in order of ripening:

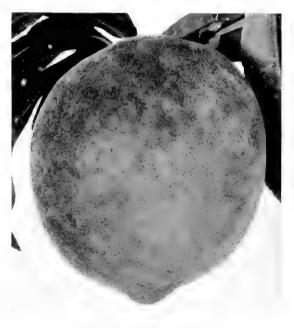

Mayflower. A beautiful "red all over" peach, desirable for early marketing. Said to surpass all other early peaches in both quality and color; tree a healthy and vigorous grower; bearing heavily it invariably requires thinning; its firmness makes it a good shipper; extremely early. May.

**Alexander.** An early peach of good quality; medium size; skin greenish-white covered with rich red; flesh mellow, juicy and sweet. Early June.

**Early Rose.** This early white cling peach has proven to be a profitable early commercial variety for the market, selling when peaches are scarce and fresh fruit is in demand. Blooms hardy; good shipper; quality better than many early peaches. Early June.

**Patison.** Similar in all respects to the Early Imperial, except it ripens seven to ten days earlier. The fruit is not quite as large as the Imperial but is of very good quality. Flesh yellow, juicy; skin yellow with red blush. First yellow peach of the season. June.

Australian Saucer. A small peach, flattened at both ends, thus obtaining its name; white with crimson cheek; flesh white, delicious and very sweet. The only really satisfactory peach for the hot, dry interior sections of the Southwest. Late June.

EARLY IMPERIAL PEACH The Best Early Yellow Freestone Peach

Red Bird Cling. A strikingly handsome very early ipping peach. White fleshed with deep red skin. June. shipping peach.

Early Imperial. For a number of years this variety has been the leading early yellow freestone for commer-cial and home use. Fruit medium size with small pit; skin yellow, shaded with crimson; flesh yellow, rich and firm. A standard peach for home and market. Late June to July.

Hales Early. One of the very best early white peaches. Possesses high quality and is unequaled for home use. Skin greenish, splashed with red. Flesh white, juicy, and sweet. Late June.

Strawberry. One of the best and finest flavored peaches for home use. Medium to small size; skin white, with beautiful red markings; flesh white, very juicy and highly flavored. Bears heavily, and fine for the home orchard. Early July.

**Opulent.** One of Luther Burbank's introductions and a variety of very high quality for home use. Fruit medium to large; skin without fuzz, white, marbled with dark red; flesh white, juicy and sweet. There is nothing better at this season for home use.

**Champion.** The largest of the early white freestones. Beautiful big fruit, white with a red cheek; of wonderful quality, and a remarkably good peach for home use.

Foster. A large, yellow peach, with a dark cheek; resembles Early Crawford. A valuable early commercial freestone. Late July.

**Early Crawford.** Tree vigorous and prolific; in past years this was the earliest peach, but now much earlier kinds are grown. Large; flesh yellow and juicy; a fine peach of its season for home orchards. Late July.

Geo. IV. A large, round white freestone; skin creamy white, with red cheek. Flesh pale; juicy; with an exquisite flavor. Very desirable for the home garden. Late July.

Tuscan. See Ontario Cling below.

Ontario Cling. (Southern Tuscan.) This variety has ontario Ling. (Southern Tuscan.) This variety has been for a long time a popular commercial canning peach, and if handled properly is a large round fruit, deep red on the sunny side; flesh rich and firm. An extremely heavy bearer and the earliest canning peach.

Lukens Honey. One of the finest and sweetest of all peaches for home use, the quality and flavor being unexcelled for eating. Of medium size; skin white with a unexcelled for earning. Of medium size, skill white when a rosy blush; flesh white, tender and juicy. Has the added quality of being independent of weather conditions and leafs out normally every spring. Late July.

leats out normally every spring. Late July. J. H. Hale. The experiments of the past several years in California orchards and in the markets have demon-strated that this is a profitable variety for the California peach grower. It is a freestone of large size—Elberta type—highly colored; yellow flesh, red around the pit, which disappears in canning; almost as firm as a cling yet tender and good for eating; ships exceedingly well; remains on trees in firm condition for longer time than any other freestone; bears well and commands high price. The very finest freestone peach for home and market. very finest freestone peach for home and market. August.

MILLER'S LATE PEACH **Our Best November Freestone Peach** 

#### J. H. HALE PEACH The Finest Peach Grown

Elberta. Large, yellow, with red cheek; juicy, sweet and highly flavored; tree strong and healthy; very pro-ductive; one of the best paying varieties for the South-west. August.

Lovell. Round freestone, flesh firm and yellow to the pit; tree vigorous, bears heavily and regularly; a leading commercial freestone for canning and drying. August.

Peaks Cling, (Palora.) As a midseason canning peach, the Peaks has no superior. The fruit is large, uniform and round; skin clear yellow; flesh yellow to pit with no discoloration, firm with a small pit. A very heavy bearer, always up to size. We know of nothing better as a always up to size. We mid-season cling. August.

mid-season cling. August. Sims Cling, Known as an improved Phillips Cling, which it resembles. Fruit averages large size, golden yellow to pit which is small. Ripens just before Phillips. We strongly recommended the planting of this variety for a canning peach. Middle August. Orange Cling. Fruit very large; skin yellow with red cheek; flesh golden yellow, rich and sugary; popular as a home canning variety. End of August. Muiz A valuew freestone much used for drying. Skin

Muir. A yellow freestone much used for drying. Skin yellow; flesh yellow clear through, very firm and not very juicy; pit small; a heavy bearer. Late August.

**Phillips Cling.** This prime variety is well known and esteemed as the standard of excellence among canning peaches; large, round with a slight blush on the sunny side; flesh firm; yellow to the center; pit small. September.

Indian Blood Cling. A small late cling, sweet and highly flavored, with reddish streaks in the flesh, which is unexcelled as a home peach for canning and sweet pickles. Early September.

Salway. Peaches are beginning to get scarce when this variety ripens, and since it is of extremely high quality, is popular both for the market and home use Large, round, with a creamy yellow skin and sweet, white, juicy flesh. A heavy regular bearer. September.

**Krummel.** An eastern variety meeting with favor in California. Flesh yellow with sweet delicious flavor. Fruit hangs on late in fall. For commercial growers it brings large profits. Regular bearer. September.

White Heath Cling. Creamy white, blush on sunny side; flesh white, tender, juicy and delicious. A fine late cling for home use. Late September.

Miller's Late. There are few peaches ripening after the Salway; hence a good peach ripening as late as No-vember is a valuable acquisition. Miller's late is a fine yellow freestone of the Salway type, having better flavor and quality than the latter; a heavy bearer. November.

Sabichi Winter. Medium size; very late; flesh white, juicy, sweet and mellow; of excellent flavor; clings slight-ly to the pit. Its chief value is in its lateness, ripen-ing as late as December.

#### STANWICK NECTARINE Should be in Every Home Orchard

## Nectarines

## NECTARINES-On Peach Root

Ten assorted fruit or nut trees, or five of a single variety are sold at the 10 rate; 50 Nectarines but not less than 10 of a single variety are sold at the 100 rate.

	W	rit	e for prices on 300 or more.				

Listed in order of ripening.

**Gower.** A rich flavored, freestone red Nectarine of recent introduction. Firm as a clingstone peach; good size; tree a strong grower and heavy bearer; very early; ripens with Early Crawford Peach. Early July.

Gold Mine. A new freestone nectarine from New Zealand, bearing very heavy crops; red and yellow skin and juicy white flesh of excellent flavor. The fruit is large, averaging  $2\frac{1}{4}$  inches in length. Early August.

Stanwick. One of the leading varieties; large size; flesh white, tender, juicy and of delicious flavor; skin greenish-white shaded with reddish-purple in the sun. A prime table variety for family use. August.

Nigh Cling. (New.) A new seedling clingstone Nectarine; valuable for canning, preserving, and pickling; flavor excellent; good size; red all over. The parent tree is a strong grower and bears heavy crops. August.

Boston. Large, bright yellow with red cheek; flesh yellow, sweet and pleasant flavor; freestone. The leading yellow fleshed nectarine. August.

#### Plums

Experiments have demonstrated that most varieties of Plums will bear heavier crops if certain other varieties are planted nearby as pollinizers. Burbank, Wickson and Climax all successfully pollinate the blossoms of most varieties, as well as each other, and we advise including some of these sorts in all Plum plantings.

PLUMS-On Peach and Myrobolan Roots

Ten assorted fruit or nut trees, or five of a single variety are sold at the 10 rate; 50 plum trees but not less than 10 of a single variety are sold at the 100 rate.

				Each	Per 10	Per 100

Listed in order of ripening.

Methley. Introduced by the United States Department of Agriculture and thoroughly tested in our orchards for several years. Color, dark red; flesh, red, juicy, sweet, with excellent flavor; medium size; heavy bearer and the earliest to ripen in our orchards. June. Apex Plumcot. This fruit, as its name indicates, is a cross between the Apricot and the Plum, resulting in a satisfactory combination of the two fruits. The large, globular fruit, which comes into bearing with the earliest plums, is beautiful in color; rich, firm and aromatic. June.

Beauty. Frecedes the Santa Rosa by ten days. Fruit large and beautiful, crimson with amber-crimson flesh. Tree a remarkably vigorous grower and never-failing bearer. June.

**Climax.** One of Luther Burbank's finest introductions. Very large, heart-shaped, firm and with a beautiful color. being deep red and yellow. The flesh is yellow and rich. The tree is vigorous and bears well. June.

rich. The tree is vigorous and bears went. June. Santa Rosa. Possibly the most popular plum in California, and certainly one of the handsomest. Large oval, purplish-crimson fruit, covered with light blue bloom. Flesh amber, veined with crimson. Comes in early and bears very heavily. Another Burbank variety, highly valued for both shipping and home use. Early June.

Burbank. A fairly early plum, always producing heavy crops. Fruit medium to large, almost round; light red mottled with yellow and covered with lilac bloom. Flesh deep yellow, and very juicy. July.

Geep yenow, and very juicy. July. Formosa. Fruit of large, uniform size; yellow, with pale bloom turning to a rich, clear red; flesh pale yellow, unusally firm, sweet and deliciously rich, with a delightful apricot flavor; nearly freestone; tree of luxuriant growth. A rare combination of good qualities render it an ideal shipping plum. July.

Duarte. A true blood plum resembling the Satsuma in appearance; of good flavor and quality. Tree an upright, stocky grower. The earliest blood plum. July.

Satsuma. The well known Japanese blood plum. Large; deep red from skin to pit; flavor pleasant; stone remarkably small; unexcelled as a canning fruit; ships and keeps well. In order to get crops, some other variety such as Wickson, Burbank or Climax should be planted nearby for cross-pollination. July.

Wickson. A very large heart-shaped plum, deep yellow, overlaid with carmine and a white bloom. Flesh crisp, sweet, amber colored. August.

Green Gage. Medium size; round; skin yellowish-green; rich and sweet when fully ripe. An old favorite variety which is still in demand, but which does not do so well in the warmer interior sections. August.

Kelsey. Very large, heart-shaped; skin greenish-yellow, overspread with light red and covered with bloom; flesh yellow and firm; of pleasant flavor; prolific, September.

**Damson.** Fruit small; oval; skin purple; flesh melting and juicy; rather tart; an old well-known sort; desirable for making jam. September.

Becky Smith. A fine large late-ripening new variety. After all other varieties are gone, this one will meet your every wish. It is good to eat out of hand being sweet, juicy and excellently flavored. September.

BECKY SMITH PLUM A Large, Late Plum for Home Market

#### **ROYAL APRICOT** The Best All-round Apricot

#### Prunes

Prunes are sweet Plums and are delicious when caten fresh as well as when dried. It is easy to provide a season's supply of this luscious, popular dried fruit from a few trees in the garden. The varieties listed below will supply fruit from July to October. The Imperial Prune does not bear good crops unless another variety is planted with it as a pollinizer. Robe de Sargent, French, and Sugar are the best varieties for this purpose. The yield of nearly all varieties of Prunes will be materially increased by interplanting two or more varieties. varieties.

#### PRUNES-On Myrobolan Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 prune trees but not less than 10 of a single variety are sold at the 100 rate.

### Listed in order of ripening.

Sugar. Fruit very large; skin tender; dark purple; covered with white bloom; flesh yellow, tender and sugary. Late July.

**Tragedy.** A desirable early variety; large; handsome; skin dark purple; flesh greenish-yellow; sweet and rich. Excellent for eating out of hand. July.

Imperial. One of the largest and finest prunes where it will do well. Uniformly large, reddish-purple in color; very sweet and of high flavor. Should be planted with a pollinizer to get good crops. July.

Robe de Sargent. Large, deep purple; sweet and excel-lent for drying; good for home orchard; valuable to plant with Imperial. Ten days earlier than the French Prune.

Standard. Fruit large and handsome; skin purple with heavy blue bloom; flesh amber, fine grained, juicy and firm; very sweet and a perfect freestone; excellent for either drying or eating out of hand. August.

French Prune Improved. A large size Prune averaging from one-third to one-half larger than the well-known French Prune, but in all other respects the same. Bears heavy crops every year. September.

#### Apricots

The Apricot is one of the most delicious and richly fla-vored fruits we possess and thrives better in California than in any other part of the United States. The tree is a vigorous grower and comes into bearing early like the Peach, and requires about the same treatment.

Severe pruning each season is necessary to keep the tree in a vigorous condition.

#### APRICOTS-On Peach and Apricot Roots

Ten assorted fruit or nut trees, or five of a single variety are sold at the 10 rate; 50 apricot trees but not less than 10 of a single variety are sold at the 100 rate.

Newcastle. The earliest apricot to ripen, altho the quality is not as high as in the later varieties. Medium size, round, pale orange in color. A good commercial fruit in early-ripening sections. May,

**Royal.** The leading commercial apricot for canning and drying, and also excellent for the home orchard. Fruit medium size; oval; skin brownish yellow; flesh rich and sweet. A very heavy bearer. Early June.

Blenheim. A variety very similar to Royal, ripening about the same time but in certain sections of the state is preferred to it for commercial purposes. Large, oval fruit of high quality. Bears extremely heavy crops. Early June.

Tilton. One of the largest apricots, somewhat heart-shaped with a rich apricot color. Very finely flavored, sweet and juicy. Bears quite well and is preferred in parts of the state to all others. Middle June.

**Moorpark.** Large greenish-yellow, brownish-red on the sunny side, marked with numerous specks and dots. Fruit of the highest quality and finest flavor of any apricot grown. A rather shy bearer in some sections. The latest to ripen. July.

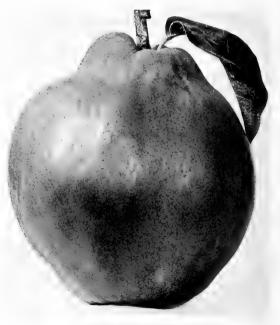

## **Ouinces**

This fruit is desirable for jellies and preserves, hence forms a valuable adjunct to the garden. Owing to its keeping qualities, the California-grown Quince is being shipped profitably to eastern markets. A few trees should find a place in every family orchard. All varieties ripen late in the fall.

#### QUINCES-On Quince Roots

PINEAPPLE QUINCE California's Leading Quince

**Orange.** Large, roundish with short neck; greenish yellow color. The best known of the older varieties.

**Pineapple.** The name is suggested by the flavor. The fruit resembles the Orange Quince, but is smoother. Of excellent quality.

Smyrna. The fruit of this superb variety is very large and of a lively lemon-yellow color; tender and delicious when cooked.

## Pears

But few fruits cover a wider range than the pear. It finds the best development in a heavy loam soil and will also withstand a larger per cent of alkali in the soil than most other fruits; it will also withstand considerable neglect and still yield good crops. Of all varieties the Bartlett leads, with others filling out the season from cardy to late. early to late.

The yield of Bartlett Pears, under most conditions, will be materially increased by interplanting with a pollinizer, the best varieties for the purpose being Winter Nelis, Beurre D'Anjou and Doyenne du Comice.

Under unfavorable conditions such as heavy soils, or where the drainage is poor, where alkali is present, or if there is danger from Oak Root Fungus, only the French root should be planted. On lighter soils and in most ordinary situations, either French or Japanese root may be used with success.

PEARS-On Japan and French Pear Roots

Ten assorted fruit and nut trees or five of a single variety are sold at the 10 rate; 50 pear trees but not less than 10 of a single variety are sold at the 100 rate.

				Each	Per 10	Per 100	
4	to	6	feet	\$ .75	\$6.50	\$45.00	
3	to	4	feet	.65	5.50	40.00	
2	to	3	feet	.50	4.00	30.00	

Write for special prices on 300 or more.

Wilder Early. The earliest pear of good quality; medium size; pyriform; bright lemon-yellow color with a flaming cheek. The flesh is buttery, sweet and rich, and the fruit keeps longer than most early pears. Does particularly well in parts of Southern California where other varieties will not thrive. July.

Lawson. Large fruit; brilliant crimson color on yellow ground; flesh crisp, juicy and firm, one of the most attractive of the early pears. June to July.

Flemish Beauty. A superb large, melting, sweet pear; strong grower and fruitful; an old standard autumn vari-ety. September. A superb large, melting, sweet pear; ety.

**Bartlett.** The most widely cultivated pear in Califor-nia, large, buttery and melting, with rich musky flavor; tree a vigorous grower; bears abundantly; ripens early. No pear now in the market possesses a wider popularity, being a good shipper and possessing keeping qualities and fine appearance. August.

Seckel. The standard of excellence in the pear. Fruit small, but well colored and there is no other variety which possesses such exquisitely flavored, perfumed, juicy and melting flesh as this pear, even the skin being spicy. Ripens well on the tree. A low compact tree, very resist-ant to blight. August to September.

Beurre D'Anjou. A standard fall pear for home and **Deurre D'Anjou.** A standard tail pear for home and market. Large, uniform in shape; deep yellow, marked with russet and blushed with crimson. Flesh tender, sweet and spicy. A good variety to plant with the Bart-lett as a pollinizer. October.

**Doyenne du Comice.** Large, yellow with a crimson and fawn cheek and russet dots; melting rich, perfumed and luscious. October.

Beurre Bosc. A pear of uniquely beautiful color and shape, the fruit being pyriform, with a long tapering neck, deep yellow, heavily overlaid with cinnamon-russet, and the quality of the flesh is exceedingly fine. A won-derful pear for all purposes and in many sections ranked second only to Bartlett. September.

**Kieffer.** Large; skin rich golden-yellow, sprinkled thickly with small dots, and often tinted with red on one side. Flesh slightly coarse, juicy and melting, with pronounced quince flavor. October.

Winter Bartlett. A small pear, suggesting Bartlett in shape, color and flavor, but ripening very late. The tree is very productive and the fruit keeps remarkably well. This is the only pear which seems to do well in the Imperial Valley and similar sections. November.

Winter Nelis. The standard winter pear. Fruit small but handsome, usually russetted, with a ruddy cheek; a delectable, rich, aromatic flavor. Tree is an irregular grower but enormously productive, and the fruit will keep in storage all winter. There is nothing to equal it in its season. December.

# **Dwarf Pears**

Dwarf Pears are desirable and especially adapted for small gardens or city yards where space economy is an item. They also serve as a valuable filler for commercial orchards. They bear early, often the second year. Trees should be planted from 8 to 12 feet apart. These double-worked Pear trees are first budded to Beurre Hardy then budded to variety desired. This pro-cess insures good union of buds, since Beurre Hardy is the only Pear variety that will stick to the Quince root. This method takes two years from first budding.

This method takes two years from first budding. DWARF PEARS DOUBLE-WORKED-On Quince Roots

**KADOTA FIG** With Amber Flesh as Sweet as Honey

#### Figs

Figs require a warm, dry climate, with temperatures above 18 degrees F., and since these conditions are found in most of California, there is a wide field in which they may be successfully grown. They also need more water during the growing season than most deciduous fruits. Figs are very susceptible to exposure and the roots must never be allowed to dry out during transplanting. After planting, the tops should be cut off to 24 inches or less and the wound covered with asphaltum paint or grafting wax. As a rule smaller trees are equally or more successfully transplanted than the largest.

#### FIGS-On Fig Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 fig trees but not less than 10 of a single variety are sold at the 100 rate.

						Per 100
4	to	5	feet\$	.75	\$6.50	\$45.00
3	to	4	feet	.65	5.50	40.00
2	to	3	feet	.50	4.00	30.00
	W	rit	e for prices on 300 or more.			

Angelique. A medium size, round fig, flattened at the ends; skin yellow; flesh white, tinged with rose. A high quality fig for home use. Early.

Black Spanish. Of the same type as Mission, but superior in some respects. Color is dark purple, almost black, with a thick blue bloom. Fruit oblong, or turbin-ate, very large; juicy, with a sweet, rich flavor. An ate, very large; juicy, with excellent keeper and shipper.

Brown Turkey. A large pyriform fig, violet-brown in color with blue bloom; pulp rosy-red, sweet and rich. One of the hardiest figs and very prolific. Ripens early.

Calimyrna (Smyrna). The largest and finest fig grown, introduced from Asia Minor where it is dried and exported in great quantities. Makes a wonderful fig in California; very large, flattened; skin yellow, pulp reddish amber, with a richness and meatiness unknown to other figs. The best drying variety. Will not mature crops unless pollinized by the fig wasp (Blastophaga grossorum) which breeds in the wild Capri Figs. A Capri must be planted nearby and infested with the wasps to obtain a crop on the Calimyrna. Ripens midsummer. planted nearby and infested with the wasps crop on the Calimyrna. Ripens midsummer.

**Capri.** A Capri must be planted with even one Cali-myrna tree, and in larger plantings the ratio is about 1 Capri to 20 Calimyrnas.

Kadota. One of the finest figs for all purposes, as it will can, dry, pickle or ship fresh and give excellent results in every case. Now being largely planted for the fresh fruit markets. Medium size; skin yellowish white, smooth; flesh pale amber, very sweet and rich. A pro-lific bearer. Unexcelled for home use. lific bearer.

Mission. The well known California Black Fig. The tree is a very strong grower and good bearer. The leading black variety for shipping and drying.

San Pedro White. A large, fine early fig with golden yellow skin and coarse, very sweet amber pulp. A fine fig for the desert sections as the first crop comes very early. The second crop drops off unless caprified.

White Adriatic. Large; skin greenish-yellow; flesh reddish; tree strong grower and prolific; largely planted in California.

White Genoa. A large pyriform variety with yellow skin and amber pulp, producing a large crop of figs dur-ing the summer until October. Richly flavored and finely textured.

White Pacific. Considered by some to be the same as Kadota. The best of all figs for home use. Medium size; thin, yellowish white skin; amber pulp, richly flavored. Never sours on the tree. August to November.

## Persimmons

The Japanese Persimmon adds a touch to the home orchard that is out of the ordinary and the large, lus-cious fruits, ripening after the fall frosts have come, offer a fitting close to the deciduous fruit season. It will succeed almost anywhere in California.

It is not necessary to plant pollinizers with Persimmons in California, but doubtless a larger crop will be obtained if one or more trees of the Gailey are planted with other kinds.

#### PERSIMMONS-On Lotus and American Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 persimmon trees but not less than 10 of a single variety are sold at the 100 rate.

4	to	5	feet\$		Per 10 \$11.50	
			feet			
2	to	3	feet	.75	6.00	50.00
	W	rit	e for prices on 300 or more.			

Gailey. Recommended only for planting with other varieties to pollinize the blossoms and thereby produce larger crops. Fruit very small but of good flavor.

Hachiya. The leading Persimmon at the present time. Very large, conical; skin bright orange red and very attractive; flesh very sweet and rich; astringent until ripe, and then very fine. Usually seedless. Most of the fruit now paying well in the markets are Hachiyas.

Hyakume. Medium to large, roundish oval, flattened on both ends; skin light buffish yellow; flesh dark brown, sweet, crisp, meaty.

Tamopan. A very large fruit, often three to five inches in diameter, weighing over a pound and oddly marked by a crease completely around the stem end. Deep golden red in color. Flesh is tender, juicy and very sweet; very few seeds. We highly recommend it because of the excellent quality and handsome appearance of the fruit. Ripens late.

FUYU PERSIMMON The New, Different, Non-astringent Variety

HACHIYA PERSIMMON The One Leading Commercial Persimmon

#### **Fuyu Persimmon**

				Each	Per 10
4	to	6	feet	\$2.00	\$17.50
3	to	4	feet	1.75	15.00

Fuyu. (New.) First introduced by the U. S. Depart-ment of Agriculture in 1913. Since then it has fruited in the Southern States and California where it has proven to be of exceptional value. Never being astringent, it may be peeled and eaten like an apple when still firm, though fully ripe. Keeps well and quality is of the best. Medium size, flattened; deep red. Tree very prolific. Said by many to be the finest persimmon grown and it is pre-dicted that it will surpass all others as a commercial available. Fuyu. (New.) First introduced by the U. S. Depart-

### Apples

As a general rule the summer and early fall apples, which are usually green or yellow, do best in the lower altitudes in Southern California, while the late fall and winter apples, usually high colored, should only be planted in the foothills and mountains. For home plantings in the lower altitudes, we would suggest planting Winter Banana, Red Astrachan, Delici-ous, R. I. Greening and Gravenstein. A coating of whitewash to which is added a little crude carbolic acid should be applied to the trunks every spring while the trees are young to prevent attacks by borers. See planting instructions page 63.

#### APPLES-On Apple Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 apple trees but not less than 10 of a single variety are sold at the 100 rate.

				Each	Per 10	Per 100
-4	to	6	feet	\$ .75	\$6.50	\$45.00
- 3	to	4	feet	.65	5.50	40.00
2	to	3	feet	.50	4.00	30.00

Write for prices on 300 or more. Listed in order of ripening.

Red Astrachan. Large and handsome, nearly covered with deep crimson; juicy and crisp, with rich acid flavor; very productive; California's best early summer apple. Does well in valley situations. July.

Gravenstein. A very large, striped, roundish apple of the best quality. Tree remarkably rapid, vigorous, and erect in growth and very productive. The finest of the early autumn apples. August.

Winter Banana. Fruit large, perfect in form; golden yellow, beautifully shaded with blush; flesh yellow, fine grained, sub-acid; rich, aromatic flavor. The tree is a great grower and a wonderful bearer, three-year-old trees often being heavily laden with fruit. A splendid variety for low altitudes. September.

Rhode Island Greening. A widely known variety that does well throughout the Southwest. Fruit large; yel-lowish-green when ripe; flesh tender, juicy, slightly acid, and rich; tree vigorous. Plant this variety in interior valleys. October.

**Delicious.** A magnificent variety of fine appearance and delightful flavor; large size, rather conical in form; brilliant red slightly splashed with yellow; flesh fine grained, crisp, juicy and sweet; grows strong and bears well; keeps splendidly. November.

White Winter Pearmain. Medium, oblong, greenish, yellow; tender, juicy, highly flavored; good bearer; one of the leading varieties grown in California. November to February.

Winesap. Medium, dark red; sub-acid; excellent qual-ity. Tree a moderate grower and abundant bearer. A favorite market variety in the West, commanding the highest prices. November to January.

# **Crab** Apples

Crab Apples comprise, as a rule, those small hard-fleshed varieties which are profilic bearers and are dis-tinguished by their hardiness. A tree or two in every home orchard is desirable.

See planting instructions page 63.

CRAB APPLES-On Apple Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 crab apple trees but not less than 10 of a single variety are sold at the 100 rate.

				Each	Per 10	Per 100
-4	to	6	feet	\$ .75	\$6.50	\$45.00
3	to	4	feet	.65	5.50	40.00
2	to	3	feet	.50	4.00	30.00

**Transcendent Crab.** The best of all crabs for general use. Tree remarkably vigorous and immensely produc-tive; fruit large, skin yellow striped with red; of a pleas-ant aromatic flavor; fine for preserves and jellies. August.

DELICIOUS APPLE Par Excellence Among Red Apples

# Cherries

There are few finer fruits than the Cherry and when the right varieties are planted in the right place they invari-ably bear fine crops. The sub-acid varieties, Morello and Richmond, cover a wider range of territory and will bear almost anywhere, whereas the sweet cherries will not bear in the lower altitudes of Southern California. Several varieties of sweet cherries should be planted together so that they may cross-pollinate and produce heavier crops, as one kind will not bear well alone. See planting instructions page 63.

CHERRIES-On Mazzard and Mahaleb Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 cherry trees but not less than 10 of a single variety are sold at the 100 rate.

			ł	Each	Per 10	Per 100
4	to	6	feet\$	.75	\$6.50	\$45.00
			feet		5.50	40.00
2	to	3	feet	.50	4.00	30.00

Write for prices on 300 or more.

Listed in the order of ripening.

**Richmond.** An old favorite, an early, red, sub-acid cherry; tree a fine grower, hardy, healthy and productive. Early June.

Tartarian. The very finest cherry to eat fresh. Large bright purplish black; flesh rich and very juicy. A vig-orous erect tree bearing abundantly every year. Brings high prices in the fresh fruit markets because it comes in early. A good pollinizer for the other sweet cherries we list and should be included in every planting. Early lune.

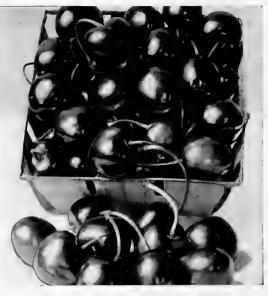

Centennial. Larger, better flavored, has smaller pit and is more highly colored than its parent, the Royal Ann, to which in many respects it is quite similar. Originated in California.

Morello. Large, dark red; tender, juicy, rich and acid; an excellent sour cherry; thrives and bears well through-out the Southwest; with us the best of this class. Late June.

Bing. very large, dark brownish red cherry A of Bing. A very large, dark brownish red cherry of extremely handsome appearance, and since it has the firmest flesh of all cherries it is a wonderful canning and shipping cherry. Has excellent flavor and is fine for eat-ing fresh. In order to procure regular and heavy crops from this variety it should be interplanted with other sweet cherries such as Black Tartarian and Lambert. Late luve Late June.

WONDERFUL POMEGRANATE Big, Red, and Sweet

LAMBERT CHERRY The Largest and Latest Sweet Cherry

Black Republican. Tree large and upright-spreading. Fruit large; color purplish-black; flesh purplish-red with dark colored juice, tender, sweet, of good quality. This variety is used in many orchards to pollinate other varieties. Early July.

**Royal Ann.** (Napoleon Bigarreau.) A magnificent cherry of the largest size; pale yellow with bright red cheek; flesh firm and sweet; tree an enormous bearer. The leading canning cherry. Late June.

Lambert. One of the largest cherries and one of the latest. Very large, heart-shaped; rich red in color; very firm fleshed, and one of the most beautiful cherries in appearance. Not a heavy bearer but the fruit brings very high prices. Early July.

## Pomegranates

Highly appreciated for its handsome fruit and the or-namental, semi-dwarf habit of the tree. There is a grow-ing demand for choice Pomegranates in the eastern mar-kets, where they usually command fancy prices.

#### **POMEGRANATES**—On Pomegranate Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 pomegranate trees but not less than 10 of a single variety are sold at the 100

				Each	Per 10	Per 100
4	to	6	feet	.75	\$6.50	\$45.00
3	to	4	feet	.65	5.50	40.00
2	to	3	feet	.50	4.00	30.00

#### Write for prices on 300 or more.

Papershell. As the name indicates this is a thinskinned variety of highest quality; fruit large; skin pale-yellow with crimson cheek, the edible portion being a rich crimson color, sweet and aromatic. October.

Wonderful. The largest and most highly colored of all Pomegranates. Big fruit, rich crimson in color; rich garnet flesh, very juicy and of excellent flavor. The best shipping variety, selling well in the Eastern markets. October.

#### **Pleased Customers**

"Please find enclosed cheque in payment for plants and trees supplied. They all look to be strong healthy ones and I am very much pleased with them, and shall have pleasure in recommend-ing your firm whenever opportunity affords." F E Smith

with them, and shall have pleasure in recommend-ing your firm whenever opportunity affords." F. E. Smith. "All the trees are growing and doing just fine. People that come here and see the trees are so surprised to see what a growth they have made. They ask where they are from and we tell them they are from Armstrong Nurseries." Mrs. Helena A. Smith.

# Select Nut Bearing Trees

From the extensive Walnut and Almond groves in California tons of deliciously flavored nuts are shipped to all parts of the United States and to many of the foreign countries. The acreage, even in California, for growing these particular nuts being limited to certain situations, it would seem unlikely that we can grow more nuts than will easily be consumed at a profitable price.

The demand has kept up with the production due largely to the splendidly organized co-operative associations formed by the growers to properly distribute the crops so that reasonably profitable prices may be secured. In later years Walnuts have been found to do well on light as well as on fairly heavy soils, and this has greatly widened their planting range, although deep soils are a requisite in any case.

requisite in any case. Since all nuts ripen about the same time in the fall of the year, no attempt is made to list them in ripening order.

## Walnuts

Our trees are grown from carefully selected scions from the best fruiting trees, grafted on the native Northern Black Walnut (Juglans Californica), under conditions of soil and climate which produce an excellent root system and a clean, vigorous top.

#### WALNUTS-On Northern California Black Roots

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 walnut trees but not less than 10 of a single variety are sold at the 100 rate.

					Per 10	
10	to	1.2	feet\$	2.00	\$16.00	\$140.00

Placentia. While new varieties come and go, the Pla-entia, commonly known as the Placentia Perfection, Placentia. While new varieties come and go, the Placentia, commonly known as the Placentia Perfection, remains the most popular and profitable walnut in Southern California. Some other varieties do not start as early in the spring and are therefore less liable to be damaged by late frosts. Except in a few small districts, this is no advantage. The Placentia continues to bear heavy crops of large, smooth nuts of uniform size which find a waiting market. Kernels are full, white-meated and of excellent flavor and quality. Tree bears very young.

Ehrhardt. A seedling of the Santa Barbara Soft Shell —similar to Placentia in many respects; begins to bud out early in the spring; bears early; bearing record shows heavy production over a period of seven years. Size, form and flavor similar to Placentia.

**Eureka.** Ranks second to Placentia as a commercial nut. Very large elongated nuts; shell light straw color, very heavy and well sealed; cream colored, plump, waxy kernels. An ideal nut for the market and brings higher prices than the Placentia but does not bear as young as the latter nor so heavily. Hardier than Placentia because it blooms later and also more immune to sunburn.

Franquette. Owing to its lateness in blooming, its hardiness and dense foliage, this French variety stands in high favor with Northern growers. The nut is large, elongated, smooth, tightly sealed, with a full, sweet kernel.

One of the most popular varieties grown in Mavette. the northern walnut districts. Nuts large and uniform; shell light colored; blooms late in the spring and bears abundantly; tree hardy. A standard commercial sort.

**Payne's Seedling.** Nut is of good size, good quality and bears early, heavily, and regularly. Has been grown largely in Central California, it having been discovered in the Santa Clara Valley.

Willson Wonder. The "Jumbo Walnut," so called because of its enormous size. An extremely large nut, with a rough shell. The kernel is good but does not always fill the shell. Bears very young and heavily.

IN OUR WALNUT NURSERY Better Trees are Not Grown

## Almonds

Two or more varieties of Almonds must be planted together, in the right combination to secure successful pollination. Good combinations are Ne Plus Ultra and Nonpareil, Nonpareil and Drake or Texas Prolific. See planting instructions page 63.

ALMONDS-On Almond Roots

Ne Plus Ultra and Nonpareil also on Peach Roots.

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate; 50 almond trees, but not less than 10 of a single variety are sold at the 100 rate.

				Each	Per 10	Per 100
-4	to	6	feet\$	.75	\$6.50	\$40.00
3	to	4	feet	.65	5.50	35.00
2	to	3	feet		4.00	30.00

Write for prices on 300 or more.

Drake. A good commercial nut because it bears uni form crops from year to year and adapts itself to all almond districts. Medium size, almost round, with a medium soft shell, plump and well filled with a good kernel. A pollinizer for Nonpareil.

Ne Plus Ultra. A widely planted and popular almond, chiefly valuable because of its very attractive outside appearance and its generally large size. The tree is a vigorous grower and bears large regular crops, and the nuts are large and long with a soft, corky outer shell. A good pollinizer for Nonpareil.

Nonpareil. Probably the most valuable commercially grown variety in California at the present time, because of its excellence for shelling purposes and its habit of bearing regular and uniform crops year after pear. Very hardy, and does well under unfavorable conditions.

Texas Prolific. Bears very heavy crops of medium sized, plump, soft-shelled nuts. Bears young. A good pollinizer for Nonpareil and Drake.

I. X. L. This variety brings the highest prices for nuts marketed in the shell because of its clean attractive appearance and plump kernels. The nut is a soft-shell, of medium size. Tree grows upright.

#### Filberts

Filberts are certain varieties of European Hazel nuts. They are produced on a large bush or small tree, and bear good sized nuts of excellent quality. They do best in a cool, fairly moist climate and are well worth trying in the coastal districts of Southern California, while in the north they are a commercial crop. Two or more varieties must be planted together to insure cross-pollination. Heavy, well-rooted trees \$1.50 each, \$12.50 per 10. Barcelona. The bast Filbert for general planting.

Barcelona. The best Filbert for general planting. A large, round nut, sweet and rich, which drops freely from the husk. Bears well when properly pollinated. Du Chilly. A large fine nut bearing fair crops, but its chief value is as a pollinizer for the Barcelona. Filberts make beautiful ornamental bushes where they do well.

DU CHILLY FILBERT Likes a Cool Moist Climate

MARRON COMBALE CHESTNUT A High Quality French Variety

## Chestnut

The Chestnut should be planted far more in California than it is at the present time, because it does particularly well in most sections of the state, producing very heavy crops of nuts which bring a good price in the markets. Also the trees make beautiful large ornamental shade trees with dense, dark green foliage and symmetrical tops. A fine tree for street planting, particularly near the coast.

Marron Combale. A fine large nut of French origin, bright brown in color. Bears well and makes a large stately tree. Grafted trees 3 to 4 ft., \$2.50; 2 to 3 ft.. \$2.00

Spanish Seedlings. The European type of chestnuts, which are also called Italian Chestnuts, do particularly well on the Pacific Coast. The different trees vary only slightly in their bearing habits and the nuts are quite well on the Pacinc Coast. The uniform these range of the slightly in their bearing habits and the nuts are quite uniform. The trees are very ornamental with large dark green leaves and we highly recommend them for shade trees. The nuts are fairly large, sweet and of good quality, and the tree bears very young. Larger crops will be secured if several trees are planted together. 4 to 5 ft., \$1.50 each, \$12.50 per 10; 3 to 4 ft., \$1.00 each, \$8.50 per 10; 2 to 3 ft., 75c each, \$6.00 per 10.

#### Pecans

There is a lively interest in California in the planting of the Pecan. It succeeds on a wide range of soil, but it is wise to plant in deep rich soil. The varieties we list have fruited in California and Arizona and seem to be well adapted to climatic condi-tions of these states.

Ten assorted fruit and nut trees, or five of a single variety are sold at the 10 rate.

	Each	Per 10
5 to 6 feet	\$3.00	\$27.50
4 to 5 feet		
3 to 4 feet	2.00	17.50

Stuart. Nuts large, oblong; dark color; shell of medium thickness, cracking easily. Kernel full, bright colored; very fine quality, rich and sweet; promises to be a good bearer in California.

Success. A large nut, tapering to apex. Thin shell and easily cracked; kernel sweet, rich, plump, filling the shell fully; the best variety for warm interior sections.

Pabst. Tree open, spreading, vigorous, and strong. Well known and much favored by southern growers. Nut large, oblong, oval at each end; shell of medium thick-ness; kernels plump, of high quality and pleasing flavor.

Van Deman, Tree handsome. Highly recommended Nut of large size, long and smooth; shell medium; cracks easily; kernel highly flavored and of excellent quality.

# **Select Vine Fruits**

Of all California fruits, grapes are perhaps the most certain crop, and with the present marketing organizations, commercial grape growing is proving a highly profitable occupation with little prospect of decline.

The great Southwest must supply the Northern and Eastern markets with all of the European varieties of grapes consumed. This includes table, raisin and juice grapes.

For home planting grapes are most satisfactory because they are sure to bear a crop and only two or three years are required to produce fruit. The vines require but little space and may often be used as an ornamental vine over an arbor or fence.

There are many excellent varieties to choose from of all colors and characteristics from the great black Ribier down to the tiny sweet Zante Currant. By the proper selections of varieties grapes may be enjoyed from early June to January 1st.

## **Rare Foreign Table Grapes**

Under this heading are listed varieties of foreign grapes most suitable for planting in home gardens or in small vineyards for supplying local consumption, and include varieties ripening from July until the first of November. Less than 5 of one variety sold at each rate; therefore 5 assorted varieties sold only at each rate, but 5 Black Muscat for example, or 5 of any one variety sold at the 10 rate; 50, but not less than 10 of a single variety, at the 100 rate the 100 rate.

Each Per 10 Per 100 

Varieties suitable for arbor or trellis growing have the capital letter "T" following the name.

Almeria (Ohanez). Berries greenish-white, medium to large, cylindrical, flattened on the ends. The latest white grape, keeping for a long time after picking because of its hard, tough skin. October.

Black Hamburg T. Has very large bunches of coal black, round berries, very firm, juicy, sweet and rich. Long a favorite grape for home and local markets. Late Long a favorite grape for home and local markets. September.

Black Malvoise T. A good early table grape bearing immense crops of oval, juicy, tender berries, reddish black in color. A strong grower and a good arbor grape. Late August.

Black Morocco. Berries extremely large, round, pur-plish black; very fine, sweet and crisp; in large compact bunches. One of the largest of all grapes and one of the latest, staying on the vine until after Thanksgiving.

Black Muscat. An excellent table grape; berries very large; skin well colored, thin but tough; flesh soft and juicy with delicate Muscat aroma. Decidedly the richest flavored of all the table grapes we grow. We recom-mend it especially for home gardens. August and Sentember Black Muscat. September.

Black Prince. Similar in many respects to the Rose of Peru. Ripens about the same time; bunches large; a good, late black grape. September.

Chasselas Neuschatel. A very early, extremely juicy white grape in very close compact bunches; bears enormous crops. July.

Chasselas Fontainbleau. (Sweetwater or Chasselas Rose.) Extremely early grape; medium size; compact bunches; amber colored, flushed with rose. Very sweet and juicy. Early July.

BLACK HAMBURG GRAPE A Good Arbor Grape

BLACK MONUKKA GRAPE A Fine Early Seedless Grape

Golden Queen. Fruit large, round, yellow; juicy and well flavored. Makes good juice. August.

Gros Colman. T. Berries of this variety are as large as small plums, and are borne in immense clusters. Skin thin, dark blue; flesh firm and crisp. One of the handsomest black table grapes grown. Early October.

**Henab.** A very strong growing vine with large loose bunches of elongated, oval, purplish red berries, mild and neutral in flavor, crisp and firm in texture. Ripens quite late. October.

Lady Finger (Rish Baba). Got its name because the berries are very long, slender and white-skinned. Large long bunches; flesh crisp, tender and sweet. A good home and shipping grape.

Lignan. With Khalili this is the earliest grape to ripen in our vineyard. Medium size; very compact bunches of oval, golden amber berries, very juicy and of good flavor. June.

**Olivette de Cadanet.** T. Very similar to Malaga but ripens considerably later; large well filled bunches of oval, greenish-white berries; skin rather tough, handling well for market. Early October.

**Purple Damascus.** Fruit is very large; deep purple when fully ripe; flesh meaty; bunches large and loose. Very desirable for table use. September.

Rose of Peru. T. A very beautiful, high quality grape for local markets or home use. Large, loose bunches of large, round, black berries with firm crisp flesh; flavor sweet and rich. A strong growing vine, excellent for the home vineyard or trellis. September.

Sultania Rosea. T. Very similar to Thompson Seedless except in color. Berries are oval, seedless, of medium size, deep coppery red in color, and are borne in large, loose bunches. Dries well; its color makes it a good shipping grape, and for the home vineyard it is excellent. August.

Zabałkanski. A comparatively new red Persian grape of high quality. Very large, slender, elongated berries, coppery red in color, in large loose bunches; very fine flavor. September.

Zante Currant. T. (Black Corinth.) The variety from which the dried currants of commerce are made. Large, compact bunches of very small blue-black seedless berries like currants, very juicy, sweet and richly flavored. Is becoming a commercial crop in California. August.

## Foreign Table, Raisin and Juice Grapes

Under this heading are listed the best known shipping, as well as raisin and juice grapes which are grown on a large commercial scale in the leading grape-growing districts of California.

Each Per 10 Per 100 Price ......\$ .25 \$2.00 \$10.00

Write for prices for 500 or more.

Alicante Bouschet. Medium sized bunches of black berries with sweet, bright red juice. Brings higher prices than any other juice grape. September.

**Black Monukka.** T. A seedless black Persian grape resembling Thompson Seedless in many ways, except that the berries are about one-third larger and have a much improved flavor, being dark red to purplish black when mature. Very large, hoose bunches, borne in great profusion on a vigorous vine. Makes an excellent raisin or shipping grape and is a wonderful early variety for the home table. Early August.

**Cornichon.** T. One of the best late shipping grapes. Berries long and oval, purplish black; skin very thick; bunches long and loose; sweet and of excellent quality. October.

Dattier de Beyrouth. A comparatively new Persian grape which is one of the finest varieties for eating, that can be grown, and also excels for shipping and raisins. Very large, elongated oval, amber berries of exquisite flavor, in large, loose bunches. September.

**Emperor.** T. Bunches large, long and rather loose; berry large, oblong, wine colored, very firm; a very late variety and one of the standard shipping grapes. October.

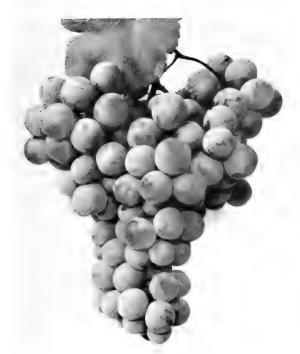

Flame Tokay. One of the leading shipping grapes of California. Berries and bunches very large, red, covered with lilac bloom; flesh firm, crisp and sweet. One of the handsomest grapes in cultivation.

Malaga. A leading shipping variety and one of the finest table grapes. Bunches very large and loose; berries large, oval, yellowish green, with a thick skin and firm, sweet, rich flesh. A very strong grower and a very productive vine. Does best in hot climates.

Mission. T. Berries medium, round, black, sweet; bunches large, loose; an old standard juice grape. Produces a very large tonnage to the acre, and since the grapes bring excellent prices in the Eastern markets, it has been a very profitable variety. August.

MARAVILLE DE MALAGA GRAPE One of the Few Good Red Grapes

#### CONCORD GRAPE Most Famous American Grape

Muscat. The white raisin grape planted so extensively in California; bunches large and loose; berry oval; Mus-cat flavor; one of the richest flavored of all grapes; valuable for raisins and table. September.

Red Emperor. See Emperor.

Sultana. T. Berries small, round, firm and crisp; golden yellow and without seeds; bunches very large and long. Vine vigorous grower and prolific bearer; largely planted for seedless raisins and table fruit. August.

Thompson Seedless, T. Oval, greenish-yellow; as large or larger than Sultana; seedless; thin skinned; good, but not strong flavor; bunches very large. Valu-able for either table use or seedless raisins. Profitable early shipping variety. July.

Zinfandel. Bunches large and compact. Planted extensively in California as a juice grape.

#### **Choice New Varieties**

It is difficult to find new varieties of grapes that surpass the already well known varieties which have been grown for several years in California. Therefore a variety listed as a "Choice New Grape" must have some distinc-tive quality either in the flavor of the fruit or productive-The varieties listed below have been selected from many ness

Write for prices for 500 or more, naming quantity and varieties.

Dizmar. A new grape which has great possibilities as a shipping variety. Large, elongated white berries in medium size bunches; skin very firm; flesh crisp, meaty, very sweet and of excellent quality. Has done well in very sweet and of excellent quality. Has done we the Coachella and Imperial Valleys. Early August.

Flame Muscat. A new grape exactly like the Muscat, Frame Muscat. A new grape exactly like the Muscat, with the same rich flavor and large berries of that famous variety but with bright red berries, the color being intensified in hot weather. It ripens from 3 to 4 weeks later than the Muscat, thus making this wonderful grape available for a much longer season.

Hycales. A very large, early, white grape ripening with Thompson Seedless. The big berries are sweet and juicy and are borne in large compact bunches, and altho the berries are too tender for shipping, its earliness and good quality recommend it for home planting.

Kandahar. A Persian variety of recent introduction; large oval berries, white in color; medium sized bunches; excellent for home use and worth trying as a commercial shipper. July.

Khalili. A new Persian grape which is the very first variety to ripen. White, round berries of excellent flavor, borne in loose bunches. Brought good prices on the borne in loose bunches. Brought good prices on the early market this year, and will be much relished in the home garden as the first grape of the season. June.

home garden as the first grape of the season. June. Maraville de Malaga (Molinera). We firmly believe that this is going to be a wonderful red shipping grape, and for home use it is unexcelled. The berries are large, round and bright red, holding their color even in hot climates, because it ripens quite early. Very firm, sweet flesh with a thick skin. The vine is very vigorous and produces a heavy crop of large, loose bunches. Early Sentember September.

Olivette Blanche. T. Large, long berries, flavor rich and sweet; very firm; bunches compact and large; heavy producer; vigorous grower with abundant foliage; suit-able for trellising. Is acquiring a great reputation as a money-making market grape. Late September.

Ribier. (Gros Guillaume.) T. One of the largest grapes Ribler. (dros Guillaume.) 1. One of the largest grapes grown, and at the same time one of the most handsome. Extremely large, round, perfectly black berries in medium sized bunches, very sweet and rich in flavor. Ripens in September but will stay on vine four to six weeks after-ward. Unexcelled as a home grape and brings very high prices on the market.

## Hardy American Grapes

Each Per 10 Per 100

Price .... Write for prices on quantities, naming quantity and varieties.

All of the following varieties are suitable for arbor or trellis.

Amber Queen. An early American grape with large, richly flavored, juicv berries; dark amber red in color. A heavy bearer. July.

America. The berries are similar to Concord but two weeks earlier, being large and black and of excellent flavor. Fine for arbor or trellis because of its great long vigorous canes and large leaves. August.

Campbell Early. The first American grape in our list to ripen. Large, black, sweet berries in small or medium bunches. July.

Christmas. (New.) A Luther Burbank introduction, similar to the Concord in size, color and flavor, but much later and ripens over a long period. A vigorous grow-ing vine suitable for trellis. October.

**Catawba.** The leading red American grape, of high quality and a very productive bearer. Dull purplish-red in color. A good keeper. September.

In color. A good keeper. September. **Concord.** Undoubtedly the most widely known and popular of all the American grapes. The vine is a healthy, vigorous grower, and being hardy it succeeds where the more tender foreign varieties fail. Color black, covered with thick bluish bloom. In common with all American varieties, the Concord is an extremely fine climbing grape for planting near arbors, fences and large trellies August trellises. August.

**Delaware.** Bunches are small and compact; berries small; light red with a violet bloom; sweet, sugary and vinous with a musky aroma. August.

Isabella. An attractive large, glossy black grape, with thick skin and a musky flavor. A very vigorous grower with large leaves. September.

Niagara. The standard American green grape, holding the same rank among green kinds that Concord holds in the blacks. Berries large, pale-yellow with white bloom; flesh tender, sweet and juicy. Very productive. August.

**Pierce.** (California Concord.) Extremely large, sweet and of vigorous growth and very prolific; an esteemed market variety. August.

Worden. Similar to Concord in shape and flavor but larger, ten days earlier, but does not keep as well. Early August.

#### **Grafted Grapes**

There are certain regions in which grape vines become infested with Phylloxera on the roots. This may be overcome by planting vines grafted on resistant stock. We are able to furnish a limited number of vines of the varieties named below, grafted on Rupestris St. George, which is a Phylloxera resistant root, and we recommend planting these in infested regions.

# **Select Berry Fruits**

This section includes the Loganberry and varieties of Blackberries, Raspberries, Dewberries, Strawberries, Currants and Gooseberries which are best adapted to conditions on the Pacific Coast. In California where the climatic conditions force almost a continuous growth and intermittent cropping, the growing of berries for the market produces profitable returns.

"Grow Your Own Berries" is a slogan worthy of the attention of every person who has even a small piece of ground, for it is an easy matter to grow good crops of delicious berries in a small space or between the rows of garden trees. Berry growing is interesting and the time spent in cultivating and watering is a pleasure.

This is frequently overlooked with the result that ber-ries are not served as often or as fresh as they should be. In a few minutes one may pick sufficient berries for breakfast, lunch, or dinner, fresh from the vines with all the rich flavor and healthful juices they contain.

#### **Raspberries**

Less than 10 of a variety at each rate; 50 at 100 rate.

Each Per 10 Per 100 Price—Strong plants......\$ 25 \$2.00 \$12.50 Black Cap Raspberry "King of the Cliff." An excellent black cap; large berries; a vigorous grower. Not so dry

black cap; large bernies; a vigorous grower. Not so ary and seedy as most black caps. Does well in California. St. Regis Raspberry. The "early till late" variety. The earliest red raspberry. It not only ripens early, but produces good crops throughout the season. Berries of large size and surpassing quality; rich and sugary and with full raspberry flavor. A strong grower.

#### La France

#### Giant Everbearing Red Raspberry

Big, Rich, Sweet Juicy Berries from June Until November

Each Per 10 Per 100 Transplanted plants.....

This new Raspberry has been thoroughly tested in various parts of the country, and for several years in our own testing grounds near Ontario. So far it has proven to be all the originators claim for it. The bush is a remarkable grower, rapid, vigorous, often reaching a height of eight feet. The canes are large and strong with few spines, and branch freely, adding to their productivity.

productivity.

productivity. The berries are firm, much larger than other rasp-berries; richly delicious in flavor; the late crops are heavier than the earlier, and the size of the berries is the same from early to late. The La France is all berry —not all seeds. The berries are borne in long clusters where throughout the season may be seen buds, blooms, green berries, and ripe fruit in great abundance. The two most striking characteristics of La France

The two most striking characteristics of La France are the enormous size of the berries and the extreme length of the bearing season. A raspberry from which one may gather large crops of berries for Thanksgiving and even later is beyond question an extremely valuable plant to have in the home garden; and, when out of a La France test shipment of various varieties of Raspberries sent to New York from California, the La France came through in better shape than any other, it seems to show that it is not only the finest berrv for the home garden, but for commercial culture as well.

MAMMOTH THORNLESS BLACKBERRY The Best of All Blackberries

# The Rose Garden

The rose is the Queen of all flowers and since it flourishes and produces its beautiful blooms anywhere in America, it should be universally grown. There are thousands of rose varieties varying of course, in desirability, but in the list which we offer, only the very best will be found, among them the best of the recent introductions. We take great pride in the strength and quality of our rose bushes, and give them the utmost care and skillful nursery culture.

The abbreviations following the varietal names refer to the botanical classification to which each belongs, and these classes are briefly described below.

HYBRID TEA. (H. T.) The everblooming roses, so called because they bloom all through the spring, summer and fall. The majority of the best roses belong to this group, which embraces almost every color, and includes double, semi-double, and single varieties. They are hardly ever without bloom, require only ordinary attention, and do particularly well on the Pacific Coast, although winter protection must be provided in eastern U. S.

TEA. (T.) Also everblooming, but are not quite so hardy as the Hybrid Teas and are often of more spread-ing, lower growth. Some of the best of the older roses belong to this class.

PERNETIANA. (PER.) A comparatively new group in which are included many of the finest recent introduc-tions. Produced by crossing the Hybrid Teas with the Austrian Briars and named after Mons. Pernet-Ducher, the famous French hybridizer. They resemble the Hybrid Teas in general characteristics but have deep green, leath-ery foliage and range through many novel and beautiful tints of yellow, salmon, orange, and copper.

POLYANTHA. (Poly.) Hardy, dwarf roses, producing continuously large clusters of miniature blooms. Suit-able for hedges or borders and also have their place in

a general rose planting. Still another class, the Hybrid Perpetuals, we have listed separately on page 33.

See Planting and Cultural directions for the Rose on page 63.

## Seven Select New Roses

#### Price \$1.50 Each

Price \$1.50 Lacn Betty Uprichard. H. T. A most charming new semi-double decorative rose with copper-red buds opening to lovely bi-colored flowers, soft salmon pink on the inner surface of the petals and glowing orange-carmine on the outside. The plant is tall and erect, and the flowers are borne on long stems. The blooms are thin and open quickly in the hot weather, but its superb coloring should wip it a place in every rose garden. win it a place in every rose garden.

win it a place in every rose garden. Imperial Potentate. H. T. A promising new rose from the Pacific Northwest, dark shining rose-pink in color, very double with firm heavy petals. Most of the newer roses lack fragrance but this variety possesses a delicious fragrance. Not a new color but a very satisfactory rose. Lady Inchiquin. H. T. A decidedly unique and original new color in roses. Large, full, perfectly formed buds and flowers of glowing orange cerise. Plant of moderate bushy growth with excellent foliage, blooming contin-uously.

Padre. H. T. An extremely effective rose, rapidly becoming popular. The color, rich, copper scarlet, is darker and more intense than that of Mme. Ed. Herriott The flowers are semi-double, borne on long straight stems on a very tall, erect bush, and while they tend to hang their heads when cut, the remarkable color and freedom of bloom make Padre an exceptionally fine bedding rose.

Rev. F. Page Roberts. H. T. An excellent new addi-tion to the yellow roses, quite different from any other variety. The inner face of the petals is a soft buff yellow and the reverse a rich salmon. The flowers are large and very double, being at their best in the autumn. The plant is low and spreading with mildew-proof foliage.

Sunstar, H. T. An attractive novelty of variable coloring, usually lemon yellow, every petal edged, veined and splashed with rose and vermillion. The flowers are not very full and they open and fade quickly, but in cool weather they are magnificent. Plant low and bushy.

PADRE A Wonderful New Copper Scarlet

Armstrong Nurseries (.....

The Queen Alexandra. Per. An astonishing and daz-zling flower of intense vermillion red, shaded old gold. The plant is medium size, much branched, with beautiful deep glossy green foliage, and is a true perpetual bloomer. The flowers are rather rough but are large and full and the color combination is startling indeed.

#### Golden Emblem

## Price \$1.00 Each, \$9.00 Per 10

Price \$1.00 Each, \$9.00 Per 10 Golden Emblem. Per. Thruout the entire season this magnificent rose draws more attention than any other in our rose fields. The lovely long buds of golden yellow are beautifully tinted with crimson on the outer petals, the colorings changing with weather conditions but offering a delightful contrast at all times. Opens to a full golden yellow flower. The glossy green foli-age is particularly fine, does not mildew, and the buds are borne on long stiff stems above the strong grow-ing, vigorous bushes. The blooms are produced freely and continuously, even under adverse conditions. A unique and striking variety, certain to delight all rose lovers.

# Select Varieties Recently Introduced

#### Price \$1.00 Each, \$9.00 Per 10

Ten assorted Roses of any class sold at the ten rate wherever a ten rate is quoted.

America, H. T. A new American production which has shown up remarkably well in our rose fields. The flowers are large, sweetly scented, and deep rose pink in color, holding their beautiful shape throughout the life of the flower. Has deep glossy green foliage, long stems, is quite vigorous, and a free bloomer.

Chatillon Rose. Poly. The best new Baby Rose intro-duced in years. The flowers are bright pink, semi-double, and borne in gigantic clusters on a vigorous healthy bush. About 18 inches high, a continuous mass of bloom.

Per. Constance. A very attractive and distinctive variety, producing beautiful orange-yellow buds profusely streaked with crimson, opening to full globular flowers of various shades of yellow. A richly colored rose which blooms profusely and is becoming very popular in Cali-fornia as well as other sections.

Etoile de Feu. Per. Has large cupped flowers of flam-ing orange, quite solid and full. Resembles Louise Cath-erine Breslau in form and has the same beautiful glisten-ing foliage of that variety, but is much more fiery in color. Plant low and spreading.

LULU The Dainty Buds are the Longest Among Roses

GOLDEN EMBLEM Just Imagine These Buds to be a Rich Golden Yellow, the Petals Edged with Crimson

Golden Ophelia. H. T. An excellent new seedling of Ophelia. The flower is of medium size, deep golden yel-low in the center, paling slightly toward the outer petals; of perfect symmetrical form, and the plant is a sturdy stiff-stemmed grower. One of the finest yellow roses for cutting.

Grande Duchesse Marie-Adelaide. H. T. A delightful variety producing beautifully shaped long buds in a very rich color combination, bright coppery yellow shaded orange and pink. A tall growing bush with the flowers on long willowy stems.

Hawmark Crimson. H. T. A new variety which is easily the finest dark red decorative rose. The color is deep intense crimson, with marcon markings, becoming a shade lighter as the large, almost single flowers open. The blooms last a long time and the sturdy bush is a continuous more of animers. continuous mass of crimson.

Hortulanus Budde. Per. A Dutch rose of recent in-troduction. Dark glowing red, with long tight beautiful buds, opening to a semi-double flower with bright golden stamens in the center. A very strong growing bush and a very free bloomer.

Independence Day. Per. Another new combination of the shades which are now so popular in roses, yellow, copper and orange. The flowers are thin and they open and fade quickly, but the bush is never without bloom. The bush is strong, upright and heavily branched.

Isobel. Per. The largest of all the single Irish Roses, and the best in color. The long bud is orange-carmine and in dull weather the open flower is the same rich shade, fading to a clear coral-pink in the sun, yellow at the base of the petals. Bush grows tall and willowy and flowers have very long stems.

Lafayette. Poly. A bright colored new Baby rose, of a light cherry red color, the individual flowers being larger than usual in this type, and borne in large loose clusters. The Polyantha roses are invaluable for massing in the garden, as they make a bright spot of color during the entire season.

Lulu. H. T. A new English rose with dainty, extremely Lulu. H. I. A new English rose with dainty, extremely long and slender buds of coral apricot. The petals of the buds do not come to a point, as in the case of most roses but flare out slightly at the end, and we do not believe there is a rose more exquisitely formed in the bud stage than this variety, although it opens to a rather single flower. Blooms freely and continuously on a healthy vigorous bush.

Mrs. H. R. Darlington. H. T. There are very few good white roses and therefore we welcome this new rose which is creamy white, occasionally shaded lemon in the bud. The flowers are of enormous size, of excellent form, and are borne on long stems.

#### SOUVENIR DE GEORGES PERNET A Glorious New Rose of Enormous Size

Mrs. J. C. Ainsworth. H. T. A big pale pink rose with full, well formed flowers, intensely fragrant, and borne in great profusion. The foliage is bold and heavy and the stems stiff and erect, excellent qualities which are lacking in many new roses.

Mrs. Redford. Per. The rich, bright apricot-orange color which this new rose possesses will make many friends for it, and we can heartily recommend it. The buds are ovoid, with somewhat reflexed petals and of beautiful form. Of strong growth, a free bloomer, and mildew-proof foliage.

Mrs. W. C. Egan. H. T. This variety was probably the best light colored pink rose in our field during the past summer. A strong, vigorous grower, bearing continuously on long stems, its long pointed buds of absolutely perfect shape, the color being a beautiful soft shade of light pink shading to flesh. The buds last for an unusually long time after cutting and open to perfect flowers.

Mme, Butterfly. H. T. This new and splendid sport of Ophelia resembles its popular parent in general characteristics but has much deeper shadings of apricot and gold on a background of brilliant pink, and we find it to be a stronger grower and to produce more and larger flowers than Ophelia when grown outside. The plant is very vigorous and fine in habit.

Very vigorous and fine in habit. Modesty. H. T. This rose was introduced several years ago and should be much more widely planted. It has the longest, largest, and most perfectly formed buds of any rose we grow, the color being pearly cream, flushed rose. The plant is of medium size, very free flowering.

**President Wilson.** A tall growing free-branching rose with lovely flowers of a very bright shade of shrimp pink, produced on long stems, often several in a cluster. The buds are of beautiful form and the flowers are loose and open.

Rose Marie. H. T. This is a variety which comes close to being the ideal pink garden rose, and undisputably one of the finest roses for bedding and cutting. A perfectly formed flower, dark rose-pink, with beautifully veined petals, and a rich sweet perfume. An exceedingly free bloomer with long stems and foliage which does not mildew. A cross between Hoosier Beauty and Sunburst and has all the satisfying qualities of both.

Sensation. H. T. Good new red roses have been scarce, but this variety has shown up well since we have tried it. Great large buds of scarlet crimson shaded at times with maroon and with a rich sheen, opening out beautifully to very double flowers and lasting well when cut. The flowers tend to fade at intervals and the foliage mildews somewhat, but in spite of these faults it is well worth growing. The bush is more vigorous and free branching than any other red rose we grow. Shot Silk. H. T. The general color effect in this new variety is a delicate salmon rose but the flowers are often flushed and overshot with orange and cerise while the base of the petal is yellow. The bush is low and free branching with beautiful clear, cedar green foliage. The blooms open and fade quickly but are quite fragrant and the coloring is unique.

Souvenir de Claudius Pernet. Per. The yellowest of all roses, sent out of Europe as the finest yellow rose ever produced on that continent. A vigorous, erect grower with extremely beautiful bright green foliage and few thorns, producing many exquisite buds on long stiff stems. The flowers are large and full, of a clear unfading sunflower yellow with no other tints whatever. This color was unknown in roses until the recent introduction of this variety.

Souvenir de Georges Pernet. Per. This is a rose of astonishing size and astonishing beauty. The large globular buds open to enormous flowers of a glorious deep orange-pink, which are quite fragrant and last a long time after cutting. The bush is a spreading, branching grower with many thorns, resistant to mildew, and the flowers are produced in great abundance. This and the preceding variety were named by the famous French hybridizer Pernet-Ducher, after his two sons who lost their lives in the World War.

Souvenir de H. A. Verschuren. H. T. A new rose from Holland, saffron-yellow deepening to golden-orange in the center of the bud. Every bud is perfect in form, very double, and borne on stiff, heavy stems. A moderate grower with few thorns and healthy foliage. A variety which will remain with the finest yellow roses.

Una Wallace. H. T. A new pink variety with a color shade quite distinct from any other rose, being a beautiful, soft cherry-rose, without any other shading. It has proved to be one of the strongest growers and freest bloomers of the flower, and the character of the foliage are all excellent; possesses a very sweet perfume.

Vesuvius. H. T. The best dark colored single rose. Bright scarlet crimson with a golden center. Has five, firm outstanding petals, is sweetly fragrant, and the flowers last for several days when cut. A tall, free blooming bush.

White Ophelia. H. T. Beautifully formed buds of ivory white, very similar to Ophelia in shape but the cream colored open flowers are more single. A very refined rose, excellent for cutting in the bud form.

Wm. F. Dreer. Per. This beautiful rose which has become exceedingly popular since its introduction in 1921, comes closer to possessing pure pastel shades than any other variety, displaying beautiful color combinations of shell pink, orange and golden yellow, as the long pointed buds open into full, well-shaped blooms. Has the same parentage as Los Angeles and closely resembles that variety in everything except color.

MRS. W. C. EGAN A New Light Pink, the Best of its Color

# Select Better Known Varieties

Price 75c Each, \$6.50 per 10

**Columbia.** H. T. A standard variety in many sections of the country, and in cooler locations is a very beautiful garden rose. Exceptionally free blooming; a pleasing shade of rose-pink in color; delightfully fragrant. Its great fault is the tendency of the flowers to be crippled in unfavorable weather.

Chateau de Clos Vogeot. H. T. The darkest red rose, dark velvety crimson shaded black and scarlet. The flowers are rough and shapeless and the bush is low and sprawling but the intense fragrance and deep color recommend it.

Crusader. H. T. A very large, very double rose; in color rich dark velvety crimson, the blooms coming on long, straight, vigorous stems. The plant is not large but the foliage is good and is mildew-proof. The rose is liable to fade in hot weather.

Etoile Luisant (Baby Herriott). Poly. A beautiful little baby rose with miniature buds of the same shape and form as Cecil Brunner, but the color is rich coppery orange similar to Mme. Ed Herriott. The bush is dwarf, compact, and free blooming.

Frank W. Dunlop. H. T. This brilliant rose-pink variety of Canadian origin has taken a leading place among pink roses because of its beautiful clear color and its tall, strong growing habit and continuous blooming qualities. The flowers are on long stiff stems and are excellent for cutting. Liable to mildew in foggy weather.

H. V. Machin. H. T. A red rose that is unbeatable when just right. It does not bloom continuously, producing several crops of flowers during the summer, and the flowers are not always perfect, but it always provides some wonderful, great large full flowers of an exceedingly rich red on long stiff stems and is well worth while for this reason.

Hoosier Beauty. H. T. An intense rich dazzling scarlet with darker shadings, and acknowledged to be one of the best and most highly colored red roses. the beautifully formed flowers have a texture like velvet and possess a delicious fragrance. The plants are never without flowers in the blooming season and the blooms never fade or turn blue. Of all the red roses this variety should be selected first.

Irish Fire Flame. H. T. A beautiful single-flowering variety. The buds are wonderfully rich in coloring; a rich deep orange, splashed with crimson, opening to a large single flower of satiny old gold. The best of its type.

HOOSIER BEAUTY Rich, Velvety Scarlet and Deliciously Fragrant

#### LOS ANGELES The Famous California Rose

K. of K. (Kitchener of Khartoum.) H. T. An intensely brilliant scarlet rose with a velvety sheen, named after the late Lord Kitchener of England. The flowers are semi-double with recurved petals, intensely fragrant and are wonderful for cut flowers, the dazzling color being intensified under artificial light.

Lady Battersea. H. T. A charming rose with long graceful buds of unusual coloring; rich cherry-red shading to rose-pink, very full and pointed and blooming continuously. Its only fault is the rather weak growth of the bush.

Los Angeles. Per. This is the ideal American garden rose, one of the finest varieties ever introduced. A California product, and in color emblematical of the Golden West, it has gained international recognition as the peak of excellence in the rose, and its universal popularity has been enhanced by its remarkable adaptation to all climates, from the temperate conditions of California to the more severe climate of other regions. Quite distinct in color, which is a glorious rich flamepink, shaded golden yellow. A rose for everybody, everywhere.

Lady Hillingdon. T. Beautiful long buds opening into cup-shaped flowers of golden yellow with no other shades. One of the best known and most dependable of yellow roses.

Louise Catherine Breslau. Per. A novel and distinct shade among roses; buds coral red in color opening to cup-shaped flowers of salmon orange, shading to various degrees of pink, orange and copper. The bush is low, compact and many branched.

**Mrs. Aaron Ward.** H. T. A most delightful rose with its frilled petals and exquisite color, soft tawny golden yellow in cool weather and salmon yellow in sunny weather. Flowers are small but perfectly formed, and the bush is low and bushy and immune to disease.

Mrs. Chas. Bell. H. T. A rose of the same type as Radiance, but an even stronger grower, and the flowers are a soft shade of shell pink with salmon background. A constant bloomer unaffected by weather conditions which is becoming as popular as its parent.

Mrs. Charles Russell. H. T. One of the finest pink roses for cut flowers, as the blooms are freely produced, are large and full, on long heavy stems with good foliage, and keep for days after cutting. A beautiful shade of rosy carmine, and a highly recommended garden rose.

Mrs. Prentiss Nichols. H. T. A brilliant deep pink rose of very large size and very double. Some of the most striking features of this variety are the very strong growth of the bush, the large, rich green, heavy foliage of leathery texture and the long stiff stem on which the flowers are borne. A very beautiful rose.

Mrs. S. K. Rindge. Per. A magnificent California rose, pure golden yellow in color, the outside petals in the bud sometimes stained with cadmium red. The petals do not fade as the flowers age, but become suffused with a beau-tiful soft pink shade, creating a striking effect. A very strong grower with large leathery foliage. A fine garden rose, its main fault being that the blooms hang their heade heads.

Mme. Edouard Herriott. Per. This vivid rose always catches and holds the eye first no matter what other roses are present. Its red hot copper shade in the bud and the softer coral tint of the open flower are probably the most sensational colorings produced in any rose. Won a \$5000 prize offered by the "Daily Mail" of London, and has been famous ever since. The stems are some-timer wash and the buck is roser therem. times weak and the bush is very thorny, but it is indis-

times weak and the bush is very thorny, but it is indis-pensable in every rose collection. Miss Lolita Armour. Per. When the flowers open just right this variety produces blooms of a marvelous com-bination of colors—coral, gold and copper, and is worth planting for this reason. However, the globular flowers have a weak neck and good blooms are often few.

**Ophelia.** H. T. In cool weather this rose which has long been considered to have the ideally formed rose bud, is salmon flesh with tints of darker pink and gold. In hot weather it is creamy-white. Not a free bloomer, but exquisite when the blooms do come and well worth growing for its delicious fragrance alone.

Sunburst. H. T. Color intense shade of golden orange and yellow, brilliant in effect; buds large and well formed; produced on long stems. Its name typifies its glorious colorings which are unapproachable.

Willowmere. Per. A big handsome rose of rich shrimp pink, showing a suffusion of yellow in the center. A heavy, stocky, thorny bush which should be pruned less than most roses. Produces a succession of fine blooms.

# **General Collection**

#### Price 50c Each, \$4.00 Per 10

Edward Mawley. H. T. A big, bold, handsome rose of very dark crimson with enormous petals. Its great buds open out to cup shaped flowers, larger than any other red rose, but with all their size not a bit coarse. A tall grower.

**Cecile Brunner.** Poly. The miniature flowers of this variety, rosy pink shaded with salmon, usually borne in large open clusters, fill a niche which no other rose can occupy. They are unique and exceedingly attractive.

**Etoile de France.** H. T. The flowers do not open well in all sections, but it is one of the best varieties for the Imperial Valley and Arizona. Rich shades of red and velvety crimson.

K. A. VICTORIA **Big Ivory White Flowers Freely Produced** 

MME. EDOUARD HERRIOTT Sensational Copper Colorings

Florence Pemberton, H. T. For cut flowers, this is one of the most satisfactory roses among the lighter shades, on account of the thriftiness of the bush and the long, upright flower stems; color, creamy white suf-fused with pink; large bud, perfect in form, with high pointed center.

Francis Scott Key. H. T. A large, very full, globular bud of rose red, the petals becoming silvery as the flower opens. With its big round buds and very double open red flowers, full of broad curled petals it is a handrose, but sometimes fails to open well in hot some weather.

General McArthur. H. T. Bright red, with flat open blooms, very sweetly scented. Blooms well on a strong bush and is particularly fine in early spring and late autumn. For a long time the best red rose, still good.

Hadley. H. T. A brilliant rich crimson rose, which with its vigorous growth, long stems, mildew-proof foliage, full blooms and rich fragrance is close to the top in red roses. Fades somewhat in hot weather.

Gruss an Teplitz. H. T. An old favorite red rose, always covered with its cherry bright crimson flowers, which often cover the plant, and which are intensely fragrant with the rich rose perfume that so many new roses lack. A very large bush and very hardy.

Harry Kirke. T. Color deep sulphur-yellow, passing to a lighter shade at the edges of the petals. The buds are long and gracefully formed. Plant is of free branch-ing habit, blooming continuously.

Jonkheer J. L. Mock. H. T. One of the best bedding and cutting varieties. The flowers produced with the greatest freedom on long stiff stems and of large size and perfect form; a deep imperial pink in color, the out-side of the petals being silvery rose white.

**K. A. Victoria.** H. T. Pure ivory white; producing quantities of beautiful buds and full flowers. Probably the best white rose for California because it blooms so freely and continuously.

Lady Alice Stanley. H. T. A large rose borne on stiff, stocky stems; flesh pink shaded with coral. Broad, healthy foliage; a fine rose for cutting. Lady Ashtown. H. T. We have found no rose in its class and color that excels this superb variety. Beauti-ful shade of rose pink; exquisite form; most satisfactory and lasting for cutting; grows strong and blooms freely.

Lady Ursula. H. T. The color is a beautiful shade of light pink; of good form and substance; petals large, shell-like and delicately perfumed. A remarkably strong, upright, disease resistant bush; the easiest rose to grow that we know of.

Laurent Carle. H. T. Brilliant velvety carmine; good size; perfectly formed; carried on good stems; opens freely; a really good rose.

HADLEY A Standard, Sweet-scented Crimson Rose

Mary, Countess of Ilchester. H. T. A standard garden rose of deep rose-pink, with large double cupped flowers, quite fragrant and borne on a tall, strong growing bush.

Mme, Abel Chatenay. H. T. A beautiful creamy rose color, shaded with rose vermillion and tinged with salmon; the flowers are borne on long stems.

Maman Cochet. T. A popular old Tea rose, carmine-pink with a white center, large and extremely double, borne on a very large bush producing hundreds of flowers in a season.

Miss Cynthia Forde. H. T. Deep brilliant rose-pink in color, the blooms being large, full and sweetly per-fumed. The plant is one of the strongest growers among roses, and is never without blooms. Mme. Caroline Testout, H. T. Color clear bright sat-iny pink; very fragrant; flowers large and showy.

Mme. Jenny Gillemot. H. T. One of the strongest growers of all yellow roses; buds are long and pointed, of a deep saffron yellow, opening into canary yellow; nice for cutting, having good stems.

Mme. Jules Grolez, H. T. It is an exceedingly free bloomer with large, well formed flowers, the color of which is deep cherry-red or Chinese-pink. A low com-pact bush with beautiful foliage. A fine bedder, but not near other red roses, as the color clashes.

Mme. Leon Pain. H. T. Entirely distinct in color, a silvery salmon, shaded orange yellow in the center, the reverse of the petals being a salmon pink. Flowers very full and the large bush is very free flowering.

Mme. Segond Weber. H. T. A magnificent rose; buds rge, of a light rosy salmon color. Long pointed buds large, of of perfect form, expanding to a flower of unusual size.

Mrs. Arthur Robert Waddell. H. T. A delightfully refined rose with bronzy foliage; large, open flowers of deep apricot color; buds long and pointed; of delicate apricot fragrance; constant bloomer

Mrs. George Shawyer. T. One of the best pink roses for cutting; color a bright peach-pink; buds long and well formed; carried on very long stems.

Mrs. Wakefield Christie-Miller. H. T. Large, globular peony-flowered blooms of light pearly pink, shaded sal-mon, darker on the outside of the petals. A free bloomer and a most excellent bedding variety.

and a most excellent bedding variety. **Premier.** H. T. An excellent all-round rose for bed-ding or cutting, with big, perfectly formed flowers of rose-pink; ample foliage and delicious fragrance. Very stiff stems, almost thornless. Does best in the cooler sections where the flowers open out better. **Ragged Robin.** A very constant, free blooming rose with semi-double rosy crimson flowers. Of no value except for hedges where it makes a showy row of color. \$25.00 per 100.

**Radiance.** H. T. This rose will probably produce more first class blooms to the plant than any other variety. and is exceedingly vigorous, hardy, and disease resistant, under all conditions. A lovely light silvery pink in color with suffusion of a deeper color. Is one of the best half dozen roses in America.

Red Radiance. H. T. Similar in growth to Pink Radi-ance but has big, bold cerise-red flowers which are borne on long heavy stems. Does best in cooler weather but is a good rose almost anywhere. White Maman Cochet. T. Similar to Maman Cochet

but white, flushed with pink on the outer petals. large, full and fragrant. Verv

### Hybrid Perpetual Varieties

Price 50c Each, \$4.00 Per 10

This class of roses is very hardy with tall vigorous bushes and large clean foliage. The blooms are larger, fuller and sweeter than any other roses. As a rule they bloom only in the spring, but during this season of the year they offer a greater show than any other class and the bushes are covered with the giant, fragrant, old-fash-ioned flowers. They are not to be highly recommended for most of California, but do particularly well in the Imperial Valley and Arizona.

American Beauty. Very large blooms of rosy-carmine veined with crimson. Does particularly well in the Imperial Valley and Arizona, but of no value on the coast. Clio. H. P. Large, fragrant, globular flowers of flesh-pink, deepening in the center to rosy pink. A strong grower and one of the best spring blooming roses of its color.

**Frau Karl Druschki.** H. P. The only absolutely pure white rose, with immense long buds and very double flowers, wax-like in texture. Hardy everywhere, with the typical long upright growth and heavy foliage of its class. Blooms during spring, summer and fall.

Mrs. John Laing. Immense blooms of soft, clear pink, very fragrant on stiff, stock stems. Produces a longer succession of blooms than most of its class and the bush is not quite so tall and rampant.

Paul Neyron. H. P. The largest rose in cultivation; a handsome upright grower, producing an immense flower at the end of every long stiff stem; color, a deep rose-pink. Great size and sweet fragrance are its strong points.

Ulrich Brunner. One of the grandest hardy roses, buried in spring under great big blooms of cherry-crim-son. The flowers open well everywhere, are intensely fragrant, come on long stems and are wonderful for cutting.

RADIANCE Silvery Light Pink

**CECILE BRUNNER** Baby Pink Rose, Good as Bush or Climber

### New and Scarce Climbing Roses

#### Price \$1.50 each

**Black Boy.** H. T. A new climber from Australia which we believe is one of the finest red climbing roses. The blooms are large, quite double, very fragrant and are deep velvety crimson, shaded blackish maroon and scar-let. The plant is a tall rampant climber and the blooms are excellent for cutting, as they are on long stiff stems.

**Cl. Los Angeles.** Per. The Los Angeles rose is now one of the most popular bush roses grown. Here is exactly the same rose in a strong vigorous climber. The glorious flame pink color, and the freedom of bloom are just as marked as in the bush variety.

**Cl. Mme Edouard Herriott.** Per. A climbing rose with the sensational coppery coloring of Mme. Edouard Her-riott has been wanted for some time and now we have it. The flowers are produced in profusion all during the summer and are just as bright in color and even better in shape than the bush, while the bush is a true climber with long vigorous shoots.

Jacotte. H. W. A new spring blooming hardy climber with the sensational coloring found in many of the new bush roses—coppery salmon, tinted red and yellow. A strong grower with beautiful glossy, holly-like foliage.

### **Climbing Roses**

#### Price 50c each, \$4.00 per 10

Ten assorted Roses of any class sold at the ten rate wherever a ten rate is quoted.

Belle of Portugal. A beautiful new climber, producing extremely large flowers of a delicate soft pink color, tinged with salmon. The long, well shaped buds are often 3 inches and more in length. A very vigorous grower which will soon cover pergola, fence, or porch, and exceedingly floriferous, being a mass of blooms from January to June in California.

Cherokee White. Produces great masses of waxy-white single flowers in the spring and is much used for cover-ing fences, buildings, etc., where a large surface is to be covered. The foliage is a bright shining green at all times covered. The fol during the year.

Cherokee Double White. Similar in form and habit to the White Cherokee but with double flowers.

Cherokee Pink. Differs from the others of this type only in the color of the flowers, which are a bright rose-pink, offering a pleasant contrist to the center of golden stamens.

Cherokee Red. It has all the desirable features of the which holds the year around—and vigor of growth. The color of the inside of the petals is a beautiful shining foliage— the outside is a lighter shade. Charmingly effective for pergolas, clinging on fences and arbors, and for cover-ing banks and terraces.

growing climbing roses; flowers identical with the well-known bush variety.

Climbing Belle Siebrecht. H. T. The flowers are large, exceedingly graceful, full and double; buds long and pointed; color is a brilliant rich, deep pink.

Cl. General McArthur. H. T. A true sport from the popular bush variety possessing the same bright scarlet crimson shade. Climbs vigorously and satisfies the de-mand for a bright red everblooming climbing rose.

**Cl. Gruss an Teplitz.** H. T. The counterpart of the favorite bright red bush rose, blooming with great freedom in the early spring and moderately thereafter. Quite hardy.

Cl. Lady Hillingdon. T. Identical with the dwarf variety except for its vigorous climbing habit and since there are only too few good yellow climbers it is a welcome addition.

Cl. Mme. Caroline Testout. H. T. A strong growing climber which produces even more and larger flowers than the bush of the same name, but with the same color, a soft, warm, satiny pink.

Cl. Mrs. Geo. Shawyer. H. T. A true peach pink rose like the bush form, deservedly popular as a light colored climber.

Cl. Hoosier Beauty. H. T. Like the bush form in all respects except for its vigorous climbing habit. Rich velvety scarlet.

Climbing Lady Ashtown. H. T. As a climber, this variety is simply enlarged in its attractiveness, for few pink roses are its equal. A good strong grower. Climbing Maman Cochet. T. Identical with the well-known bush variety, but with a strong climbing habit; clear rich nink

clear, rich pink.

**Cl. Ophelia.** H. T. A new climbing sport of the popu-lar Ophelia. A little lighter in color than its parent, being a rich pinkish cream, but with the same exquisite form of the bud and free blooming qualities.

Climbing Sunburst. H. T. A vigorous sport of the popular bush rose, and bearing continuously large, deep, golden-yellow buds. A fine strong-growing yellow climber.

CHEROKEE ROSES Make a Marvelous Display of Bloom in Springtime

Climbing White Maman Cochet. T. Identical with the well-known White Maman Cochet bush rose, with the addition of its climbing habit.

**Climbing Yellow Cecile Brunner.** Polyantha. A sport from the well-known Cecile Brunner. The flowers are the same except that they are an apricot yellow instead of pink.

Dr. Van Fleet. H. P. A beautiful hardy climber which will grow almost anywhere, rampantly vigorous in growth and producing in the early spring great quantities of pure light pink roses of the color of apple blossoms, on long individual stems.

**Dorothy Perkins.** Wich. A hardy, vigorous spring blooming climber which is always dependable for porches, pergolas or for trailing on banks. Great clusters of small, very double, shell-pink flowers.

**Gold of Ophir.** Noisette. Nasturtium yellow, suffused with coppery red; one of the most beautiful of the climbing roses, covered in spring with flowers in the greatest profusion; of strongest growth.

Marechal Neil. T. Long a favorite climber, this superb old lemon yellow variety with its large globular, highly perfumed blooms, still remains deservedly popular.

Mrs. Robert Peary. (Climbing K. A. Victoria.) H. T. A grand white climbing rose; large, deep and double; it is the strongest growing, freest blooming and most satisfactory of the white climbing roses.

Paul's Scarlet Climber. This wonderful new climbing rose possesses a brilliancy of color unequaled in any other variety. The flowers are an intense vivid scarlet, semi-double and are very freely produced in clusters of from 3 to 20 blooms on long much branched canes, the plant being a mass of color from top to bottom. The flowers do not fade but maintain their color until the petals fall. It is a strong grower and for pergolas, pillars, or other purposes there is nothing to compare with it for striking effect. A solid mass of bloom for a long period in the spring.

Silver Moon. One of the most exquisite of climbers with gigantic, single, saucer-shaped blooms of pure white, borne in sprays. The plant is of extraordinary vigor, growing 15 to 20 feet in one season. Spring blooming only.

CLIMBING K. A. VICTORIA A Vigorous White Everblooming Climber

CLIMBING MAMAN COCHET A Climber Providing Excellent Cut Flowers

### **Tree-shaped Roses**

Standard or Tree-shaped roses differ from ordinary bush roses in that they are budded into a stalk of some strong growing variety at a height of  $3\frac{1}{2}$  feet from the ground, forming a bushy head at the top of a long stem. We use only vigorous varieties which make a large compact head.

#### Price \$2.50 Each

General McArthur, red Golden Emblem, yellow. Los Angeles, flame pink. Mrs. Geo. Shawyer, light pink. Rose Marie, rose pink. Sensation, crimson.

#### **Two Color Tree Roses**

Price \$3.00 Each

Two of the following three varieties on one tree: Golden Emblem, yellow; Hoosier Beauty, scarlet; Rose Marie, pink.

Two of the following three varieties on one tree: Sensation, crimson; Los Angeles, flame pink; K. A. Victoria, white.

### **Three Color Tree Roses**

#### Price \$3.50 Each

Tree-shaped roses with three colors blooming thereon are an exceedingly unique and ornamental addition to the home grounds and garden, and offer a beautiful blending of colors. We have selected for this combination, colors which are harmonious and the varieties are of similar habit of growth so that a uniform, well-shaped head is produced. We have two different combinations, each made up of three varieties.

#### **First Combination**

Golden Emblem, yellow; Hoosier Beauty, scarlet; Rose Marie, pink.

#### Second Combination

Sensation, crimson; Los Angeles, flame pink; K. A. Victoria, white.

# **Ornamental Planning Service**

### Our Plan to Provide a Beautiful Setting for Your Home

You want your home and grounds to be inviting, pleas-You want your home and grounds to be inviting, pleas-ing and attractive in appearance, a place in which you will enjoy living and to which you will be proud to bring your friends. Only by an attractive and harmonious planting of properly placed ornamental trees, shrubs and flowering plants, can the exterior of your home assume the aspect which you wish it to have. The well-known slogan, "It's Not a Home Until It's Planted," has a marked significance in California because in our favor-able climate it is extremely easy to provide a wealth of green foliage and beautiful flowers as a setting for our domiciles. domiciles.

domiciles. But you may have the thought that the cost of such a planting is more than you can afford and you may not be familiar with the kinds of plants suitable for your prem-ises, or you may have your place partially planted and cannot decide what additions to make. It is easy enough to buy a few olants and put them in the ground, but obtaining a satisfying harmony between them is the result only of careful planning. The color effects, the ultimate size of plants, the adaptation of certain species to direct sun, shade and extremes of temperature are all factors to be considered.

#### We Offer Our Service Free

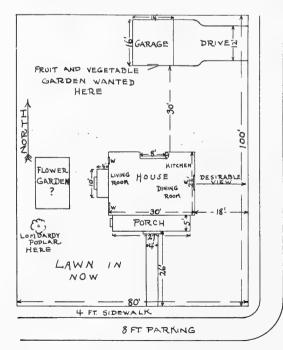

This is where our Ornamental Service can assist you to make the right selections and on an economical basis— and in most cases we will have various sizes to offer so that you may have large or small plants to suit your purse.

A deposit of \$5.00 is required when you send in the sketch blank. This will be placed to your credit to be applied on any purchase made, thus costing you nothing for service rendered.

This department welcomes inquiries concerning your proposed planting and if no plan is made a deposit is not required.

#### Here Is Our Plan

Send for our Planting Sketch blank, which is ruled to scale. Draw a rough pencil sketch of your lot, showing location of house, garage, or other buildings, walks, per-golas, permanent trees or shrubs already planted, etc.— all instructions are given plainly on the blank, making it easy for you to send us the information needed. When the sketch is received, the experienced men in our landscape department will give your drawing personal

attention and quickly revise it, showing the location of every plant suggested to make a harmonious planting. A list will be made of the plants needed, with the price, all of which will be returned to you, for your approval with any suggestions deemed advisable. You then send us the order and if you live within our delivery limits as shown on the front inside cover of Catalog, we will make delivery by truck on terms given, or if at a greater distance we crate the plants securely and ship by freight—no charge for crating—most plants taking a low rate—second class—by freight. The plant-ing is easily done, but if you cannot do the work yourself, the services of a nearby and usually available gardner may be obtained. It may be convenient for you to visit our salesyard,

may be obtained. It may be convenient for you to visit our salesyard, where all the trees and plants that we grow are on dis-play. Bring along your sketch and courteous salesmen will be at your service to give you any information needed and to assist you in your selections. But if this is im-possible be assured that we will give complete service and careful consideration when you deal with us through the mail, from the time your sketch is received until the plants are at your door.

#### Why We Do This

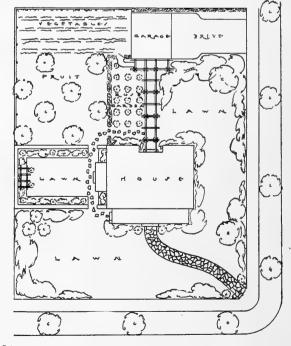

You may wonder why we give all this service. We offer it because it simplifies the handling of the order, makes ordering easy for the customer, and enables us to handle a large volume of business with less overhead expense, and gives our customers a free service. We guarantee that your dealings with us will be satis-factory to you.

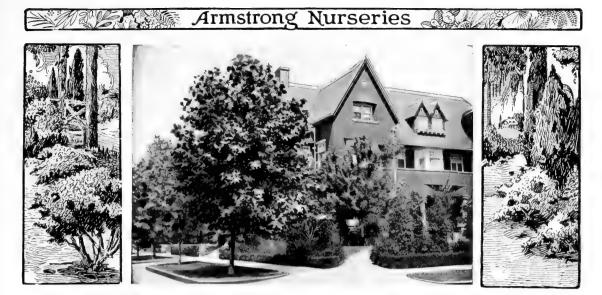

#### What About Large Places

This service is offered to all home owners whose lots are the usual size with a frontage up to about 100 feet. Larger lots and big country places, especially where ground is rolling or hilly, should have personal attention and a visit. For such places special arrangements are necessary and advisable, and our landscape department is prepared to render such service at moderate cost.

#### Making a Seemingly Hard Job Easy

Below at the left we give an example of a sketch from a customer, of a lot 80x100 feet, and to the right we show the sketch worked over by our Ornamental Plan-ning Service Department. It will only take a few minutes of your time to draw such a sketch. Drop us a postal card or letter merely asking for a Planting Sketch Blank. In the next mail out it will be on the way to you.

# **Deciduous Ornamental Shade Trees**

In California and the southwest, where the seasons are so nearly alike and the climate so uniform, trees that shed their foliage in the winter are of particular value because they add a changing beauty to the landscape with their bursting, bright green buds in the spring, their thick canopies of foliage in the heat of the summer, their glorious autumnal color in the fall, and their graceful leaf-less branches in the winter, which allow full play for the sunshine so much enjoyed at that season of the year. They are quite hardy in all parts of California, Arizona and Mexico.

For street trees and for summer shade trees around the home, the Sycamore, Mulberries, Poplars, Maples, etc., will afford a mass of heavy foliage as protection against the hot summer sun, and in the winter when the leaves are gone, they offer a delightful contrast to the abundance of evergreen shrubbery which is so plentiful in California. The popular weeping trees in this class are indispensible in their place, and the spring flowering deciduous trees offer a wonderful sight when in bloom. These trees are all sold when dormant in the winter, are shipped with bare roots, and when established in the soil make a very rapid and luxuriant growth. Five plants or trees are sold at the ten rate where the ten rate is quoted. Heights given refer to usual ultimate height, which may not be attained for years.

height, which may not be attained for years. See planting instructions on page 64.

ACER. Maple

Acer dasycarpum. Silver Maple. 60 ft. This variety of Maple grows quite readily on the Pacific Coast and it makes a beautiful, fast growing shade tree or street tree. Displays every fall leaves of the glorious autumnal shades. 10 to 12 ft., \$2.00; 8 to 10 ft., \$1.75 each, \$15.00 per 10; 6 to 8 ft., \$1.50 each, \$12.50 per 10; 4 to 6 ft., \$1.00 each, \$8.50 per 10.

#### ALBIZZIA JULIBRISSIN. Silk Tree

Albizzia julibrissin. 30 ft. A beautiful shade and avenue tree with fine-cut fern-like foliage. Covered in summer with beautiful feathery pink blossoms. Quite hardy in all parts of California. 2 to 3 ft., 75c each, \$6.50 per 10.

#### BETULA. Birch

**Betula alba.** "European White Birch." 40 ft. A large spreading tree with gray green foliage and slender branches. As the trees get older the bark becomes white and branches are often pendulous. 4 to 5 ft., \$1.25 each, \$11.00 per 10. Betula alba. "European White Birch." 40 ft. branches. and \$11.00 per 10.

"Cutleaf Weeping Birch." Betula alba laciniata. 25 ft. The most ornamental of all Birches with very white bark, pendulous branches and deeply cut leaves. Beau-tiful as a single specimen or in groups. 4 to 6 ft., \$2.00.

#### CATALPA

Catalpa speciosa. "Western Catalpa." 60 ft. A hardy ornamental tree especially desirable to plant where win-ters are cold. A good tree for the desert, since the leaves are large and give good shade. The tree will stand considerable abuse, but responds grandly to good treat-ment and plenty of water. 10 to 12 ft., \$1.50 each, \$12.50 per 10; 8 to 10 ft., \$1.25 each, \$10.00 per 10; 6 to 8 ft., \$1.00 each, \$8.50 per 10; 4 to 6 ft., \$5c each, \$7.50 per 10. Catalpa speciosa. "Western Catalpa." 60 ft.

#### FRAXINUS. Ash

"Arizona Ash." Fraxinus velutina. 30 ft. Rapid Fraxmus venutina. Arizona Ash. 30 ft. Kapid growing tree; desirable for planting in the arid sections of California and Arizona although it does well also near the coast. Requires little water and thrives in alkaline soils. 8 to 10 ft., \$1.50 each, \$12.50 per 10; 6 to 8 ft., \$1.25 each, \$11.00 per 10; 4 to 6 ft., \$1.00 each, \$8.50 per 10; per 10.

#### MELIA. Texas Umbrella Tree

Melia azedarach umbraculiformis. "Texas Umbrella." Melia azedarach umbraculiformis, "Texas Umbrella." 30 ft. A splendid shade tree and one of the most useful for planting where dense shade is desired. Umbrella shaped, of dense growth and uniform habit, bearing num-erous small lilac-colored flowers during the summer. Heavily branched, 8 to 9 ft., \$2.50; 6 to 8 ft., \$1.75 each, \$15.00 per 10; 5 to 6 ft., \$1.25 each, \$10.00 per 10; 4 to 6 ft., \$1.00 each, \$8.50 per 10; unbranched, 4 to 6 ft., 75c each, \$6.50 per 10.

TEXAS UMBRELLA TREES Admirable on Account of their Dense Shade

#### JUGLANS. Black Walnut

Juglans californica. The Native Black Walnut. 50 ft Native to the northern section of California, making a large, strong growing tree under cultivation. Excellent for dry locations. 6 to 8 ft., \$1.25 each, \$10.00 per 10; 4 to 6 ft., \$1.00 each, \$8.50 per 10.

#### LIQUIDAMBAR. Sweet Gum

Liquidambar styraciflua. "Sweet Gum." 50 ft. Α beautiful pyramidal tree of symmetrical habit with maplelike leaves assuming a gorgeous crimson color in winter. Particularly fine near the coast. 2 to 3 ft., 75c.

#### MORUS. Mulberry

Morus multicaulis. "Silkworm Mulberry." 30 ft. Α small bushy tree thriving under unfavorable conditions. The leaves are used for silkworm culture. 6 to 8 ft., 75c each, \$6.00 per 10; 4 to 6 ft., 60c each, \$5.00 per 10.

Morus rubra. "Downing's Ever-bearing Mulberry." 40 Morus rubra. Downing's Ever-bearing Mulberry. 40 ft. A strong upright fast growing tree with dense foliage, making an excellent shade tree. The berries are large, black and delicious, produced in great abundance. 10 to 12 ft., \$2.00 each, \$17.50 per 10; 8 to 10 ft., \$1.50 each, \$12.50 per 10; 6 to 8 ft., \$1.25 each, \$11.00 per 10.

Morus nigra. "Persian or English Mulberry." 25 ft. This variety produces the largest and finest fruit of all the Mulberries; very large, juicy and aromatic; excellent for preserving. The tree is a stout, dense, slow grower and makes an excellent small shade tree. 4 to 5 ft., \$1.50 each, \$12.50 per 10; 3 to 4 ft., \$1.25 each, \$11.00 per 10.

Kingan. (Fruitless.) 30 ft. A good strong growing, dense shade tree, but without fruit, thus avoiding the staining of walks under the tree. Extremely rapid in growth and one of the best shade or street trees for Arizona and other dry arid climates. 6 to 8 ft., \$1.25 each, \$11.00 per 10; 4 to 6 ft., 85c each, \$7.50 per 10.

#### PERSICA. Flowering Peach

**Persica alba plena.** "Double White Flowering Peach." 15 ft. Literally covered in the spring with its many large flowers, like double white roses. 4 to 6 ft., 85c each, \$7.50per 10; 3 to 4 ft., 75c each, \$6.00 per 10.

LOMBARDY POPLAR **Rapid Growing Tree for Avenues** 

PLANE OR SYCAMORE A Beautiful Shade Tree for All Locations

Persica rosea plena. "Double Pink Flowering Peach." 15 ft. Similar to the above except flowers are a beautiful rose pink in color. The cut branches make beautiful floral sprays in spring. 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.00 per 10.

**Persica rosea plena.** "Early Pink Flowering Peach." 15 ft. Similar to the above except that the flowers are not quite so double and bloom a full three weeks earlier than any other peaches, being very desirable for this reason. 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10. "Early Pink Flowering Peach."

**Persica sanguinea plena.** "Double Red Flowering Peach." 15 ft. The big double flowers are a bright crim-son in color and very showy in the spring, covering the tree. 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.00 per 10.

#### PLATANUS. Plane or Sycamore

Platanus orientalis. "European Sycamore." "Oriental Plane." 60 ft. One of the finest deciduous shade and street trees in existence. Grows rapidly, has large maple-like, bright green leaves, is symmetrical and uniform in shape, and grows almost anywhere. Does well with plenty of water, but will thrive with very little. Makes a dense shade and may be heavily pruned if desired. 10 to 12 ft., \$3.00 each, \$27.50 per 10; 8 to 10 ft., \$2.00 each, \$17.50 per 10; 6 to 8 ft., \$1.25 each, \$11.00 per 10; 4 to 6 ft., 85c each, \$7.50 per 10.

#### PRUNUS. Flowering Plum

**Prunus Mme. Dorbon.** 15 ft. A delightful flowering plum which in the spring is literally covered with large, bright pink, bell-shaped flowers on every twig and branch. The flowers hang down from the stems, imparting a semi-weeping appearance. A showy and beautiful variety. 6 to 8 ft., \$1.50 each, \$12.50 per 10; 4 to 6 ft., \$1.25 each, \$11.00 per 10.

PRUNUS. Flowering Cherry Prunus campanulata. "Pink Flowering Cherry." 25 ft. runus campanulata. Fink riowering Cherry. 23 ft. One of the most beautiful flowering cherries of Japan, the tree being covered in early spring with pendulous, deep rose colored flowers. 4 to 6 ft., \$1.75 each.

#### PRUNUS. Purple Leaved Plum

**Prunus pissardi.** "Purple Leaf Plum." 15 ft. A very graceful small tree with purple leaves, giving a rich spot of color to any landscape planting. Hardy anywhere. 6 to 8 ft., \$1.50; 4 to 6 ft., \$1.25.

**Prunus Vesuvius.** "Burbank's Purple Leaf Plum." A strong growing form with very deep colored shiny leaves of rich purple, holding its color well. Long willowy branches. 4 to 6 ft., \$1.25.

#### POPULUS. Poplar

ropulus Bolleana. "Bolleana Poplar." 40 ft. A tall narrow tree somewhat like the Lombardy Poplar in habit but grayish white on the under side of the leaves and light green on top. A most attractive and graceful tree. 10 to 12 ft., \$2.00 each, \$17.50 per 10; 8 to 10 ft., \$1.75 each, \$15.00 per 10. Populus Bolleana. "Bolleana Poplar."

**Populus monilifera.** "Carolina Poplar." 60 ft. Exceed-ingly fast growing tree which attains large size quickly. Of tall broadly pyramidal form and dense foliage. Ex-tremely easy to grow, doing equally well on the desert or near the coast. Can be planted to give a quick shade while slower growing, more permanent trees are attaining their size. 14 to 16 ft., \$2.50 each, \$22.50 per 10; 12 to 14 ft., \$2.00 each, \$17.50 per 10; 10 to 12 ft., \$1.50 each, \$12.50 per 10; 8 to 10 ft., \$1.25 each, \$10.00 per 10; 6 to 8 ft., \$1.00 each, \$8.50 per 10; 4 to 6 ft., 75c each, \$6.50per 10.

**Populus nigra Italica.** "Lombardy Poplar." 75 ft. The tall slender, narrow poplar so valuable for lining drive-ways or for accentuating certain types of architecture. Grows very rapidly, attaining great height in a very few years. 10 to 12 feet, \$2.00 each, \$17.50 per 10; 8 to 10 ft., \$1.50 each, \$12.50 per 10; 6 to 8 ft., \$1.25 each, \$11.00 per 10; 4 to 6 ft., 85c each, \$7.50 per 10.

#### **ROBINIA.** Locust

Robinia Pseudacacia. Black Locust. 80 ft. A hardy. **RODING FSUGACACIA.** Black Locust. 80 ft. A hardy, drought resistant tree, much used in the arid and desert sections for shade and general planting. Easily and rapidly grown. Needs very little water; withstands alkali. 5 to 6 ft., 50c each, \$4.00 per 10; 3 to 4 ft., 25c each, \$2.00 per 10, \$15.00 per 100.

WEEPING WILLOW A Graceful and Picturesque Tree for Many Locations

TEAS WEEPING MULBERRY One of the Most Useful of the Weeping Trees

#### ULMUS. Elm

Ulmus Americana. "American White Elm." 50 to 100 Ulmus Americana. "American White Elm." 50 to 100 ft. There is no more majestic or noble tree than the Elm with its great arching branches, dense shade and bright green foliage. It does well in the West, thriving both on the coast and in the interior. Grows quite rapidly. 10 to 12 ft., \$2.50 each, \$22.50 per 10; 8 to 10 ft., \$2.00 each, \$17.50 per 10; 6 to 8 ft., \$1.50 each, \$12.50 per 10; 4 to 6 ft., \$1.00 each, \$8.50 per 10. Ulmus campestris. "English Elm." 50 to 100 ft. A large stately tree with deeply fissured bark and bright green leaves. Thrives with ordinary care. 8 to 10 ft., \$2.00 each, \$17.50 per 10; 6 to 8 ft., \$1.50 each, \$12.50 per 10.

per 10.

#### SALIX. Pussy Willow

Salix discolor. "Pussy Willow." 15 ft. A small up-right tree or large shrub which in the early spring is covered with the long, silky, silver catkins which make the branches so valuable for decorating. Grows anywhere. 6 to 8 ft., \$1.25 each, \$10.00 per 10; 3 to 4 ft., 85c each, \$7.50 per 10.

#### Weeping Deciduous Trees

### MORUS. Weeping Mulberry

Morus pendula. "Tea's Weeping Mulberry." 8 ft. Very ornamental and of drooping habit. Its long, slender branches curve gracefully to the ground, forming a dense umbrella-shaped head. May be trained over a framework to form a wide roof of green. Excellent for a lawn speci-men. All trees have well developed heads. 2 yr., 6 to 8 ft., \$2.50; 1 yr., 6 to 8 ft., \$2.00.

#### SALIX. Weeping Willow

Salix Babylonica. 40 ft. The well known picturesque "Weeping Willow." Large spreading top and long pendu-lous branches. Thrives in wet or dry soils. 6 to 8 ft., \$1.25; 4 to 6 ft., \$1.00.

#### Hardy Flowering Shrubs

This class includes many plants growing from three to ten feet in height and producing great garlands of flowers, usually in the spring, and a mantle of bright green foliage in the summer.

AMYGDALUS, Dwarf Flowering Almond Amygdalus alba nana. "Dwarf White Flowering Al-mond." 6 ft. A beautiful flowering shrub, bearing a mass of double white flowers in the early spring. 3 to 4 ft., \$1.00; 2 to 3 ft., 75c.

Amygdalus rosea nana. "Dwarf Pink Flowering Al-mond." 6 ft. The rare beauty of this bushy flowering shrub in the spring is not soon forgotten. Flowers are small, soft pink, very double, and completely cover the branches. 1½ to 2 ft., 75c each, \$6.00 per 10.

SPIREA VAN HOUTTEI One of the Best Spring Flowering Shrubs

#### CARYOPTERIS. Bluebeard

Caryopteris incanus. "Bluebeard." A dwarf bushy plant with grayish green, downy leaves, and dotted in spring time with small lavender blue flowers. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c.

#### CORNUS. Flowering Dogwood

**Cornus florida.** "Flowering Dogwood." 10 ft. A large shrub with handsome foliage and great numbers of large extremely showy single white flowers. Thrives in sun or shade. 2 to 3 ft., \$1.00 each.

#### **CYDONIA.** Flowering Quince

Cydonia japonica rosea. "Red Flowering Quince." 10 ft. A very showy plant early in the spring when covered with its bright, semi-double, rosy red flowers, which ap-pear just as the leaves begin to show. Has attractive glossy foliage the rest of the summer. 3 to 4 ft., \$1.00 each, \$8.50 per 10.

Cydonia japonica sanguinea. "Scarlet Flowering Quince." 10 ft. Similar to the above variety but the flowers are a very bright scarlet and are scattered over the branches all during the spring and summer. 4 to 6 ft., \$1.25 each, \$11.00 per 10; 3 to 4 ft., \$1.00 each, \$8.50 per 10.

#### DEUTZIA

Deutzia crenata. "Double White Deutzia." Hardy, vigorous shrub, growing 6 to 8 feet high. Bears in the spring a great profusion of pure white double flowers. 4 to 6 ft., \$1.00 each, \$8.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10.

#### LAGERSTROEMIA. Crape Myrtle

Lagerstroemia indica rosea. "Pink Crape Myrtle." 15 to 20 ft. One of the best summer flowering shrubs or small trees, being a mass of bloom during July, August and September. The flowers are crinkled resembling crape. This variety is a pastel shade of pink, with a touch of lavender. Potted, gallon containers, 3 to 4 ft., 85c each, \$7.50 per 10; 2 to 3 ft., 75c each, \$6.50 per 10; 4 inch pots, 50c each, \$4.00 per 10.

Lagerstroemia indica rubra. "Red Crape Myrtle." 10 to 15 ft. Resembles the pink variety but makes a little smaller shrub and has flowers of a deep purplish-red color. Very showy. Potted, gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10.

#### PHILADELPHUS. The Mock Orange

Philadelphus coronarius. "Large Flowered Mock Orange." 6 to 8 ft. A tall spring-blooming shrub with spreading, often arching branches. Leaves broad, lance-like, bright green; flowers pure white, very showy, 6 to 8 ft., \$1.25 each, \$10.00 per 10; 3 to 4 ft., 85c each, \$7.50 per 10.

#### **PYRUS.** Flowering Crab Apple

Pyrus ioensis Bechteli. American Crab." 8 to 12 "Bechtel's Double Flowering **Pyrus ioensis Bechteli.** "Bechtel's Double Flowering American Crab." 8 to 12 ft. The most beautiful of the flowering crabs. Trees of small to medium size, covered in early spring with large, beautiful, double fragrant flowers of a delicate pink color. From a distance the flowers have the appearance of small roses. Blooms when quite young. 3 to 4 ft., \$1.00; 2 to 3 ft., 85c.

#### PUNICA. Flowering Pomegranate

Punica alba. "White Flowering Pomegranate." 6 to 10 . A fast growing shrub with very double creamy white owers, followed by bright red fruits. 4 to 6 ft., \$1.00; to 4 ft., 85c each, \$7.50 per 10. ft. flowers.

Punica Rubra. "Double Red Flowering Pomegranate." to a ft. A beautiful ornamental Pomegranate with big double scarlet flowers in the spring and summer and bright red fruits in the fall. 4 to 6 ft., \$1.00 each, \$8.50per 10; 3 to 4 ft., 85c each, \$7.50 per 10.

Punica Mme. Legrelle. "Variegated Pomegranate." ft. This variety has big red flowers, every petal edged and flecked with white. A lovely and novel bloom, 4 to 6 ft., \$1.00 each, \$8.50 per 10; 3 to 4 ft., 85c, \$7.50 per 10.

#### SPIREA. Bridal Wreath

There are no flowering shrubs more lavish with their blooms in the springtime than the Spireas. In any loca-tion and under all conditions they dress themselves in a gorgeous mantle of flowers. They will fit into almost any planting as single specimens, groups, and may also be used as a hedge. The bright green foliage is attrac-tive in the summer after the flowers are gone. The gar-lands of blooms are of great value for house decoration lands of blooms are of great value for house decoration.

Spirea Anthony Waterer. 4 ft. A dwarf Spirea very compact in form. From spring until fall it bears bright rosy crimson flowers in dense panicles, making a very beautiful show of color. The old flower heads should be cut in order to keep the bloom coming. I to  $1\frac{1}{2}$  ft., 75c each, \$6.50 per 10.

Spirea Reevesiana. "Double Bridal Wreath." 8 ft. Similar to ordinary Bridal Wreath except that the flowers are double. There is nothing to equal this shrub or its single variety, for its showy appearance in the spring time, and its long arching branches festooned with white bloom are unexcelled for indoor decoration. 3 to 4 ft., 75c each, \$6.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10.

Spirea van Houttei. "Bridal Wreath." 8 ft. A charm-ing garden shrub of moderate size. The white flowers are borne in profusion in the springtime, causing the slender branches to droop with a graceful arching wreath-like effect. Strong, bushy plants, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10.

#### SYRINGA. Lilac

The old fashioned Lilac with its sweet scented deli-cately colored flowers does well in the cooler coastal regions of California but are not to be highly recom-mended for the warmer interior parts.

#### Price \$1.00 each

Belle de Nancy. Very large panicles of double flowers, brilliant satiny rose pink with a white center.

Ludwig Spaeth. Dark purplish red in color; the indi-vidual flowers single and very large.

Syringa persica laciniata. "Feathered Persian Lilac." A beautiful variety with long arching branches, daintily cut foliage and panicles of small lilac colored flowers borne on every branch and twig.

#### TAMARIX

Tamarix parviflora. 20 ft. Shrub or small tree with reddish brown bark and slender spreading branches. In the spring and early summer is covered with feathery pink flowers: Stands extremes of climate well. 3 to 4 ft., 75c each, \$6.50 per 10.

#### VIBURNUM, Snowball

Viburnum Opulus Sterile. "Common Snowball." 8 to 10 ft. Well-known hardy shrub producing an abundance of pure white, globular flowers in May and June; beauti-ful foliage in the fall. 2 to 3 ft., \$1.00.

#### WEIGELA

Weigela rosea. 6 to 8 ft. One of the best deciduous flowering shrubs for almost any location. Has larger and more attractive foliage than most of this class and the large clusters of trumpet-shaped rose pink flowers make a wonderful display in the spring and early summer. 4 to 6 ft., \$1.25; 3 to 4 ft., \$1.00; 2 to 3 ft., 75c.

# **Broad-Leaved Evergreen Trees**

We are particularly favored in California with a large and varied assortment of broad-leaved evergreen trees which flourish in our climate and are such a characteristic feature of our plantings. The many beautiful Acacias with their brilliant yellow blossoms are very popular. The Eucalyptus, although Australian in origin, is now a typically Californian tree, and windbreaks, street trees and groves are only a few of the many uses to which its several varieties are put.

Near the coast, the Acacia, Jacaranda, Magnolia, Rubber Tree and Camphor make beautiful trees, while more adapted to the arid and desert parts of the southwest are the Casuarina, Parkinsonia, Grevillea and Pepper. The Carob and certain varieties of Eucalyptus may be grown in both regions.

Most of these plants are established in gallon or quart containers of tin, which are easily and safely shipped, and from which the plants should be readily transplanted without loss.

Five plants or trees are sold at the ten rate where the ten rate is quoted. Heights given refer to usual ultimate height, which may not be attained for years.

See planting instructions for Ornamentals on page 64.

#### ACACIAS

A remarkable group of flowering trees and shrubs which are admirably adapted for park and avenue planting. Usually rapid growers and easy of cultivation. The flowers range in color from yellow to almost white. The leaves of some varieties are large and feathery, while others are smaller and lance-like.

Acacia armata. "Kangaroo Thorn." 10 ft. A spreading much branched large shrub with bright green foliage and with bright yellow balls of blooms scattered up and down the stems. The plant is covered with small spines and prickles and for this reason makes a fine protecting hedge or barrier. Potted, gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10. Acacia Baileyana. 30 ft. The most popular and one of the handsomest of all Acacias, with beautiful fern-like, silvery blue green foliage. Completely enveloped in the spring with great sprays of lemon yellow flowers. Makes a large, spreading tree. Potted, gallon containers, 4 to 6 ft., \$1.25 each, \$11.00 per 10; 3 to 4 ft., \$1.00 each, \$9.00 per 10; 2 to 3 ft., 75c each, \$6.50 per 10.

Acacia calamifolia. "Brown Wattle." 20 ft. A medium sized variety with handsome foliage, particularly fine when in full bloom. Bright yellow. Potted, gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10.

Acacia cultriformis. 8 feet. A dwarf-growing variety, with bluish foliage and small peculiarly-shaped triangular leaves, bright yellow flowers. Gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10.

ft., 75c each, \$6.50 per 10. Acacia dealbata. "Silver Wattle." 60 ft. A royal tree. Large and spreading, with finely cut fern-like leaves of bluish-green. In late winter is covered with a wealth of golden-yellow flowers. One of the best for street or park planting. A very fast growing variety which will give a quicker effect than any other Acacia. Potted, gallon containers, 5 to 7 ft., \$1.00 each, \$9.00 per 10; 4 to 5 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10. Acacia decurrens. "Corren Wattle." 50 ft. Very simi-

Acacia decurrens. "Green Wattle." 50 ft. Very similar to A. dealbata with finer cut, darker green foliage, and brighter yellow flowers. Very fast growing, making a large, well shaped tree very quickly. Potted, gallon containers, 4 to 5 ft., 85c each, \$7.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10.

A. Baileyana A. Cultriformis A. Floribunda A. Melanoxylon A. Podalyriaefolia A. Dealbata Acacia Varieties, Showing Characteristic Foliage

CAMPHOR TREE **Excellent** for Uniform Street Planting

Acacia floribunda. "Everblooming Acacia." 20 to 25 ft. A fast, upright growing tree, making a dense round head. Has long narrow leaves, small creamy yellow flowers, and blooms constantly during the summer. Potted, gallon containers, 5 to 7 ft., \$1.00 each, \$9.00 per 10; 4 to 5 ft., 85c each, \$7.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10.

each, \$5.00 per 10.
Acacia latifolia. 15 to 25 ft. A spreading variety much used for backgrounds and low bushy effects because, with a little pruning, it makes a dense mass of foliage, although it will make an upright tree if desired. Bright yellow flowers. Gallon containers, 5 to 7 ft., \$1.00 each, \$9.00 per 10; 2 to 3 ft., 60c each, \$5.00 per 10.
Acacia melanoxylon. "Black Acacia." 40 ft. Extensively planted in California as a street tree, because it grows very rapidly and does well near the coast or in the warm interior. Naturally pyramidal but may be trained into globes or other shapes. Mature leaves long and narrow; flowers inconspicuous. Potted, gallon containers, 5 to 7 ft., \$1.00 each, \$9.00 per 10; 3 to 4 ft., 75c each, \$6.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10.
Acacia molissima. 60 feet. A fine, large spreading

Acacia molissima. 60 feet. A fine, large spreading tree with feathery foliage; fast grower; flowers yellow, profusely borne in early spring. Splendid for avenue planting and as individual specimens. Excellent where quick effects are a consideration. Potted in gallon con-tainers, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10.

Acacia podalyriaefolia. 15 ft. A rare and beautiful tree, rather dwarf in character, having large round grayish-green leaves and great large canary yellow flowers, borne in profusion about Christmas time. The flowers are by far the most beautiful of all Acacias. Potted, gallon con-tainers,  $1\frac{1}{2}$  to 2 ft., 85c each, \$7.50 per 10; 4 inch pots, 60c each, \$5.00 per 10.

Acacia prominens. 30 ft. A very fine acacia with fine, narrow leaves and a unique weeping, pendulous habit. Golden yellow flowers in great profusion. Potted, gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; quart con-tainers, 2 to 3 ft., 50c each, \$4.00 per 10. Acacia Pycnantha. "Golden Wattle." 30 ft. The large, heavy. undivided leaves. so rich in green. make this a

heavy, univided leaves, so rich in green, make this a rare and beautiful specimen, while golden yellow flowers add to its beauty. Gallon containers, 5 to 7 ft., \$1.00 each, \$9.00 per 10.

Acacia verticillata. 12 ft. A bushy, low-growing variety with narrow needle-like leaves, excellent for hedge and massing. Flowers brilliant golden yellow. Potted, gallon containers, 5 to 7 ft., \$1.00 each, \$9.00 per 10; 4 to 6 ft., 85c each, \$7.50 per 10; quart containers, 2 to 3 ft., 50c each, \$4.00 per 10.

#### **CAMPHORA**, Camphor Tree

Camphora officinalis. "Camphor Tree." 30 feet. Ex-Camphora officinalis. "Camphor Tree." 30 feet. Ex-cellent for street planting where an evergreen tree of moderate growth and regular form is desired, and par-ticularly good for narrow parkways. Of medium growth and always handsome with its dense bright green glossy foliage. Potted, 5 gallon containers, 5 to 7 ft., \$3.00; 4 to 5 ft., \$2.50 each, \$22.50 per 10; gallon containers, 4 to 6 ft., \$1.25 each, \$11.00 per 10; 3 to 4 ft., \$1.00 each, \$9.00 per 10; pint containers, 2 to 3 ft., 60c each, \$5.00 per 10.

#### CASUARINA. Beefwood or She Oak

Casuarina Stricta. "Beefwood or She Oak Casuarina Stricta. "Beefwood or She Oak." 75 ft. A fine street tree for all locations because it is very hardy, withstanding alkali, drought, heat, and cold. Grows very fast when young, has bunchy, reed-like foliage, and re-sembles a pine somewhat. Potted, gallon containers, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10; quart containers, 2 to 3 ft., 50c each, \$4.00 per 10.

Casuarina equisetifolia, 75 to 100 ft. Similar to the above but with longer, drooping, more coarse thread-like branches. Will endure much wind and much salinity, and therefore excellent for the seashore. Potted, gallon con-tainers, 3 to 4 ft., 75c each, \$6.50 per 10.

#### CERATONIA. Carob

Ceratonia siliqua. "St. John's Bread or Carob." 40 feet. Admirably adapted as a tree for ornamental ave-nue planting, or as single specimens. Beautiful trees may be seen in many places in Southern California and its symmetrical shape and dense, glossy, evergreen foliage, the same throughout the year, are fast making the Carob one of the most desired street trees. It is long-lived, deep rooted, does not become too large or straggly, and is a most satisfactory, permanent tree. Potted in 5 gallon containers, 7 to 8 ft., \$3.50 each, \$30.00 per 10; 6 to 7 ft., \$2.75 each, \$22.50 per 10; 5 to 6 ft., \$2.25 each, \$20.00 per 10; 4 to 5 ft., \$1.50 per 10; gallon containers, 3 to 4 ft., \$1.25 each, \$11.00 per 10; 2 to 3 ft., \$1.00 each, \$9.00 per 10. "St. John's Bread or Carob." Ceratonia siliqua.

#### EUCALYPTUS

Of all exotic trees introduced into California, none lends itself so readily to the landscape as the Australian Eucalyptus. No trees are more beautiful or more sub-stantial for street and avenue planting than a number of the more ornamental varieties. Many others produce a magnificent display of flowers during the blooming sea-son. Excellent for windbreaks and timber.

CAROB TREE Attractive Evergreen Shade and Street Tree

Flats are small boxes about 18 inches square by 3 inches deep, filled with earth and contain about 100 growing plants, weighing about fifty pounds. In case a lesser quantity is wanted, it will be necessary to order those grown in containers.

**Eucalyptus calophylla rosea.** 25 ft. A rare variety with bright hued flowers, a rich bright pink in color. Large glossy leaves, and very ornamental at all times. Rather tender. Potted, gallon containers, 1 to 2 ft. \$1.00.

Eucalyptus citriodora, "Lemon-scented Gum." 60 to 100 feet. A fine ornamental tree with long, slender lemon-scented leaves, which sends one slender straight white trunk towering to a great height with a round airy crown at the top. A rapid grower. Its delicious fragrance and picturesque form make it one of the most desirable of the Eucalyptus. Potted, gallon containers, 3 to 4 ft., \$1.00 each, \$8.50 per 10.

**Eucalyptus corynocalyx.** "Sugar Gum." 120 ft. Erect and fast growing; thrives well near the coast or in very hot climates and is very drought resistant. Ex-cellent for dry hillsides. Potted, gallon containers, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50per 10; flats of 100, \$3.00.

**Eucalyptus ficifolia.** "Scarlet Flowering." 25 ft. A rather dwarf tree, and the showiest of all Eucalypti, with its great clusters of brilliant crimson flowers, set in a background of large dark glossy leaves. Objects of wonder and admiration when in bloom. Potted, 5 gallon containers, 8 to 10 ft., \$3.50; 6 to 8 ft., \$2.50 each, \$22.50 per 10; 3 lot 4 ft., \$1.25 each, \$1.00 per 10; 2 to 3 ft., \$1.00 each, \$9.00 per 10; 4 inch pots, 50c each, \$4.00 per 10. per 10

**Eucalyptus globulus.** "Blue Gum." 150 feet. The most widely planted species in this country; an exceedingly rapid grower, and for this reason largely used for windbreaks and fuel. The wood is hard and durable. The foliage has a decided bluish cast. Potted, gallon containers, 3 to 4 ft., 60c each, \$5.00 per 10; quart containers, 2 to 3 ft., 40c each, \$3.50 per 10, \$30.00 per 100; flats of 100 plants, \$3.00.

Eucalyptus globulus compacta. "Bushy Blue Gum." 40 feet. A valuable new variety which grows naturally into a symmetrical, rounded, compact form. There is no main trunk and the tree is densely branched, with silvery gray foliage. Makes a beautiful specimen tree as well as an efficient windbreak. Potted, quart containers, 3 to 4 ft., 50c each, \$4.00 per 10; 2 to 3 ft., 40c each, \$3.50 per 10.

**Eucalyptus Lehmanni.** 20 ft. A low growing, dwarf tree with a thick spreading crown. It will branch clear down to the ground and is excellent for many forms of landscape work. Potted, gallon containers, I to 2 ft., 75c each, \$6.50 per 10.

"White Ironbark." Eucalyptus leucoxylon, 100 feet. **Eucaryptus leucoxylon.** White Fronbark. 100 feet. A very large tree, rather low branching. The bark peels off, leaving the trunk smooth and white. Extremely hardy, thriving from the seacoast to the deserts of Cali-fornia and Arizona. Excellent timber. Potted, gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; quart con-tainers, 2 to 3 ft., 50c each, \$4.00 per 10; flats of 100, \$3.00 \$3.00.

**Eucalyptus polyanthema.** "Red Box." 75 ft. A medium sized tree of spreading habit with rounded, bluish leaves. One of the best species for specimen planting on the home grounds and a good highway tree. Not very fast growing and not injured by extreme frosts or heat. Potted, gallon containers, 2 to 3 ft., 60c each, \$5.00 per 10. fast of 100  $\pm 3.00$ 10; flats of 100, \$3.00.

10; flats of 100, \$3.00. Eucalyptus pulverulenta. 20 ft. One of the dwarf varieties with the leaves set at right angles to the stem and a distinct blue color. The color and arrangement of the foliage make it an odd and interesting small tree. Potted, gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10. Eucalyptus robusta. "Swamp Mahogany." 100 ft. An excellent species for low moist land, but does well under varying conditions. Very symmetrical in growth, with large glossy foliage, and makes a fine specimen tree. Needs plenty of water. Potted, gallon containers, 2 to 3 ft., 50c each, \$6.50 per 10; quart containers, 2 to 3 ft., 50c each, \$4.00 per 10; flats of 100, \$3.00.

Eucalyptus rostrata, "Red Gum." 120 ft. rapid Eucaryptus rostrata. Red Gum. 120 ft. A rapid grower that endures much heat, severe frost and con-siderable drought. Widely planted as a forest cover, windbreak and shade tree. Potted, gallon containers, 4 to 6 ft., 75c each, \$6.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10; flats of 100, \$3.00.

**Eucalyptus** sideroxylon. "Red Ironbark." 40 ft. A tree of moderate size with long narrow leaves and reddish bark, excellent for timber, which thrives in dry locations and will endure temperatures of  $16^{\circ}$  F. Potted, gallon containers, 3 to 4 ft., 60c each, \$5.00 per 10; quart containers, 2 to 3 ft., 50c each, \$4.00 per 10.

#### EUCALYPTUS CALOPHYLLA ROSEA The Flowers are a Beautiful Shade of Pink

**Eucalyptus rudis.** "Desert Gum." 75 to 100 ft. A valuable species; in habit, erect and stately; a vigorous and rapid grower; bark, grayish; leaves of young trees round, later becoming lance-shaped; endures minimum temperature of 15 degrees F.; especially adapted to the Imperial Valley and Arizona. Potted, gallon containers, 4 to 6 ft., 75c each, \$6.50 per 10; quart containers, 3 to 4 ft., 50c each, \$4.00 per 10; \$30.00 per 100; flats of 100, \$3.00. ft., 50 \$3.00,

**Eucalyptus sideroxylon rosea.** 40 ft. One of the most beautiful of all Eucalypti, adapted to almost any loca-tion, as it is quite hardy. Of moderate size, with masses of delicate pink flowers contrasted with dense silvery-gray foliage, the individual leaves being long and narrow. Potted, gallon containers, 2 to 3 ft., 60c each, \$5.00 per 10.

**Eucalyptus tereticornis.** "Gray Gum." 150 ft. Thrives under a great variety of conditions, both on the coast and in the desert. Will use plenty of water but does not require it, and stands extremes of heat and cold. Similar to Eucalyptus roetrata but makes a straighter that require it, and stands extremes of heat and cold. Similar to Eucalyptus rostrata, but makes a straighter tree, and it yields an extremely high grade of timber. Potted, gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10; flats of 100, \$3.00.

**Eucalyptus viminalis.** "Manna Gum." 125 ft. A very hardy variety enduring both heat and cold, and exceeded in rapidity of growth only by the Blue Gum, while it will grow where the latter will not succeed. A beautiful and picturesque tree with long pendulous branches and narrow leaves. Excellent for street or windbreak. Pot-ted, gallon containers, 2 to 3 ft., 60c each, \$5.00 per 10; quart containers, 1 to 2 ft., 40c each, \$5.50 per 10; flats of 100, \$3.00.

#### FICUS. Rubber Tree

Ficus macrophylla. "Moreton Bay Fig." 40 ft. A variety of rubber tree with thick, heavy, large leaves. A fine evergreen tree for avenue planting, being quite hardy and growing into large majestic specimens. Potted, gallon containers, 2 to 3 ft., \$1.00 each, \$9.00 per 10.

#### GREVILLEA. Silk Oak

**Grevillea robusta.** "Silk Oak." 150 ft. A graceful tree, with fern-like leaves; covered in summer with golden-rod flowers; valuable for avenue planting; very drouth resistant. Potted, gallon containers, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10.

#### JACARANDA

Jacaranda mimosaefolia. 30 ft. One of the handsom-est flowering trees grown in Southern California. Forms a round, symmetrical head of light green, fern-like foliage and in spring the entire tree is a mass of light violet-blue tubular flowers, borne in clusters. Should not be planted where the temperature frequently goes below  $24^{\circ}$ . Potted, gallon containers, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10.

JACARANDA Beautiful Flowering Shade Tree

#### LAGUNARIA

Lagunaria pattersoni. 40 ft. An upright, hardy pyra-midal tree with olive green foliage to the ground, bearing in the summer time clusters of light pink flowers like a small hibiscus. Does well as a shade or street tree any-where near the coast. Potted, gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10.

#### MAGNOLIA

MAGNOLIA Magnolia grandiflora. "Southern Magnolia." 60 ft. The well known Magnolia of the South, making a large stately tree in time, although of slow growth. Has beau-tiful dark green, heavy shining foliage and in the summer and fall produces its magnificent large pearly white flowers 6 to 8 inches across, intensely fragrant. A beau-tiful street or specimen tree; quite hardy and will do best with plenty of water. Balled, field grown, 5 to 6 ft, \$4.00; 4 to 5 ft., \$3.00 each, \$25.00 per 10; potted, gallon containers, 3 to 4 ft., \$1.25 each, \$11.00 per 10; 2 to 3 ft., \$1.00 each, \$9.00 per 10.

#### PARKINSONIA. Jerusalem Thorn

Parkinsonia aculeata. "Jesusalem Inorn Parkinsonia aculeata. "Jesusalem Thorn." 15 ft. A showy ornamental tree with smooth bright green bark and many feathery reed-like branchlets which take the place of leaves. During the early summer the tree is covered with many small bright yellow flowers. Quite hardy and thrives in dry soil, being an excellent tree for desert conditions. Potted, gallon containers, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10; 4-inch pots, 50c each, \$4.00 per 10.

#### PRUNUS. Evergreen Cherry

Prunus ilicifolia. "Wild Cherry." 10 to 20 ft. This small tree or large bush is native to the dry mesas of California and because of its beautiful glossy, roundish, holly-like leaves is much used for Christmas decorations. For a large hedge, masses or background planting it is a wonderfully effective plant. Does not like too much water. Potted, gallon containers, 1½ to 2 ft., 75c each, \$6.50 per 10; 4-inch pots, 50c each, \$4.00 per 10. Prunus integrifolia. "Catalina Cherry." 20 ft. A beautiful small tree with large glossy, dark-green holly-

**Prunus integrifolia.** "Catalina Cherry." 20 ft. A beautiful small tree with large, glossy, dark-green holly-like leaves, native to Catalina Island. A fine small street tree, or can be used as a large shrub or hedge in land-scape planting. Its foliage is exceedingly attractive. Potted, gallon containers, I to  $1\frac{12}{2}$  ft., 75c; 4-inch pots, 10 to 15 inches, 50c each, \$4.00 per 10.

#### QUERCUS. Oak

QUERCUS. Oak Quercus agrifolia. "California Live Oak." 50 ft. The most picturesque trees that grace the landscape of Cali-fornia are the evergreen oaks. This variety is the best known of the native species, with medium sized, spiny-toothed leaves and making a large, dense, handsome tree. Grows quite rapidly and is beautiful even while small, while for a permanent tree there is nothing finer than the Native Oak. Potted, 3 gallon containers, 4 to 6 ft., \$2.00 each, \$9.00 per 10; 2 to 3 ft., 75c each, \$6.50 per 10; 4-inch pots, 60c each, \$5.00 per 10.

Quercus suber. "Cork Oak." Spain. 50 ft. A splen-did evergreen oak with a large round head and upright habit of growth. The bark on the older trees is spongy and deeply furrowed and supplies the cork of commerce. In gallon containers, 3 to 4 ft., \$1.00; 4-inch pots, 75c.

#### SCHINUS. Pepper Tree

Schinus molle. "California Pepper." 50 ft. This unique and beautiful tree needs no word of comment. It is the admiration and wonder of every visitor. Of easy culture, enduring the desert conditions admirably. Bare root, field grown or potted, gallon containers, 4 to 6 ft., 85c each, \$7.50 per 10; 3 to 4 ft., 75c each, \$6.50 per 10; potted, quart containers, 2 to 4 ft., 50c each, \$4.00 per 10; \$30.00 per 100; flats of 100, \$5.00.

#### STERCULIA. Bottle Tree

Sterculia acerifolia (Brachychiton). "Flame Tree." 40 ft. A sturdy tree with heavy, deeply lobed large leaves, which produces in the early summer a magnificent show of bright crimson flowers in great clusters all over the tree. A spectacular tree which might be mistaken for a fine scarlet-flowering Eucalyptus at a distance. Potted, 5 gallon containers, branched, 3 to 4 ft., \$2.00; gallon containers, 2 to 3 ft., \$1.25.

Sterculia diversifolia. "Bottle Tree." 25 ft. One of the many Australian trees that find favor in our South-west. Has a very large trunk at the base for so small a tree, but is a light feeder, stands extreme heat or cold, requires very little water and in the spring has many little spotted cream colored flowers. Field grown, bare root, 4 to 6 ft., \$1.00 each, \$9.00 per 10; 3 to 4 ft., 75c each, \$6.50 per 10; 2 to 3 ft., 60c each, \$5.00 per 10.

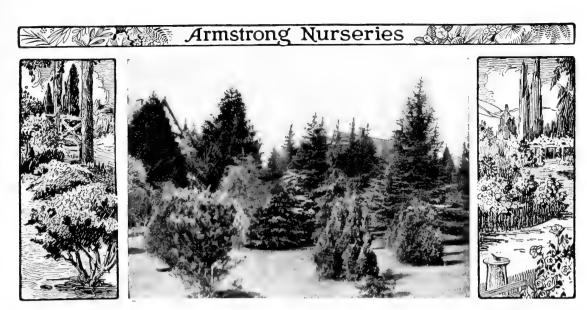

#### TAMARIX. Athel Tree

TAMARIX. Athel Tree Tamarix articulata. "Athel Tree." Western Asia. 30 ft. A fast growing bushy tree much used as a windbreak during the last few years, in the hot dry sections of the Southwest. Has slender, jointed branches and gray-green foliage. Must be grown from cuttings planted where trees are to remain. Leave only 1 or 2 inches of cutting above ground. Cuttings, 12 in. long, \$3.00 per 100.

Ulmus parvifolia. "Evergreen Elm." 20 to 30 ft. One of the most beautiful elms in cultivation. A small tree with a spreading crown of slender drooping branches and delicate graceful bright green leaves. There is no more graceful tree for a lawn than this semi-weeping Elm from China. Potted, gallon containers, 3 to 4 ft., \$1.25, \$11.00 per 10.

CALIFORNIA LIVE OAK **Our Finest Native California Tree** 

# **Coniferous and Hardy Evergreen Trees**

The Conifers or Cone-Bearing Evergreens embrace a wide variety of trees and shrubs and those we grow are the best selected types of species adapted to the Pacific Coast and the South. The Cryptomerias, Lawson Cypress, Junipers, Thuyas, and Yews are low growing plants suitable for lawn specimens low clumps and masses, grouping along walks and driveways, and will fit into almost any ornamental planting.

For individual specimen trees there are few more hand-some than the Cedars, some of the Cypress, and the Sequoia. The Monterey and Arizona Cypress are invalu-able for windbreaks and large hedges. When planted for specimens, the Conifers should never have the lower branches removed, as it robs them of their symmetry. Nearly all the Conifers are field grown and are taken from the field with a ball of earth on the roots wrapped in hurlan such plants being designated as "halled" in

in burlap, such plants being designated as "balled' description below. in

description below. If you have a particular location to fill in with one or more shrubs, or trees and are undecided what to use, write us, describing the place, and we will very gladly

write us, describing the place, and we will very gladly offer suggestions and advice. Five plants or trees are sold at the ten rate where the ten rate is quoted. Heights given refer to usual ultimate height, which may not be attained for years. Your attention is drawn to our Ornamental Planting Service which is explained fully on page 36.

#### CEDRUS. Cedar

The true Cedars are among the most beautiful ever-green trees and are particularly adapted to almost all of the Pacific Coast region. They make wonderful speci-mens planted by themselves, but should be given plenty of room to spread out. Some of the finest avenues in California are majestically lined with the graceful Deodars.

Cedrus Deodara, "Deodar." 50 ft. A magnificent and Cedrus Deodara. "Deodar." 50 ft. A magnificent and stately evergreen conifer of towering pyramidal form, from the Himalaya mountains. Foliage beautiful silvery green. One of the most handsome trees for the lawn. An excellent tree for broad avenues. The most rapid grower of all Cedars. Balled, bluish type. 2 to 6 ft., \$1.25 per foot; 6 to 7 ft., \$10.00 each.

Cedrus Libani. "Cedar of Lebanon." 50 ft. A native of Western Asia, famed in Biblical lore, which makes a tall pyramidal tree resembling the Deodar when it has attained good size, but with darker foliage and more open irregular habit. A beautiful tree of stately dimensions which will thrive in any good location. Balled, 5 to 6 ft., \$5.00; 4 to 5 ft., \$4.00.

#### **CRYPTOMERIA.** Plume Cypress

Cryptomeria japonica elegans. "Plume Cypress." 12 **cryptomera japonica elegans.** Filme Cyptess. 12 ft. A low dense, bushy tree with spreading horizontal branches and soft wavy foliage, bright green changing to bronzy red in the fall and winter. Balled, 3 to 4 ft., \$2.50; 2 to 3 ft., \$2.00; 1 to  $1\frac{1}{2}$  ft., \$1.00.

#### CUPRESSUS. Cypress

Medium sized, dense, bushy evergreens, usually of rapid growth and easy culture, thriving over a wide range. Two of the species we list are much used for windbreak planting.

**Cupressus arizonica.** "Arizona Cypress." 40 ft. A beautiful bluish-green cypress of narrow pyramidal form from the mountains of Arizona and Northern Mexico. A handsome ornamental tree for hot dry sections and when planted in hedge form makes an excellent thick windbreak. Potted, gallon containers, 3 to 5 ft., 85c each, \$7.50 per 10; 2 to 3 ft., 40c each, \$6.50 per 10; quart containers, 2 to 3 ft., 40c each, \$3.50 per 10, \$30.00 per 100; flats of 100. \$5.00. 100, \$5.00.

Cupressus guadalupensis glauca. "Guadaloupe Cypress." 30 ft. A rare species from the Guadaloupe Islands, mak-ing a beautiful large spreading tree with drooping slender branchlets, and bright glaucous blue foliage. The blue color of the foliage makes it a very attractive tree. Grafted plants, gallon containers, 3 to 4 ft., \$1.50.

DWARF EVERGOLDEN ARBORVITAE Cedrus Deodara at the Right

#### A GROUPING OF CONIFERS Hardy Evergreens are Very Effective When Massed

**Cupressus macrocarpa.** "Monterey Cypress." 40 ft. The well-known picturesque native California cypress. Widely planted and used for hedge, shade trees and windbreaks. When young it withstands pruning, and may be formed into a low, compact or tall hedge, as desired. Potted, gallon containers, 4 to 5 ft., 85c each, \$7.50 per 10; 2 to 3 ft., 75c each, \$6.50 per 10; quart containers, 2 to 3 ft., 40c each, \$3.50 per 10, \$30.00 per 100; flats of 100, \$3.00.

Cupressus sempervirens. "Italian Cypress." 60 ft. A tall slender tree with erect branches, having a pillar or columnar effect. A useful subject for gateways, arches, tall borders, etc. Our trees are the true narrow type, grown from cuttings. Boxed, 10 to 12 ft., \$10.00; in tubs, 8 to 10 ft., \$6.00; potted in 5 gallon containers, 7 to 8 ft., \$4.00; 6 to 7 ft., \$3.00; 5 to 6 ft., \$2.50; balled, 4 to 5 ft., \$1.50; 3 to 4 ft., \$1.25; potted in gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; flats of 100, \$15.00.

**Cupressus torulo**sa majestica. "Bhutan Cypress." 20 to 50 ft. A tall pyramidal tree of vigorous growth, with drooping branchlets and dense soft green foliage. A beautiful specimen tree. Balled, 5 to 6 ft., \$4.00; 4 to 5 ft., \$3.00; 3 to 4 ft., \$2.50.

#### CUPRESSUS. Lawson Cypress

The Lawson Cypress group includes many fine conifers particularly adapted to all parts of California, with the exception of the hot desert portions. All species have the foliage in flat branchlets, are usually quite dense and symmetrical and make dwarf or comparatively small trees. They do not attain the heights given below for many years.

many years. Cupressus Lawsoniana alumi. "Blue Lawson Cypress." 12 ft. This is the most popular Lawson Cypress we grow and the specimen plants in our nursery always draw much admiration from visitors, because of the beautiful metallic silvery blue color of the foliage and the symmetrical habit of growth. The branchlets are flattened, are very close together and the plant forms an upright pointed column. It thrives anywhere on the coast and in all but the very hot sections of the interior. Ultimately it reaches a height of 12 or 15 feet, but grows slowly and does not reach this size for many years. Fine specimens, balled, 3 to 4 ft., \$4.00; 2½ to 3 ft., \$3.00; 2 to  $2\frac{1}{2}$  ft., \$2.50;  $1\frac{1}{2}$  to 2 ft., \$2.00.

Specifically, s2.50;  $1\frac{1}{2}$  to 2 ft., \$2.00. **Cupressus Lawsoniana argentea.** "Silvery Lawson Cypress." 12 ft. A graceful type with close compact branches which droop outward slightly at the tip. The foliage is bright green with a silvery sheen. Balled, 2 to  $2\frac{1}{2}$  ft., \$2.25;  $1\frac{1}{2}$  to 2 ft., \$1.75. Cupressus Lawsoniana pendula. "Weeping Cypress."

Cupressus Lawsoniana pendula. "Weeping Cypress." 20 ft. A beautiful tree for specimen planting. Itas graceful pendulous branches, with lustrous silvery-green foliage. Balled, 5 to 6 ft., \$5.00; 4 to 5 ft., \$3.00.

#### JUNIPERUS. Junipers

The Junipers comprise a large and varying group of small or dwarf trees, including trailing forms which make a spreading mat of green on the ground; wide spreading, semi-prostrate varieties with horizontal branches; dwarf pyramidal or columnar forms; and good sized trees. They often show two types of foliage on the same plant, one needle-like, and the other in the form of scales. They do well everywhere but in the very hot dry sections, and varieties may be selected for almost every location.

Juniperus californica glauca. "California Juniper." 8 ft. Handsome pyramidal tree of small to medium size. The juvenile foliage is a beautiful silvery bluish green, becoming darker green as the plant becomes larger. Un affected by heat, cold, or drouth. Balled, 2 to 3 ft.,  $$2.00; 1\frac{1}{2}$  to 2 ft., \$1.50; 1 to  $1\frac{1}{2}$  ft., \$1.25.

Juniperus chinensis albo-variegata. "Whiteleaf Chinese Juniper." 10 to 20 ft. A dwarf form, conical in shape, very compact and symmetrical. The bluish green foliage is tipped profusely with creamy white branchlets. Balled, 2 to 3 ft., \$2.50;  $1\frac{1}{2}$  to 2 ft., \$1.50.

Juniperus chinensis femina. "Reeves Juniper." 20 ft. A good sized small tree, loosely pyramidal, with slender horizontal branches, slightly drooping at the tips, and light green foliage. Perfectly hardy anywhere except in very hot dry sections. Balled, 5 to 6 ft., \$6.00; 4 to 5 ft., \$4.00.

Juniperus chinensis mascula. "Pyramidal Chinese Juniper." 20 ft. Similar to the above but more dense and compact with darker blue-green foliage. A fine, medium sized, fast growing pyramidal tree for all but desert sections. Balled, 4 to 5 ft., \$4.00; 3 to 4 ft., \$2.50.

Juniper chinensis neaboriensis. "Conical Chinese Juniper." 20 ft. The wonderful blue color of this variety is unequalled among the evergreens. It makes an upright, pyramidal tree and grows quite rapidly. Balled, 5 to 6 ft., \$6.00; 3 to 4 ft., \$2.50.

Juniperus chinensis Pfitzeriana. "Pfitzers Juniper." 8 ft. One of the finest Junipers in cultivation. Has bushy widespread horizontal branches, and forms an immense flat irregular head of bluish green foliage, very graceful in outline, about 6 to 8 feet in height and the same distance across. Balled, 4 to 5 ft. spread, \$5.00; 3 to 4 ft., \$4.00; 2 to 3 ft., \$2.50.

Juniperus chinensis procumbens. "Trailing Chinese Juniper." A prostrate creeping variety with dense compact blue-green foliage. Very hardy. Balled, 3 to 4 ft. spread, \$5.00; 2 to 3 ft., \$3.00.

Juniperus communis. "Common Juniper." 10 to 20 ft. A bushy upright tree with many branches and soft grayish-green foliage, forming a broad dense head. Fast growing. Balled 4 to 5 ft., \$3.00; 3 to 4 ft., \$2.50; 2 to 3 ft., \$2.00.

JUNIPER SABINA TAMARISCIFOLIA Prostrate Juniper, Very Effective for Corners and Foregrounds

#### LIBOCEDRUS DECURRENS The Incense Cedar Thrives Over a Wide Range

Juniperus communis depressa, "Prostrate Juniper." A handsome low growing Juniper, rarely exceeding 2 to 3 feet in height, but attaining a spread of 12 to 15 feet. Beautiful silvery bluish-green foliage, very dense. Balled, 3 to 4 ft. spread, \$4.00; 2 to 3 ft., \$3.00;  $1\frac{1}{2}$  to 2 ft., \$2.00. 3 to 4 ft. spread, \$4.00; \$2.00; 1 to  $1\frac{1}{2}$  ft., \$1.50.

Juniperus excelsa stricta. "Greek Juniper." 6 ft. Juniperus excetsa stricta. Greek Juniper. 6 ft. A dwarf compact shrub, decidedly conical in form with grayish-green glaucous foliage. Grows slowly. Balled, 3 to 4 ft.,  $$4.00; 2\frac{1}{2}$  to 3 ft., \$3.50; 2 to  $2\frac{1}{2}$  ft., \$2.50; $1\frac{1}{2}$  to 2 ft., \$2.00; 1 to  $1\frac{1}{2}$  ft., \$1.50.

Juniperus hibernica fastigiata. "Narrow Irish Juniper." S ft. A very beautiful form of the Irish, growing more slowly; shape very narrow and erect like Italian Cypress, and glaucous blue-green in color. A very attractive coni-fer for using near columns and doorways, where great height is not desired. Balled, 3 to 4 ft.,  $$5.00; 2\frac{1}{2}$  to 3 ft., \$3.00; 2 to  $2\frac{1}{2}$  ft.,  $$2.50; 1\frac{1}{2}$  to 2 ft., \$2.00

Juniperus horizontalis. "Creeping Juniper." A low spreading plant with long trailing branches furnished with numerous short branchlets. Does not make as dense a growth as some other prostrate varieties. Balled, 2 to 3 ft. spread, \$2.50.

Juniperus Sabina. "Savin Juniper." A semi-spreading shrub attaining a height of 6 to 8 ft. and about the same width. Can be pruned lower and branches trained to any form desired. Foliage very dark green. Extremely hardy. Balled, 3 to 4 ft., \$3.50; 2 to 3 ft., \$2.50;  $1\frac{1}{2}$  to 2 ft., \$150\$1.50.

Juniperus sabina fastigiata. "Columnar Savin Juniper." 10 ft. An erect columnar shrub, every branch growing upright, with dark green foliage. Does well under a hot sun and grows rapidly. Balled, 3 to 4 ft., \$2.00; 2 to 3  $e^{\pm}$  150 ft., \$1.50.

Juniperus sabina tamariscifolia. A very fine creeping Juniperus sabina tamariscifolia. A very fine creeping Juniper seldom more than one foot high and attaining a spread of 6 or 8 feet, making a dense, compact mat of gray-green foliage which never changes color. Balled, 2 to  $2\frac{1}{2}$  ft. spread, \$3.00;  $1\frac{1}{2}$  to 2 ft., \$2.50; 1 to  $1\frac{1}{2}$  ft., \$1.50.

Juniperus virginiana, "Red Cedar." 15 to 25 ft. A densely branched, thickly foliaged pyramidal tree, deep rich green most of the year, turning bronze in the fall and winter. Balled, 4 to 5 ft., \$3.00; 2 to 3 ft., \$2.00.

Juniperus virginiana tripartita. "Fountain Juniper." 6 ft. A sturdy, heavy stemmed, semi-spreading, dwarf evergreen, with angular, irregular branches, as wide as it is high. Hardy, almost anywhere. Balled, 4 to 5 ft., \$3.50; 3 to 4 ft., \$2.50; 1 to  $1\frac{1}{2}$  ft., \$1.25.

#### LIBOCEDRUS

Libocedrus decurrens. "Incense Cedar." 25 to 50 ft. A native of the California mountains and one of our first evergreen trees. Makes a tall, narrow, pyramidal or columnar tree with deep green lustrous foliage, very dense and compact. A wonderful tree for general planting, or for lining avenues or drives. Balled, 4 to 5 ft., \$4.00; 3 to 4 ft., \$3.00; 2 to 3 ft., \$2.00 each, \$17.50 per 10.

Libocedrus decurrens compacta. "Globe Incense Cedar." 8 ft. Has the same foliage as Libocedrus decurrens but makes a dense, compact, perfectly round globe. One of the finest dwarf specimen evergreens, originating in our nurseries several years ago. Balled, I to 1½ ft., \$3.00.

#### PINUS. Pine

**Pinus Canariensis.** "Canary Island Pine." 18 ft. One of the most beautiful and permanent of all pines for California. Extremely long needles in large tufts. The new growth is silvery white. Extremely fast growing. Balled, 3 to 4 ft., \$2.50; 2 to 3 ft., \$2.00; gallon containers,  $1\frac{1}{2}$  to 2 ft.. to 2 ft., \$1.00.

to 2 ft., \$1.00. **Pinus Coulteri.** "Big Cone Pine." Southern California. 75 ft. A native California variety with stout branches, pendulous below and ascending above, forming a loose pyramidal head. Needles very long and cones extremely large and ornamental. Does well in almost all parts of California and is very picturesque. Balled, 2 to 3 ft., \$2.00; 1½ to 2 ft., \$1.50; potted, gallon containers, 1 to 1½ ft., \$1.00 each, \$9.00 per 10. **Pinus halepensis.** "Aleppo Pine." 50 ft. A rapid grow-ing pine suitable for quick effects and excellent for cov-ering hillsides. Has dark green foliage and is very hand-5 to 6 ft., \$3.00; 4 to 5 ft., \$2.50; potted, gallon contain-ers, 3 to 4 ft., 75c each, \$6.50 per 10; flats of 100, \$7.50.

SEQUOIA SEMPERVIRENS The Famous California Redwood

Pinus pinea. "Stone Pine." A very picturesque tree growing to 80 feet with long, horizontally spreading branches. When the tree becomes older, the lower branches. When the tree becomes older, the lower branches disappear and a broad umbrella shape is de-veloped. Has edible seeds. Broad bushy specimens, balled, 3 to 4 ft., \$2.50; 2 to 3 ft., \$2.00; potted, gallon containers,  $1\frac{1}{2}$  to 2 ft., \$1.00 each, \$9.00 per 10.

Pinus radiata. "Monterey Pine." 60 feet. The well-known native species. A handsome tree with bright green foliage and bushy habit when young. The fastest grower of all pines. Valuable for quick effect. Makes a good windbreak, and adapts itself readily to single planting. Balled, 5 to 6 ft., \$2.50; 4 to 5 ft., \$2.00; potted, gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; flats of 100, \$7.50\$7.50.

#### RETINISPORA

Retinispora decussata, 10 ft. A tall, quite narrow, loosely branched tree with soft gray-green foliage. Grows very rapidly and furnishes a narrow column with a grace-ful informal outline. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.25.

Retinispora leptoclada. 8 ft. A dense roundheaded bush, bright green in summer changing to steely bronze color in winter. Because of this unique color change and its round symmetrical shape, a very attractive shrub. Balled, 3 to 4 ft., \$2.50; 2 to 3 ft., \$2.00;  $1\frac{1}{2}$  to 2 ft., \$1.50.

Retinispora squarrosa. "Moss Retinispora." 6 ft. In **Retinispora squarrosa.** "Moss Retinispora." 6 ft. In California grows low, very dense, with feathery spreading branchlets, dark bluish-green in color. Resembles some-what a large clump of soft branching moss. Does best near the coast. Balled, 2 to 3 ft., \$2.00; 1½ to 2 ft., \$1.50.

#### SEOUOIA

Sequoia gigantea. "Giant Sequoia." The famous Big Tree of the Sierras, California's noblest native tree. A trim sturdy tree when young with pale blue-green foliage. Grows fairly rapidly, is beautiful at all ages and makes a majestic specimen for posterity. Established in con-tainers, 2 to 4 ft., \$1.50 per foot.

Sequoia sempervirens. "Redwood." 150 ft. The wellsequoia sempervirens. "Redwood." 150 ft. The well-known California Redwoods are among the largest and most picturesque trees known. They form handsome specimens, and are unexcelled for avenue, park, and gar-den. Potted, gallon containers, 1½ to 2 ft., \$1.25 each, \$11.00 per 10.

#### TAXUS. Yew

Taxus baccata. "English Yew." 25 to 50 ft. The well known ancient Yew of England. Slow growing but attains considerable size in time. Very dark green attains considerable size in time. Very dark foliage, and can be trimmed to any desired shape. inch pots, 85c each, \$7.50 per 10. In 4

**Taxus baccata Dovastoni.** 15 ft. A wide spreading Yew, branches drooping at the tips. Dull green foliage. Potted, gallon containers, 2 to 3 ft., \$2.00; 4 inch pot, 12 to 15 in., 75c.

Taxus baccata Washingtoni. "Golden Washington Yew." The growth is similar to the English Yew but more up-right and the foliage is variegated with gold. 4 inch pots 8 to 12 inches, 75c.

#### THUYA. Arborvitae

These symmetrical, compact, hardy evergreens have dense flat branches and are usually pyramidal in habit. They are usually quite dwarf, altho the different species vary in height. For formal gardens, for corners of walks, and for flanking entrance ways they are appropriate.

Thuya beverleyensis. "Golden Column Arborvitae." 15 to 20 ft. The tallest and stateliest of the Chinese Arborvitaes, growing into a narrow column of golden green foliage, and particularly effective for specimen planting or for pairing on either side of a doorway. A noble and beautiful conifer. Balled, 6 to 7 ft., \$7.50; 5 to 6 ft., \$6.00; 4 to 5 ft., \$5.00; 3 to 4 ft., \$4.00.

Thuya elegantissima. "Golden Pyramid Arborvitae." 12 to 15 ft. Somewhat similar to the Beverleyensis, but does not grow as tall and has a broader, more bushy base, ascending to a sharp point at the top. The green foliage is tipped with an attractive golden bronze during most of the year, becoming bright yellow in the spring. A rare and very fine plant. Balled, 4 to 5 ft., \$5.00; 3 to 4 ft., \$4.00; 2 to 3 ft., \$3.00.

Thuya orientalis. "Chinese Arborvitae." 12 ft. A medium sized conifer with bright olive green foliage form-ing a dense broad pyramid. Does not attain the size men-tioned above for a number of years, and can be consid-ered a dwarf form. Balled, 3 to 4 ft.,  $$3.00; 2\frac{1}{3}$  to 3 ft., \$2.50 each, \$20.00 per 10; 2 to  $2\frac{1}{2}$  ft., \$2.00 each, \$17.50per 10;  $1\frac{1}{2}$  to 2 ft., \$1.50 each, \$12.50 per 10.

Thuya orientalis aurea nana. "Berckman's Dwarf Ever-golden Arborvitae." 6 ft. Of dwarf habit, compact and symmetrical, almost globular as it gets older. All the branchlets are tipped with a bright golden tint, which is held all thru the year. Can be used as a porch plant in tubs for a limited time and then planted out. Make excel-lent lawn specimens. This is possibly the most popular variety in our entire list of conifers. Balled, 3-year,  $2\frac{1}{2}$ to 3 ft., \$5.00; 2 to  $2\frac{1}{2}$  ft., \$3.50;  $1\frac{1}{2}$  to 2 ft., \$2.50per 10; 12 to 15 inches, \$1.25 each, \$11.00 per 10; 8 to 12 inches, \$1.00 each, \$9.00 per 10. Thuya orientile medatorie 15 tf. A heantiful variety

Thuya orientalis meldensis. 15 ft. A beautiful variety Inuya orientalis meldensis. 15 ft. A beautiful variety of medjum size, with a distinct and pleasing shade of soft bluish green. Compact, rounded and symetrical. One of the best Arborvitaes. Balled, 4 to 5 ft., \$5.00; 3 to 4 ft.,  $$3.00; 2\frac{1}{2}$  to 3 ft., \$2.50; 2 to  $2\frac{1}{2}$  ft.,  $$2.00; 1\frac{1}{2}$  to ft., \$3.00; 21 2 ft., \$1.25.

Thuya Pyramidalis. 15 ft. Of upright narrow col-umnar habit, with dense foliage, bright green at all times during the year. A valuable and effective tall-growing evergreen for formal effect. Balled, 5 to 5 ft., \$4.00; 4 to 5 ft., \$3.00; 3 to 4 ft., \$2.00; 2 to 3 ft., \$1.25. Thuya Pyramidalis.

Thuya Ramseys Hybrid. 15 ft. A heavy, dense, dark green column of thread-like foliage, growing more rapidly than any other conifer in our list. Not affected by heat or drouth. Balled, 6 to 7 ft., \$5.00; 5 to 6 ft., \$4.00; 4 or drouth. Ba to 5 ft., \$2.50.

Thuya Rosedale Hybrid. 8 ft. A neat, compact little shrub of rounded outline, and bright soft bluish-green foliage. Fine when young but liable to spread open as it gets older. Balled, 1 to  $1\frac{1}{2}$  ft., \$1.25.

THUYA BEVERLEYENSIS A Stately Golden Column

# Select Evergreen Shrubs

Evergreen shrubs are the basis of all ornamental planting on the Pacific Coast, and all of the most valuable varieties, large and small, will be found in the following section. While foliage is the prime factor in evergreen shrubs, many plants are also desirable for their beautiful flowers or bright colored harrias

It is impossible for us to list in our catalog all sizes of trees and shrubs we have in stock, or even all varie-ties, and if customers who do not find listed sizes and ties, and if customers who do not hnd listed sizes and varieties wanted will write us concerning their wants, we will take pleasure in quoting and fully describing what we have. A visit to our salesyard will offer planters a chance to see many large specimen plants in containers not listed herein. Upon request we will gladly furnish suggestions and advice of any kind concerning ornamental plantings.

The gallon and 5-gallon containers mentioned in the descriptions are of tin, and weigh about 9 and 50 lbs. each, respectively. Some plants are in 4-inch clay pots, weighing not over 4 lbs. Five plants or trees are sold at the ten rate where the

ten rate is quoted. Heights given refer to usual ultimate height, which may not be attained for several years. See planting instructions for ornamentals on page 64.

#### ABELIA

Abelia grandiflora. (A. rupestris). 6 ft. One of the prettiest shrubs. Its arching stems are clothed with dark glossy, evergreen leaves. Small fragrant, tube-like flow-ers, shaded a light rose on the outside and white inside, are borne nearly every month in the year. Balled, 3 to 4 ft., \$2.00 each, \$17.50 per 10; 2 to 3 ft., \$1.50 each, \$12.50 per 10; in gallon containers, 2 to 3 ft., 55 each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### ABERIA. Kei Apple

Aberia caffra. "Kei Apple." South Africa. 10 ft. Abera carra. Wel Apple. South Africa. 10 ft. A tall growing shrub with rich green foliage, and long stiff thorns. It bears a bright golden yellow, edible fruit about one inch in diameter. Hardy above 20 degrees F. In gallon containers,  $1\frac{1}{2}$  to 2 ft., \$1.00.

#### ARBUTUS. Strawberry Tree

Arbotios. Strawberry Tree." Europe. 10 ft. A bushy spreading, medium sized shrub with rich green foliage very similar to California Holly. Has many de-lightful little pearly white bell-shaped flowers in su mer, followed by clusters of brilliant red strawberry-like fruits, ripening about Christmas time. A beautiful shrub and very hardy, as it stands heat, cold and drouth. In gallon containers,  $1\frac{1}{2}$  to 2 ft., \$1.00; 4-in. pots, 75c.

#### AZARA

Azara microphylla. Chile. 8 ft. A graceful shrub with Azara microphylia. Chile. 6 ft. A graceful shrub with arching pendulous branches and small dark green, glossy leaves. Has minute white flowers, followed by orange berries. It is very hardy and stands a reasonable amount of hot, dry weather. Fine for covering walls or fences. In gallon containers, 75c each, \$6.50 per 10.

#### ABUTILON. Flowering Maple

Abutilon, Flowering Maple." 6 ft. An open bush with long branches from which hang at almost all seasons of the year lovely orange bell-shaped flowers. The foliage resembles small maple leaves. Does best in partial shade. In 4-in. pots, 60c.

#### ABELIA GRANDIFLORA In the Center, with Italian Cypress and Boxwood at the Left, Abelia Being a Useful Evergreen Against the House or in the Open

ARBUTUS UNEDO Fruit, Flowers, and Foliage of the Strawberry Tree

#### BURSARIA

Bursaria spinosa. Australia. 8 ft. A tall, rather spiny open shrub with arching branches drooping at the ends. Leaves rather small, glossy, dark green. An excellent hot, dry climate shrub. In gallon containers, 1 to  $1\frac{1}{2}$  ft., 75c each, \$6.50 per 10.

#### BERBERIS. Evergreen Barberry

Fine ornamental shrubs of moderate size, having yellow flowers in spring. The leaves are prickly or holly-like, and vary in size with each variety.

Howers in spring. The teach variety, it and yarry in size with each variety. Berberis aquifolium. "Mahonia aquifolium." Pacific Coast. 6 ft. Commonly known as the Oregon Grape. A handsome ornamental shrub with dark, lustrous, spiny-toothed green leaves; yellow flowers in dense clusters appear in the spring, followed by purplish berries; thrives in most any kind of soil, but partial shade and ample moisture result in brighter and glossier foliage. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.75; 1 to  $1\frac{1}{2}$  ft., \$1.25. Berberis Darwini. "Darwin's Barberry." Chile. 5 ft. A highly ornamental small shrub with slender branches. Leaves small, rich, glossy green; in winter season leaves turn bright red. Golden yellow flowers of spring are followed by purple berries; bush prickly, like holly. In gallon containers, 1 to  $1\frac{1}{2}$  ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10. Berberis gagnepaini. China. 6 ft. A bushy plant with

**Berberis gagnepaini.** China. 6 ft. A bushy plant with arching branches and long toothed, glossy green leaves wavy at the margins, orange flowers, and blue black berries. In gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00; 4-in. ries. In pots, 60c.

pots, 60c. Berberis Thunbergii. "Japanese Barberry." 4 ft. A low growing, very hardy deciduous shrub with small leaves, which turn scarlet in the fall. Bears beautiful bright red berries. In California almost evergreen. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10. Berberis Wilsonae. China. 4 ft. A hardy handsome shrub, with small gray green foliage, turning to a brilliant reddish bronze in the fall. Flowers golden yellow, in dense clusters; berries in fall, salmon-red. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### BUDDLEIA

Buddleia asiatica. "Butterfly Bush." China. 8 ft. A fast growing plant with silvery green foliage, bear-ing in the winter, many slender spikes of deliciously fragrant white flowers. 3 to 6 inches long. Hardy and easily grown. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10.

"Summer Lilac." Buddleia superba. China. 8 feet. Buddleia superba. "Summer Lilac." China. 8 feet. A fast growing, spreading shrub; remarkable for the long panicles of fragrant rose-purple flowers borne in great profusion in the late summer. In gallon containers, 3 to 4 ft., 75c each, \$6:50 per 10.

#### BUXUS. Box

"Japanese Box." Buxus japonica. "Japanese Box." 4 ft. A beautiful shrub of low, dense, compact growth, much used as trimmed specimens for porch and garden decorations. A lighter green than the Buxus sempervirens. Trimmed pyramids, balled,  $2\frac{1}{2}$  to 3 ft., \$3.50; 2 to  $2\frac{1}{2}$  ft., \$3.00; in green tubs, \$1.50 each additional; 4 in. pots, 50c each, \$4.00 per 10, \$30.00 per 100; flats of 100, \$7.50. Buxus sempervirens. "Boxwood." 3 ft. Formal shrub of dense, slow growth; trimmed, they are unsurpassed as specimen plants for porch or lawn decorations. Trimmed port balled,  $2\frac{1}{2}$  to 3 ft. \$00 trimmed globes, 146 4 ft. A beautiful Buxus japonica.

specimen plants for porch or lawn decorations. Trimmed pyramids, balled,  $2\frac{1}{2}$  to 3 ft., \$3.00; trimmed, globes,  $1\frac{1}{2}$  to 2 ft., \$3.50; 15 to  $18 \cdot in.$ , \$3.00; in 9-in. boxes, 2 to 3 ft., \$1.50; flats of 100, \$7.50.

Buxus sempervirens suffruticosa. "Dwarf Box." 2 ft. The widely known dwarf form. Foliage small, deep green and dense. Trimmed globes, in 5-in. pots, 8 to 1'2-in., \$1.00 each, \$9.00 per 10.

#### CALLISTEMON. Bottle Brush

**Callistemon speciosa.** Pacific Islands. 10 ft. Commonly known as "Bottle Brush." The beauty of these plants lies in their long, red anthers, which, projecting along the stem, form a cylindrical flower similar in shape to a bottle brush. The shrub is hardy and of rapid growth, thriving even in alkali soil. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10.

#### CATHA. Kat

Catha edulis. "Kat." 8 ft. An upright growing shrub of attractive appearance from Arabia, where the leaves and twigs are sold commercially and eaten for their strengthening and recuperative properties. In gallon containers,  $1\frac{1}{2}$  to 2 ft., \$1.00.

#### CASSIA

Cassia artemesoides. Australia. 8 ft. A pretty shrub with finely cut silvery-gray foliage and clear yellow, sweet-scented flowers; will stand any amount of drouth. In 4-in. pots, 1 to  $1\frac{1}{2}$  ft., 75c.

Cassia floribunda. Argentina. 6 to 10 ft. Very fast growing with bright green divided leaves and clusters of bright yellow pea-like flowers during summer and autumn. Should be given plenty of room. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Cassia nainobensis. 8 ft. A tall slender bush with large luxuriant bright green foliage. Grows very rapidly and in late winter every branch is crowned with great clusters of bright yellow flowers. In gallon containers, 2 to 3 ft., \$1.00.

#### CAMELLIA

Camellia japonica. Japan. 6 to 10 ft. These very popular and beautiful shrubs, with their exquisite and showy wax-like flowers so admired in the winter, were formerly imported and are now very rare. We have two of the most beautiful colors—Pink Perfection, very double light pink, and Red and White Variegated, double creamy white flowers, striped and flecked with red. Balled plants. 1½ to 2 ft., \$5.00.

#### CEANOTHUS

Ceanothus thyrsiflorus. "Wild Lilac," or "Buckthorn." 6 to 10 ft. In the early spring, the California foothills are covered with the delightful, feathery, light blue flowers of this much admired native plant. Grows rapid-ly, has spiny, angular branches, and will do well in rocky dry locations. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each. \$4.00 per 10.

#### CESTRUM

Cestrum aurantiacum. "Orange Cestrum." Guatemala. 8 ft. A tall slender bush bearing on top in loose nodding clusters tubular flowers of orange yellow. The plant is semi-reclining and should have a wall or fence to lean against. In gallon containers, 1½ to 2 ft., 75c; 4-in. pots, 50c.

Cestrum elegans. "Purple Cestrum." Mexico. 8 ft. Similar to the above but more sturdy and with long red-dish-purple flowers. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c; 4-in. pots, 50c.

#### **CERCOCARPUS.** Mountain Mahogany

Cercocarpus betulaefolius. "Mountain Manogany." 25 ft. A large shrub, native to the California mountains, with gray beech-like leaves. Grows very rapidly and stands any amount of heat and drouth. Should be cut back to make them dense. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-inch pots, 50c each, \$4.00 per 10.

#### CHORIZEMA

Chorizema ilicifolia. Australia. 3 ft. An attractive shrub with slender drooping branches, holly-like leaves and orange red flowers in loose racemes. It makes a low dense mat of foliage and blooms continuously throughout the winter and spring. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### CHOISYA, Mexican Orange

Choisya ternata. "Mexican Orange." 6 ft. Leaves bright, glossy green. Blooms are snow-white, sweetly scented, produced abundantly in spring, somewhat re-sembling orange blossoms. A dense globular shrub. In 4-in. pots, 50c each, \$4.00 per 10.

#### CISTUS. Rockrose

Cistus ladaniferus maculatus "Brown-eyed Rockrose. Spain. 3 ft. Low and spreading, with rather sticky fol-Span. 5 ft. Low and spreading, with rather streky for-iage, and every morning in the spring and summer it is covered with pure white flowers, three inches across, with a ring of golden stamens in the center and a blotch of brownish crimson at the base of each petal. Likes full sun. In 4-in. pots, 75c each, \$6.50 per 10.

"Purple Rockrose." Greece. Cistus villosus. Listus vinosus. rurple Rockrose." Greece. 4 ft. More upright than the above with downy grayish green leaves and bright rosy purple flowers. In gallon con-tainers,  $1\frac{1}{2}$  to 2 ft., \$1.00.

#### COPROSMA

**Coprosma Baueri.** New Zealand. 4 ft. Handsome low-growing shrub. The round leaves are very glossy, as if varnished. Desirable as a bushy border around the porch or wall. Balled, bushy, 1 to  $1\frac{1}{2}$  ft., \$1.00 each. \$9.00 per 10; in gallon containers, 1 to  $1\frac{1}{2}$  ft., 60c each, \$5.00 per 10; 4-in. pots, 40c each, \$3.00 per 10.

#### CORONILLA

**Coronilla glauca.** Europe. 4 ft. A beautiful, bloom-ing shrub with fine gray-green foliage. Flowers pea-like, deep golden yellow, intensely fragrant by day but scentless at night. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c.

Coronilla glauca variegata. Exactly the same as the preceding but the foliage is silver and green. In 4-in. pots, 75c.

CAMELLIA—PINK PERFECTION Rare and Beautiful, with Exquisite Waxy Flowers

#### COTONEASTER

An exceedingly desirable group of shrubs largely used for their foliage effects in massing and banking, altho many of them are doubly valuable for their brightly col-ored berries, borne in fall and winter. As a rule, they are very hardy and fast growing, and range from small to medium in height.

Cotoneaster acuminata. Himalayas. 6 ft. Erect growing shrub; leaves pointed, medium size. Flowers pinkish-white, followed by large showy red berries. In 5 gallon containers, 3 to 4 ft., \$2.00; gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c.

Cotoneaster buxifolia. Himalayas. 2 ft. Upright grow-ing shrub, with dark green foliage, and clusters of bright red berries. One of the most decorative varieties. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Cotoneaster Franchetti. China. 6 ft. A spreading. fast growing variety with upright arching branches, medi-um sized leaves, dark green on top, silvery beneath. Many orange-red berries scattered over the branches in the winter. One of the best. Balled, very bushy, 2 to 3 ft., \$1.50 each, \$12.50 per 10; in gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

"Rock Cotoneaster." Cotoneaster horizontalis. China. Cotoneaster horizontalis. "Rock Cotoneaster." China. 2 ft. One of the best trailing shrubs, growing flat on the ground. Leaves very small, dark green. Bears great quantities of small, bright red berries, producing a beaut-iful effect. Half deciduous. In gallon containers, 15 to 18-in. 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Cotoneaster microphylla, "Rockspray." Himalayas. 4 ft. A low growing dense shrub with small round leaves, shining dark green in color. Berries bright red, borne along the stem. In gallon containers, 15 to 18-in. 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10. Cotoneaster microphylla thymifolia. 2 ft. Dwarfish in growth. A variety of the microphylla but flowers and berries email.er. compact growth with small leaves. In

berries smaller; compact growth with small leaves. In gallon containers, 15 to 18-in., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

4-in. pots, 50c each, \$4.00 per 10. **Cotoneaster pannosa**, "Silverleaf Cotoneaster." Him-alayas. 8 ft. Possibly the best and most beautiful of this group. The foliage is a soft gray green, and the under sides of the leaves have a silvery color. White flowers in spring followed by great masses of dull silvery red berries, which remain all fall and winter. Fast grow-ing and of graceful loose habit. In 5 gallon containers, 5 to 6 (t., \$2.50; 4 to 5 ft., \$2.00; balled, 3 to 4 ft., \$1.50 each, \$12.50 per 10; gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

**Cotoneaster** salicifolia. "Willowleaf Cotoneaster." China. 2 ft. A fast growing creeping variety with dark green foliage and graceful, horizontal, drooping branches. White flowers and many red berries. In gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; 4-in. pots, 75c 1 to  $1\frac{1}{2}$  ft., \$1.00 each, \$6.50 per 10.

#### DAPHNE

Daphne odora. Japan. 4 ft. This beautiful evergreen shrub is very attractive at all times during the year with shrup is very attractive at all times during the year with its bright green foliage, but its most attractive feature is the intense fragrance of the flowers, which are borne in small dense terminal heads over the bush during winter. Formerly imported from Japan, and now very scarce. Flowers white. Balled.  $1\frac{1}{2}$  to 2 ft., \$4.00; 1 to  $1\frac{1}{2}$  ft., \$3.00.

Daphne odora variegata. 4 ft. Identical to the pre-ceding except that it has variegated foliage and pink flowers. Balled,  $1\frac{1}{2}$  to 2 ft., \$4.00; 1 to  $1\frac{1}{2}$  ft., \$3.00.

#### DIOSMA. Breath of Heaven

**Diosma alba.** "Breath of Heaven." Africa. 3 ft. A dwarf, bushy, compact shrub with fine heather-like foliage, very aromatic and sweet scented. In the spring, it has many minute star-shaped flowers on the ends of the twigs. For a low shrub in foreground plantings, it is fine. Balled, I to 2 ft., 1.25 each, 1.00 per 10; in gallon containers, I to  $1\frac{1}{2}$  ft., 75c each, 6.50 per 10; 4-in. pots, 50c each, 4.00 per 10.

#### DURANTA

Duranta plumieri. "Golden Dew Drop." "Skyflower." Guatemala. 10 ft. A rather tender shrub with light green leaves, bearing in the summer long racemes of beautiful light-blue flowers, followed by yellow berries which remain all winter. In gallon containers, 2 to 3 ft., 75c; 4-in. pots, 50c each, \$4.00 per 10.

Duranta plumieri alba. 10 ft. Exactly the same as the above except that the flowers are white. In gallon containers, 2 to 3 ft., 75c.

#### ERICA. Heather

The Heathers are among the most beautiful of the evergreen flowering shrubs and in groups and masses, or even single specimens, lend a striking appearance to any planting. Most of the Heathers bloom in the winter when other flowers are scarce but some varieties bloom in spring and summer.

Erica australis. 6 ft. One of the showiest of the Heathers, growing rather tall and slender and covering itself from February to May with bright rosy purple flowers. Balled, 2 to 3 ft., \$1.75.

Erica Bowieana. 4 ft. Quite different from most of the Heathers but fascinatingly beautiful. Has slender upright branches of blue gray foliage, and hanging daintily up and down their length are the flowers, long, slender white tubes, flecked with black stamens at the end. Balled, 2 to 3 ft., \$1.75.

Erica charlesiana. 4 ft. Very similar to the above but the flowers are light pink. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.75.

Erica Felix Faure. 3 ft. The most novel and striking of all Ericas, bearing almost the year round, its thick clusters of large, tubular rose-red flowers which resemble fire crackers in shape and color. Is at home in both cool and hot situations. Exquisitely beautiful but not a long lived plant. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.50; I to  $1\frac{1}{2}$  ft., \$1.25.

Erica hyalina. 3 ft. A dwarf form on which every branch in winter and spring is a solid spike of long tubular flowers of a soft salmon pink color. Balled, 1 to  $1\frac{1}{2}$  ft., \$1.25.

Erica lusitanica. "Spanish Heather." 4 ft. A new pure white heather so covered with blooms from February to April as to resemble snow. A strong vigorous grower, doing well under a wide range of climatic conditions. Balled, 1 to 2 ft., \$1.25; in 4-in. pots, 50c each, \$4.00 per 10.

Erica mediterranea. "Mediterranean Heath." 4 ft. A compact, bushy plant with stiff stems, very hardy; has purplish pink flowers in late spring from March to June. Easier to grow than most Heathers. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.75; 12 to 15-in., \$1.25; in 4-in. pots, 50c each, \$4.00 per 10.

Erica mclanthera. 5 ft. The best known and most widely planted of the Heathers, and it is indeed one of the most beautiful and desirable of winter flowering shrubs. From November to March, the plants are a solid mass of small, rosy lavender flowers, and are exceedingly decorative during the rest of the year. Does well, both near the coast and in the interior. Fairly hardy. All plants sold during the period mentioned above are in bloom. Balled, 3 to 4 ft., \$2.00; 2 to 3 ft., \$1.25; 4-in. pots, 50c each, \$4.00 per 10.

Erica melanthera rubra. 5 ft. A rare form of Erica Melanthera with reddish purple flowers, very much darker than the usual type and as near everblooming as any Heather we have. A solid mass of bloom in the summer and fall and has some flowers all the year. Balled,  $1\frac{1}{2}$  to 2 ft., \$2.00; in 4-in. pots, 75c.

Erica persoluta alba. 4 ft. A very bushy, compact shrub completely covered during its blooming season, from February to May, with small, bell-shaped, pinkish white flowers. A low growing plant of striking appearance. Balled, 2 to 3 ft., 1.75; 1 to  $1\frac{1}{2}$  ft., 1.25; in 4-in. pots, 50c.

**Erica persoluta rosea.** 4 ft. This variety grows very similar to E. Melanthera but the flowers are more brilliant in color, being a vivid hue of deep rose pink and are borne very *s*bundantly. One of the newer and most fascinating of all Heathers. Blooms from February to April. Balled, 1 to  $1\frac{1}{2}$  ft., \$1.25 each, \$11.00 per 10; in 4-in. pots, 50c.

Erica stricta. 2 ft. One of the lower growing heathers with numerous short upright branches. Bears an abundance of bright rosy blooms from September to November. The hardiest of all the Heathers. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.75; 1 to  $1\frac{1}{2}$  ft., \$1.25; 4-in. pots, 50c.

ber. The hardiest of all the Heathers. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.75; 1 to  $1\frac{1}{2}$  ft., \$1.25; 4-in. pots, 50c. Erica translucens. 4 ft. If there is a "showiest" variety in this marvelous group of Heathers, this is it. The plant forms many broad spikes of long rosy pink flowers and the blooms keep opening for months in the winter and spring. Balled, 1 to  $1\frac{1}{2}$  ft., \$1.50; 4-in. pots, 75c.

#### ERYTHRINA. Coral Tree

Erythrina crista-galli. "Coral Tree." Brazil. 10 to 15 ft. A very interesting and rare large shrub or small tree which usually forms a large woody, corky trunk, sending out much new growth in the spring on which are produced a great number of butterfly-like deep crimson flowers. A very showy and beautiful tree. Must be pruned back heavily each fall to produce new growth. In gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00.

#### ELEAGNUS. Oleaster

Eleagnus pungens reflexa. "Silverberry." Japan. 6 ft. A fine spreading shrub with leaves and stems covered with frosty, shiny scales, silvery on upper surface and bronze beneath. Berries are silvery also. In gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; 4-in. pots, 75c each, \$6.50 per 10.

**Eleagnus pungens variegata.** Very similar to the above but the leaves are margined with cream. In gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; 4-in. pots, 75c each, \$6.50 per 10.

#### **ESCALLONIA**

One of the most useful group of plants that we have for producing a thick bank of green verdure. The foliage is always fresh and glossy, and is enlivened in the summer with sprays of flowers, white, pink or red.

**Escallonia alba.** 8 ft. A hardy white bloming variety which is adapted to hot dry situations. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Escallonia langleyensis. South America. 6 ft. A graceful variety producing dense clusters of light pink colored flowers in short racemes at the ends of the branchlets. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Escallonia montevidensis. 8 ft. Large shrub of symmetrical habit, producing pure white flowers in such great profusion as to cover the entire plant. The best of white kinds. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

**Escallonia rosea.** 8 ft. A spreading, branching shrub with handsome bright green foliage and many spikes of bright pink flowers in spring and summer. An excellent shrub for massing and should be pruned often. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### EUGENIA. Brush Cherry

Eugenia Hookeri. Australia. 15 ft. Very similar to E. Myrtifolia (listed below) but with large, darker green leaves. Grows a little more spreading. When trimmed occasionally, makes a very compact and beautiful shrub. Fast growing. Slightly tender. Trimmed pyramids, in 5 gallon containers, 4 to 5 ft., \$3.00; 3 to 4 ft., \$2,50;gallon containers, 3 to 4 ft., \$1.00 each, \$9.00 per 10; 2 to 3 ft., 75c each, \$6.50 per 10.

Eugenia Myrtifolia. "Brush Cherry." Australia. 15 ft. Excellent shrub of tall compact growth; foliage glossy green with a ruddy hue on the new growth; cream colored flowers, followed by edible violet-colored berries. Useful for hedge or may be trained by pruning into pillars or pyramids. Trimmed pyramids, in tubs, 4 to 5 ft., \$4.00; 3 to 4 ft., \$3.00; gallon containers, 3 to 4 ft., \$1.00 each, \$9.00 per 10; 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### EUONYMUS. Evergreen Euonymus

For hedges and low groups or single plants, the varieties of Euonymus are very useful. The different species of E. japonica listed below are all very similar except in the color of the leaves which are variegated in different ways with white, silver and gold.

**Euonymus erecta compacta.** 3 ft. Strong, upright grower; dense habit; medium small, dark green leaves; of easy culture. In gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$6.00.

**Euonymus japonica.** 6 ft. Japan. A useful ornamental with green glossy foliage, standing heat and cold, and easy to grow. Can be used as a spreading plant in a group planting or against the house. When trimmed it makes a wonderful compact plant for tubs. Also used for hedges. Particularly fine for Arizona. Balled, 5 to 6 ft., \$3.00; in green tubs, \$2.00 each additional; in gallon containers, 12 to 15-in., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$400 per 10; flats of 100, \$6.00.

**Euonymus japonica albo-marginata.** 4 ft. The leaves of this variety have a narrow margin of silvery white. Balled, 2 to 3 ft., \$2.00; in gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$8.00.

**Euonymus japonica argenteo variegata.** "Silver margined Euonymus." 8 ft. Leaves are edged and marked with white; grows tall and narrow. Balled, 4 to 6 ft., \$2.50; in gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Euonymus japonica aurea-marginata. "Golden Euony-mus." 4 ft. A variety of dwarf and compact growth; leaves deep yellow toward the edges, bloched in the cen-ter with light and dark green. Balled, 2 to 3 ft., \$2.50;  $1\frac{1}{2}$  to 2 ft.. \$2.00; in gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$8.00.

**Euonymus japonica aurea-variegata.** "Golden Varie-gated Euonymus." 5 ft. Leaves bright golden yellow in center, dark green around edges; of strong, robust habit of growth. Balled. 3 to 4 ft., \$2.50; 2 to 3 ft., \$2.00;  $1\frac{1}{2}$  to 2 ft., \$1.50; in green tubs, \$2.00 each additional; in gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$8.00.

Euonymus japonica viridi-variegata. "Duc de Anjou." **Euonymus japonica viridi-variegata.** "Duc de Anjou." 5 ft. Leaves dark green toward the edges, with markings of light green and pale yellow in the center. A strong grower and because of its beautiful shiny foliage is one of the best varieties for a spreading shrub. Balled, 3 to 4 ft., \$2.50; 2 to 3 ft., \$2.00; in gallon containers, 1 to  $1\frac{1}{2}$  ft., 75c each. \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Euonymus pulchellus. "Small-leaved Euonymus." 1 ft. A dwarf form of the above with small dark green foli-age, growing 1 ft. high. Fine for low hedge. Balled, 8 to 12-in., \$1.00 each, \$9.00 per 10; in 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$6.00.

#### FABIANA

Fabiana imbricata. Peru. 4 to 8 ft. A tall, fast grow-ing shrub resembling Heather somewhat, covered in spring with long lasting spikes of tubular white flowers. Hardy and drouth resistant. In 4-in. pots, 50c each, \$4.00 per 10.

#### GARDENIA. Cape Jasmine

Gardenia florida. South China. "Cape Jasmine." 2 to 4 ft. A beautiful flowering shrub with bright green, glossy foliage. The double, wax-like flowers are ex-quisitely fragrant and always admired. Balled, 1 to  $1\frac{1}{2}$ ft., \$1.50; 10 to 12-in., \$1.00.

#### GENISTA. Broom

A fast growing group of shrubs which brighten up the landscape with their brilliant masses of yellow pea-shaped flowers; valuable as a contrast to solid green shrubbery; unusually hardy and drought resistant.

Genista canariensis. "Canary Broom." A free flowering shrub attaining a height of from 6 to 8 feet. The leaves are small and the bright yellow flowers are produced in great profusion. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Genista fragrans. (Cytisus racemosa) "Sweet Broom" Canary Islands. 6 ft. A delightful spring and summer flowering shrub with many small grass-green leaves and absolutely covered when in bloom with pea-shaped bright yellow flowers. The best of all the Brooms for general use. Balled, 2 to 3 ft., \$1.50; in gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Genista hispanica. (Spartium junceum). "Spanish Broom." Spain. 8 ft. A strong, fast growing shrub with many slender, bright-green branches almost devoid of leaves. Bears almost continuously, large, pea-like, bright yellow flowers very sweetly scented. Hardy, heat loving and drouth resistant. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 4 ft., 7: per 10.

Genista scoparius andreanus. 6 ft. A very beautiful variety of the Scotch Broom with pea-shaped flowers hav-ing side petals of deep mahogany red; blooms freely. In gallon containers, 2 to 3 ft., \$1.25; 4-in. pots, 75c.

#### GREVILLEA

Grevillea thelemanniana. Australia. 5 ft. A beautiful small shrub with small fine-cut leaves and numerous small dense scarlet racemes. A fine single specimen or a wonderful hedge plant, but will not stand much frost nor too much water. In gallon containers, \$1.00 each, \$9.00 per 10; 4-in. pots, 60c each, \$5.00 per 10.

#### HAKEA

Hakea laurina. Australia. 10 to 15 ft. A fast grow-ing plant with eucalyptus-like foliage, bearing novel and beautiful globe-shaped crimson flowers covered with projecting golden styles, the whole resembling a sea urchin. In gallon containers, 3 to 4 ft., 75c.

Hakea suaveolens. Australia. 10 ft. A large rounded flawer survenens. Australia, for it. A large rounded bush with curious needle-like leaves bearing small white flowers exhaling a sweet fragrance. Easily grown; wants very little water; excellent for dry grounds. In gallon containers, 1 to  $1\frac{1}{2}$  ft., 75c; 4-in. pots, 50c.

#### HIBICUS

Hibiscus sinensis. "Chinese Hibiscus." Asia. 6 to 10 ft. One of the showiest summer blooming shrubs with large glossy leaves and immense bright colored flowers. Likes a sunny position and does not stand frost. We can suppy the following colors: Single Red, Double Red, Single Peachblow, Double Peachblow, Single Pink. In gallon containers, 1½ to 2 ft., \$1.25.

#### HYDRANGEA

Hydrangea hortensis. 8 ft. A popular garden plant or shrub furnished with large foliage and immense heads of light pink flowers, having a tinge of blue when grown in soils containing iron. Balled, 3 to 4 ft., \$1.50; bare root, 2 to 3 ft., 75c each, \$6.50 per 10; in gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c.

#### HYPERICUM. Gold Flower

HYPERICUM. Gold Flower Hypericum moserianum. "Goldflower." 3 ft. A low growing, drooping, spreading shrub with handsome large foliage and exquisite large flat golden yellow flowers showing numerous long stamens in the center. Does not like too hot a location and will do well in partial shade. Fine for low massing. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

### LAURUS. Laurels

"English Laurel." Laurus cerasus. 5 to 8 ft. Laurus cerasus. English Laurel. 5 to 8 ft. A heavy, dense, slow growing plant which makes the finest specimen shrub possible with its large, thick, glossy green leaves and rounded shape. Occasional trimming improves it. Balled,  $1\frac{1}{2}$  to 2 ft., \$2.50, in gallon containers, I to  $1\frac{1}{2}$  ft., \$1.25 each, \$11.00 per 10; 4-in. pots, 75c each, \$6.50 per 10.

Laurus lusitanica. "Portugal Laurel." 8 ft. Dark green, glossy-leaved shrub, flowers of which grow in large panicles and are quite fragrant, particularly at night. In gallon containers,  $1\frac{1}{2}$  to 2 ft., \$1.25 each, \$11.00 per 10; 4-in. pots, 75c each, \$6.50 per 10.

Laurus nobilis. "Grecian Bay or Laurel." 8 ft. Greece. The well known Bay Tree so often trained as globes and pyramids for indoor tub plants. Stiff dark green leaves. Untrimmed plants, in gallon containers, 2 to 3 leaves. Untrimmed plants, ft., \$1.50; 4-in. pots, 75c.

#### LANTANAS

Lantanas. These popular everblooming shrubs grow very rapidly and are a mass of bloom almost all during the year. The dwarf varieties grow from 1 to 3 ft. high and the tall varieties from 3 to 5 ft. or more. Prices on all varieties, in 3-in pots, 20c each, \$2.00 per doz. \$15.00 per 100.

Clear Yellow—Dwarf. Orange Red—Dwarf. Pure White—Dwarf.

Orange Red—Tall. Light Pink—Tall. Lavender—Trailing.

HYPERICUM MOSERIANUM Golden Yellow Flowers on a Low Spreading Bush

#### LEONOTIS

Leonotis Leonuris. "Lion's Tail." South Africa. 6 ft. Leonotis Leonuris. "Lion's Iail." South Africa. 6 ft. A very showy soft wood shrub with hairy stems and bril-liant orange-red, tassel-like flowers at the joints of the stems. Very fast growing and a novel distinctive shrub. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### LEPTOSPERMUM. Australian Tea Tree

Leptospermum chapmani. New Zealand. 10 ft. A recent introduction and one of the finest quick growing shrubs. Has fine, soft, brownish green foliage and blooms very profusely, the small flowers being white tinged with pink. Quite hardy. In gallon containers. 2 to 3 ft., 75c each, 6.50 per 10; 4-inch pots, 50c each, 4.00 per 10.

Leptospermum ericoides. New Zealand. 20 ft. Fast growing, thriving almost anywhere. Somewhat more comproving, information and has smaller, narrower leaves. Flowers small and white. In gallon containers, I to 2 ft., 75c, \$6.50 per 10; 4-inch pots, 50c each, \$4.00 per 10.

Leptospermum laevigatum. "Australian Tea Tree." 15 ft. Large, spreading shrub with graceful arching branches; foliage grayish-green; covered in the spring with a profusion of small white flowers; grows rapidly and produces a quick effect. In 5 gallon containers, 3 to 4 ft., \$2.00 each, \$17.50 per 10; gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### LIGUSTRUM. Evergreen Privets

The most widely used hedge plants in the southwest are the Ligustrum or Privets, and included among them are tall and low growing varieties, hardy and rather tender sorts, large and small leaved forms, all of which can be trimmed to the size hedge desired.

Ligustrum ciliatum. 3 to 5 ft. This variety grows smaller than most Privets and has the finest foliage and Smaller than most prives and has the milest foldage and largest flower spikes of the entire group. Foliage dense and heavy, clear dark green all the year. Excellent for hedge, massing, or single plants. Does well in shade. In gallon containers,  $1\frac{3}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-inch pots, 50c each, \$4.00 per 10.

Ligustrum ciliatum variegatum. 3 to 5 ft. Similar to the preceding variety but with leaves blotched light green in the center. A very attractive form. In 5 gallon containers, 3 to 4 ft., \$2.00; gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

"Japanese Privet." 6 to 12 ft. Ligustrum japonicum. Ligustrum japonicum. "Japanese Privet." 6 to 12 ft. A large shrub or small tree with leathery dark green glossy leaves and white flowers; the best tall hedge plant, making a fast heavy substantial growth. Very hardy and drouth resistant. In quart containers,  $1\frac{1}{2}$  to 2 ft., 40c each, \$3.50 per 10, \$25.00 per 100; flats of 100, \$3.00

Ligustrum nepalense. "Evergreen Privet." 3 to 8 ft. Leaves small and dark green; bears spikes of fragrant white flowers in spring. The best small-leaved hedge Privet, easily kept pruned to a moderate height. Stands heat and cold and is fine for Arizona. Makes a good specimen shrub when pruned. This is correctly L. sinensis but has become known as L. nepalense in California. In quart containers, 2 to 3 ft., 40c each, \$3.50 per 10, \$25.00 per 100; flats of 100, \$3.00.

Ligustrum Lodense. "Dwarf Privet." 18 inches. Real Ligustrum Lodense. Dwarf Privet. 16 inches. Real low growing hedge plants are scarce and this Privet fills this need, forming a rounded, low, compact hedge of dark green foliage, never exceeding 18 inches in height. Partially loses its leaves in winter. Hardy anywhere. Flats of 100 plants, \$6.00.

Ligustrum ovalifolium. "California Privet." 3 to 8 ft. Ligustrum ovalifonium. California Privet. 3 to 8 ft. Esteemed for hedge plants. A strong growing shrub, with bright green, medium sized leaves; forms a compact hedge if pruned occasionally; easy to grow, extremely hardy and partially deciduous. In quart containers,  $1\frac{1}{2}$ to 2 ft., 40c each, \$3.50 per 10, \$25.00 per 100; flats of 100, \$3.00.

Ligustrum ovalifolium variegatum. "Golden Privet." Japan. 6 to 15 ft. The well known bright golden Privet so familiar in Southern California. Usually used to add color to shrub plantings or for a bright colored hedge. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; quart containers, 12 to 15-in., 40c each, \$3.50 per 10; flats of 100, \$5.00.

#### LIPPIA. Lemon Verbena

Lippia citriodora. "Lemon Verbena." Uruguay. 5 ft. A fast growing shrub with delightfully fragrant foliage; bears minute flowers in delicate pyramidal spikes. In gallon containers, 2 to 3 ft., 75c; 4-in pots, 50c.

#### ENGLISH LAUREL A Fine, Long-lived Bushy Evergreen

#### LONICERA

**Lonicera nitida.** China. 3 to 6 ft. A compact shrub with many very small leaves of graceful drooping habit. Likes the sun, very hardy and should be pruned often. In gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### MACKAYA

Mackaya bella, South Africa. 8 ft. A beautiful shrub matrice being, South Arrica. In the Beauthur shrub of luxuriant appearance with glossy green foliage and showy lavender blue flowers in clusters. Will not stand much frost and likes a shady position. In gallon containers, I to  $1\frac{1}{2}$  ft., \$1.00; 4-in. pots, 75c.

#### MELALEUCA. Bottle Brushes

Melaleuca alba. (M. Armillaris). Australia. 15 ft. metateuca alba. (M. Armillaris). Australia. 15 ft. A fine shrub or small tree with slender leaves and white flowers in pendulous spikes. Thrives best in wet soils. but also grows well in dry locations. In gallon con-tainers, 3 to 4 ft. 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

mataleuca decussata. Australia. 15 ft. A tall shrub
 with grayish leaves; adorned with lilac-colored flowers
 on short spikes. Easily grown. In gallon containers, 3 to
 4 ft., 75c; 4-in. pots, 50c.
 Melaleuca hypericifolia. Australia

Melaleuca hypericifolia. Australia. 10 ft. A large loose open plant with medium size leaves, growing very rapidly. Has large orange-scarlet cylindrical flowers like bottle brushes along the stems. Likes the sun but not much frost. In gallon containers, 4 to 5 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### MUEHLENBECKIA

Muehlenbeckia platycada. "Ribbon bush." Solomon Islands. 3 to 6 ft. An odd, interesting spreading plant with broad ribbon-like branches instead of leaves, which are few. Has large white flowers and red fruits. In gallon containers.  $1\frac{1}{2}$  to 2 ft., 75c; 4-in. pots, 50c.

#### MYRTUS. Myrtle

Myrtus communis. "Roman Myrtle." 8 ft. Europe. Myrtus communis. "Roman Myrtle." 8 ft. Europe. Valuable for either single specimens or small hedge. The foliage is a shining green and highly aromatic. Bears numerous small white flowers, followed by black berries. Easily kept pruned down to 3 ft. Succeeds well in hot dry situations. Balled, very bushy, 12 to 18-in., \$1.00 each, \$9.00 per 10; in gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$6.00.

Myrtus communis compacta. "Dwarf Myrtle." 2 ft. A new species that is one of the finest low evergreen hedge plants grown in California. Extremely dense and compact, with small dark shining leaves; shapes itself but may be pruned if desired. Attains a height of 18 to 24 inches quickly and stays there. Hardy. Plant 18 in. apart. In 4-in. pots, 50c each, \$4.00 per 10. \$35.00 per 100; flats of 100, \$10.00.

Myrtus communis microphylla. "Small-Leaved Roman Myrtle." 6 ft. A small leaved form which makes a smaller hedge than the communis and grows more slowly. Balled, very bushy, 12 to 18.in., \$1.00 each, \$9.00 per 10; in gallon containers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$6.00.

Myrtus communis variegata. "Variegated Roman Myrtle." 6 ft. A variety of the above with foliage varie-gated green and white. Excellent for a small hedge  $1\frac{1}{2}$ or 2 feet in height, and a very attractive color. Balled, 12 to 18 inches, \$1.00 each, \$9.00 per 10; in gallon con-tainers, 1 to 2 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$6.00.

#### NANDINA

Nandina domestica. "Japanese Nandina." 5 ft. A beautiful, upright growing, dwarfish shrub. Leaves com-pound, with numerous small leaflets, rich red when young, pound, with numerous small leaflets, rich red when young, dark green at maturity, and assuming beautiful coppery tones in winter. It thrives in any well drained, loamy soil, and is quite hardy. In the autumn it is covered with showy clusters of small red berries. Heavy plants in 18-in. boxes, 4 to 5 ft., \$10.00; balled, 2 to 3 ft., \$1.50; in gallon containers, 2 to 3 ft., \$1.25 each, \$11.00 per 10;  $1\frac{1}{2}$  to 2 ft., \$1.00 each, \$9.00 per 10; 4-in. pots, 75c each, \$6.50 per 10.

#### NERIUM. Oleander

The Oleander with its brilliant, showy blossoms, is a beautiful shrub throughout all of California, doing par-ticularly well in the Imperial Valley and Arizona, and it gives a quick effect wherever planted. We have an ex-cellent asortment of colors.

Prices, all varieties, balled, very bushy, 3 to 4 ft., \$1.75; 2 to 3 ft., \$1.25; in gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10.

Mrs. F. Roeding, Double, Salmon Pink. Prof. Durand, Double, Cream. Rosea, Double, Rose Pink. White, Double. Cherry Red, Single. Light Pink, Single. POINSETTIA

**Poinsettia pulcherrima.** The well known and highly onnamental "Christmas Flower." Unsurpassed for the splendor of its immense brilliant scarlet flower bracts, and its bright green leaves. Potted, 6-in. pots, \$1.00; 5-in. pots, 75c; 4-in. pots, 50c.

#### PHOTINIA

Photinia arbutifolia. 10 ft. "California Holy or Christ-The well known native California shrub of mas Berry.' which the red berries are sold in great quantities at Christmas time. Under cultivation it makes a beautiful large spreading, well shaped bush, always evergreen, pro-Large spreading, went snaped bush, always evergreen, producing its great handsome clusters of brilliant berries when they are enjoyed most. Should be given plenty of room in a sunny location, as it grows large in a short time. Balled, 4 to 5 ft., \$2.75; 3 to 4 ft., \$2.00; 2 to 3 ft., \$1.50;  $1\frac{1}{2}$  to 2 ft., \$1.25.

Photinia serrulata. Evergreen Photinia. China. Photinia serrulata. Evergreen Photinia. China. 15 ft. A handsome evergreen shrub or small tree. the foliage of which becomes very conspicuous in the autumn, when it assumes a reddish hue; flowers white, in large cory-mbs, produced in the early spring. Among spring flower-ing trees none is more striking. Hardy and easily grown. Very bushy, in 5 gallon containers, 3 to 4 ft., \$1.75 each, \$15.00 per 10. 15 ft.

#### PITTOSPORUM

Pittosporum crassifolium. New Zealand. 15 ft. tall fast growing variety, rather open, with beautiful glaucous foliage, dark green above, pale green underneath. Does particularly well on the immediate sea-coast. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

New Zealand. 10\_to 15 ft. Pittosporum Eugenioides. A large shrub with glossy light green foliage. Extensively used for specimen plants, large hedge and as a founda-tion shrub. Quite hardy, and a rapid grower. In gallon containers, I to 2 ft., 75c each, \$6.50 per 10.

Pittosporum grandiflora. 8 ft. A large-leaved species with heavy foliage something like an English Laurel. Fast growing and a good shrub for general purposes. In gallon containers, 3 to 4 ft., \$1.00 each, \$9.00 per 10.

Pittosporum heterophyllum. China. 3 ft. A low grow-ing, half-reclining shrub, quite drouth resistant, and ex-cellent for dry banks or rockeries. Leaves medium size, bright green, sharp pointed. In gallon containers, 1 to 2 ft., 75c; 4-in. pots, 50c each, \$4.00 per 10.

Pittosporum tenuifolium. (P. Nigricans). New Zea-Pittosporum tenurionum. (P. Nigricans). New Zear land, 20 ft. A tall fast growing large shrub with almost black stems and clean bright foliage, excellent for mass-ing, screening or tall hedges. Occasional clipping will make it very dense. In gallon containers; 2 to 3 ft., 75c each, \$6.50 per 10; 4-in pots, 50c each, \$4.00 per 10.

Pittosporum phillyraeoides. "Desert Willow." Austra-lia. 20 ft. A remarkable small tree from the Australian deserts, much resembling a Weeping Willow but entirely evergreen and thriving in dry soils where a Willow will not live. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Pittosporum rhombifolium. Australia. 20 ft. A first-Pittosporum rhombifolium. Australia. 20 ft. A first-class ornamental tree, well suited for avenues; of sym-metrical, pryamidal shape. The large clusters of white, sweetly fragrant flowers in summer are followed by a profusion of orange-yellow berries, persisting throughout the winter. In gallon containers, 3 to 4 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Pittosporum tobira. "Japanese Pittosporum." Japan-5 to 8 ft. As a medium sized evergreen shrub for general use this plant is second to none for planting in California. It is a wide spreading, dense, round headed shrub, with deep, glossy, green foliage, and is excellent for planting in a mixed border, for massing against the house or wall, In a mixed border, for massing against the house of wal, and also will make a fine large hedge. In the winter it is covered with small, fragrant white flowers, resembling orange blossoms. This species does quite well in Arizona also. Balled, very bushy, 2 to 3 ft., \$2.00; in gallon con-tainers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Pittosporum tobira variegatum. 10 ft. A variegated form of the above. The foliage is variegated with white, which gives it a conspicuous and pleasing appearance. Balled, 2 to 3 ft., \$2.50; in gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; 4-in. pots, 75c each, \$6.50per 10.

Pittosporum undulatum. Australia. 20 ft. Small tree or shrub, well furnished with deep green, glossy leaves. its yellowish white flowers are very fragrant, especially at night. Excellent for avenue planting or for a tall hedge. In 5 gallon containers, 3 to 4 ft., \$1.75; gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

**Pittosporum viridiflorum.** "Cape Pittosporum." South Africa. 20 ft. The foliage of this variety is very similar to Pittosporum tobira and it has the same characteristics but it grows taller and more erect. The flowers are ex-ceedingly fragrant. One of the finest large Pittosporums. In gallon containers, I to 2 ft., 75c each, \$6.50 per 10; 4-inch pots, 50c each, \$4.00 per 10.

#### PYRACANTHA. Burning Bush

This group, formerly called Crataegus, belongs to the evergreen Hawthorne. They are exceedingly valuable for the great wealth of bright colored berries which they furfor many months. They naturally grow quite tall, but if pruned back severly once a year will make a low dense bush. Very hardy.

**Pyracantha angustifolia.** China. 6 to 10 ft. Growth spreading; somewhat spiny; leaves long and narrow; berries very abundant, orange yellow, developing their color late and holding it throughout the winter. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each \$4.00 per 10; 50c each, \$4.00 per 10.

**Pyracantha crenulata.** Japan. 6 to 10 ft. This vari-ety has the reddest berries of all Pyracanthas—bright crimson—scattered along the stems instead of in bunches. The leaves are long and narrow, glossy and dark green. Does not grow quite so fast and can be pruned lower than the other kinds. In gallon containers, 2 to 3 ft., 75 each, \$6.50 pcr 10; 4-in. pots, 50c each, \$4.00 per 10.

Pyracantha Lalandii. "Burning Bush." 8 ft. An evergreen shrub of spreading habit; foliage a rich dark glossy green; clusters of white flowers in the spring are followed by a wealth of orange-colored berries, which remain on the plant all winter. In 5 gallon containers, 3 to 4 ft., \$1.75; gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

Pyracantha yunnanensis. China. 8 ft. A variety of Pyracantha crenulata, but a more vigorous grower, with larger leaves. In the fall and winter there is nothing more striking than a specimen of this plant with its dark glossy green foliage acting as a back ground for great masses of red colored berries. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10 \$4.00 per 10.

#### POLYGALA

Polygala apopetala. Lower California. 15 ft. A large shrub with medium sized dark green foliage and hand-some large deep rose pink flowers. Quite hardy and thrives under most conditions. In gallon containers, I to 2 ft., \$1.00.

Polygala dalmaisiana. South Africa. 5 ft. A dense somewhat globular shrub with grayish-green foliage, very much admired in winter and spring because of the masses of pink, pea-shaped flowers with which it is covered. Balled,  $1\frac{1}{2}$  to  $\angle$  ft., \$1.25; 4-in. pots, 50c, \$4.00 per 10.

#### PUNICA. Evergreen Pomegranate

Punica granatum nana. "Dwarf Evergreen Pomegran-ate." India. 3 to 5 ft. A miniature evergreen form of the Pomegranate with small fresh green foliage, and cov-ered in spring and summer with bright scarlet flowers and in fall and winter with crimson fruits. Excellent for small specimens and makes a wonderful hedge. Rather tender. In gallon containers, I to 2 ft., 75c each, \$6.50 per 10; 4-inch pots, 50c each, \$4.00 per 10.

#### RAPHIOLEPIS

**Raphiolepis ovata.** Japan. 8 ft. Ornamental shrub with stout, upright branches and dark green, lustrous foliage; leaves thick, and bush beautifully compact; cov-ered in summer with white flowers, followed by clusters of purple berries in the autumn. Growth slow. In gal-lon containers, 1 to 2 ft., \$1.00.

#### RHAMNUS

**Rhamnus purshiana.** "Cascara Sagrada." 10 to 20 ft. One of the finest native shrubs of the north Pacific Coast, with large oval toothed leaves, dark green and wavy. Ber-ries are red changing to black. In gallon containers,  $1\frac{1}{2}$ to 2 ft., 75c each, \$6.50 per 10; 4-inch pots, 50c.

#### ROMNEYA. Matilija Poppy

**Romneya Coulteri.** "Matilija Poppy." One of the most magnificent and showy of all California wild flowers, with its enormous glistening white flowers, often 6 and 7 inches across. Attains a height of 6 ft. each year from the roots. In gallon containers, 1 to 2 ft., \$1.25.

#### SANTOLINA

Santolina. Low gray-leaved border plant, 12 to 18 inches high, growing very rapidly. Should be sheared to keep it close and compact. In flats of 100, \$3.00.

#### SALVIA

Salvia leucantha. "Purple Salvia." Mexico. 2 ft. bushy, many branched plant, sending up in winter and spring many spikes of small globular, velvety purple and white flowers of novel and attractive appearance. In gallon containers, 2 to 3 ft., 75c each, \$6.50 per 10.

#### TETRATHECA

Tetratheca ericifolia. Australia. 6 to 12 inches. A very low, compact bushy plant, never exceeding 1 foot in height, bearing almost continuously many minute lavender flowers. Excellent for low border. In gallon con-tainers, I to  $1\frac{1}{2}$  ft., 75c each, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10.

#### TEUCRIUM

Teucrium fruiticans. Southern Europe. 3 ft. An al-most everblooming small shrub, much branched, with grayish foliage and bright blue flowers scattered over it. Grows well in very dry places and likes the sun. In gallon containers, 1 to 2 ft., 75c.

#### VERONICA

**VERONICA** Veronica imperialis. New Zealand. 3 ft. Low bushy plant used for borders and low foreground shrubbery. Has smooth dark green foliage and during most of the year bears short spikes of reddish purple flowers near the tips of the branches. A very valuable ornamental for California plantings, particularly near the coast. Ball-ed, very bushy, 1 to  $1\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; in gallon containers, 12 to 15 inches, 75c each, \$6.50 per 10; 4-inch pots, 50c.

"Purple Queen." Veronica imperialis. Bush same as

Veronica imperialis. "Purple Queen." Bush same as above but with beautiful large spikes of brilliant bluish-violet. Balled, bushy, I to  $1\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; in gallon containers, 12 to 15 in., 75c, \$6.50 per 10. Veronica labelioides. New Zealand. 2 ft. A low grow-ing, compact, small leaved variety with numerous small spikes of bright blue flowers. Balled, 12 to 15 inches, \$1.00; 4-inch pots, 50c each, \$4.00 per 10.

#### VIBURNUM

VIBURNUM Viburnum odoratissimum. "Sweet Viburnum." South China. 10 ft. A fine stout upright shrub with big shin-ing dark green leaves, 4 to 6 inches long. Has 4-inch panicles of white flowers, intensely fragrant, followed by black berries. Enjoys some shade. In gallon containers, I to 2 ft., \$1.00; 4-inch pots, 75c.

Viburnum suspensum. 6 ft. A bushy spreading shrub with slender, angled branches and large leaves, shiny and dark green above and pale beneath. Flowers in clusters white tinged with pink. A luxuriant appearing evergreen from the South Sea Islands. In gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00 each, \$9.00 per 10; 4-in. pots, 60c each, 1½ ft., \$1.00 \$5.00 per 10.

\$5.00 per 10. Viburnum tinus, "Laurustinus." 10 ft. S. Europe. Well known winter flowering shrub, bearing in profusion, clusters of small, flesh colored blooms. Good subjects for single garden specimens and for ornamental hedge. Balled,  $1\frac{1}{2}$  to 2 ft., \$1.00 each, \$9.00 per 10; in gallon containers, 10 to 12 in., 75 ceach, \$6.50 per 10; 4-in. pots, 50c each, \$4.00 per 10; flats of 100, \$5.00.

#### WIGANDIA

Wigandia carcasana macrophylla. Central America. 15 ft. A big fast growing shrub or small tree of tropical appearance, with enormous, rough, hairy leaves, often 18 inches across. Has large terminal clusters of bell-shaped violet flowers. In gallon containers, 2 to 3 ft., 75c.

NANDINA DOMESTICA **Japanese** Nandina

GARDENIA FLORIDA **Cape** Jasmine 56

PHOTINIA SERRULATA **Evergreen** Photinia

# **Palms**. Bamboos and Grasses

Palms are sentinels of plant life in the arid region of the Southwest; no plants lend such a sense of majesty and dignity to the landscape when once the larger varieties attain mature age. And no group is capable of producing so strong a suggestion of tropical vegetation as the Palms with their graceful arching evergreen fronds. Among the sorts listed below are low growing, spreading varieties, tall slender palms, kinds that are only hardy near the coast, and others which find congenial conditions anywhere from California to Texas.

#### CHAMAEROPS. Wind Mill Palm

Chamaerops excelsa. "Windmill Palm." 20 ft. Has a tall, dark, slender, densely hairy trunk, with a com-pact crown of stiff, deeply cut leaves at the top. Thrives even under very adverse conditions. Very hardy and requires very little space. Balled, 3 to 4 ft., \$5.00; 2 to 3 ft., \$4.00 each, \$35.00 per 10; in gallon containers, 1 to 2 ft., \$1.00 each, \$9.00 per 10.

#### COCOS

Cocos australis. "Pindo Palm." Paraguay. 10 to 15 **Cocos australis.** "Pindo Palm." Paraguay. 10 to 15 ft. A short-trunked palm with a stout base and arching, graceful leaves of a powdery blue color. One of the hardiest and most drouth resistant of all palms. Balled, 3 to 4 ft., \$5.00; 2 to 3 ft., \$3.50.

**Cocos plumosa.** "Queen Palm." Brazil. 25 ft. The well known palm so desirable for street planting in Southern California, with a tall, slender, smooth trunk topped with a plume-like crown of feathery, graceful leaves. The roots accommodate themselves to surprisingly small spaces. Susceptible to heavy frosts. Balled, 5 to 6 ft., \$10.00; 4 to 5 ft., \$7.50; 3 to 4 ft., \$5.00.

#### CYCAS

**Cycas revoluta.** Java. "Sago Palm." An excellent plant for either scenic planting or porch decoration. The round stem or bulb is crowned with dark green feathery leaves, shaped like ostrich plumes. Quite hardy and slow growing. Large, fine specimens in boxes, \$25.00 to \$100.00; smaller sizes, 6 to 12 leaves, \$3.00 to \$10.00.

#### ERYTHEA

**ERTIFIEA Erythea armata.** "Blue Palm." Lower California. 15 to 20 ft. A beautiful foliaged palm of comparatively slow growth, which makes a very attractive specime because of the lovely blue color of its fan like leaves. Quite hardy. Potted, 5 gallon containers, 3 to 4 ft., \$5.00; 2 to 3 ft., \$3.50.

Erythea brandegei. Lower California. 125 ft. A very lovely and extremely rare palm with a tall, clean, slender trunk, topped high in the air by a small crown of shin-ing green fan-like leaves, silvery beneath. Balled, 1 to  $1\frac{1}{2}$  ft., \$2.00; 5 gallon containers, 3 to 4 ft., \$5.00.

Erythea edulis. "Guadalupe Palm." 30 ft., \$5.00. Bisland of Guadalupe off the coast of Lower California. The leaves are large, rich green, and even the oldest leaves hold their color for many years. One of the finest palms grown. Potted, gallon containers, 1 to  $1\frac{1}{2}$  ft., \$1.00.

#### **KENTIA**

Kentia Forsteriana. The most beautiful palm for in-door decoration, being widely used in house and con-servatory. Dark green foliage on graceful arching branches. In green tubs, 3 to 4 ft., \$10.00.

#### PHOENIX. Date Palm

Phoenix canariensis. "Ornamental Date Palm." Canary Isles. 60 ft. This is easily the best and most popular palm for general planting in California and the South-west. It thrives under all sorts of conditions, is quite west. It thrives under all sorts of conditions, is quite hardy, and grows very rapidly. Its dense, immense crown of beautifully curving leaves, each 15 feet long and of a very pleasing dark green color, and its stately and rapid scale preasing dark green color, and its stately and rapid growth, combine to make this species an ideal palm for street and avenue, park and lawn. 5 gallon containers, 4 to 5 ft., \$4.00 each, \$55.00 per 10; 3 to 4 ft., \$3.00 each, \$27.50 per 10; gallon containers, 2 to 3 ft., \$1.00 each, \$9.00 per 10.

#### WASHINGTONIA. Fan Palm

Washingtonia filifera, "California Fan Palm." 80 ft. Washingtonia filifera. "California Fan Palm." 80 ft. The most characteristic plant of California, being native to the desert regions. Very tall, stout trunk surmounted by large fan-shaped leaves, dark green with numerous whitish filaments. A very picturesque tree. Potted, 5 gallon containers, 4 to 5 ft., \$4.00 each, \$35.00 per 10; 3 to 4 ft., \$3.00 each, \$27.50 per 10; gallon containers, \$1.00 each, \$9.00 per 10.

#### ARUNDO

Arundo donax variegated. "Giant Reed." 15 ft. A woody plant resembling the Bamboo with foliage striped green and white. Hardy anywhere, and thrives in sand and dry places, therefore excellent for anchoring banks or making a low windbreak. Spreads from the roots. Dormant clumps, \$1.00 each, \$5.00 per 10, \$25.00 per 100 "Giant Reed." 15 ft. 100

#### DRACAENA

Dracaena australis. New Zealand. 15 to 30 ft. Very similar to the variety described below but the ribbon-like leaves are broader. Balled, 4 to 5 ft., \$4.00; 3 to 4 ft., \$3.00; in gallon containers, 75c each, \$6.50 per 10.

**Dracaena indivisa.** New Zealand. 30 ft. A tropical appearing plant with sword-shaped arching leaves borne in a cluster at the top of the rather slender trunk. Once a year bears large panicles of white flowers. Much in demand of late for adding a decorative effect to houses with a Spanish type of architecture. Boxed, 5 to 6 ft., \$7.50: in gallon containers,  $1\frac{1}{2}$  to 2 ft., 75c each, \$6.50 per 10. per 10.

DRACAENA and PHORMIUM

Furnish Atmosphere for Certain Types of Architecture

#### CYPERUS

Cyperus alternifolius. "Umbrella Plant." A low grow-Cyperus alternitolius. "Umbrella Plant." A low grow-ing semi-aquatic plant with rush-like green stems, I to 3 ft. high, surmounted by grassy whorls. Excellent for damp places, banks of pools or shady spots. Spreads from the roots. In 4 inch pots, 50c each, \$4.00 per 10.

#### BAMBOOS

Arundinaria nobilis. A medium sized Bamboo, 10 to 12 ft. high, with upright branches in very thick clumps. Leaves about 3 inches long. Strong clumps, 5 gallon con-tainers, \$2.50; gallon containers, \$1.25 each, \$11.00 per 10

6 ft. Bambusa philapense. Asia. Α low growing Bambusa philapense. Asia. 6 ft. A low growing Dwarf Bamboo with graceful arching branches and finely divided compound leaves. Makes a broad spreading clump rather than a tall growing one, producing a unique effect. Strong clumps established in 5 gallon containers, \$2.50; gallon containers, \$1.25 each, \$11.00 per 10.

Bambusa striata. "Striped Bamboo." 6 ft. A rather dwarf arching clump, remarkable for the delicate beauty of its canes which are striped green and golden yellow. Strong clumps, 5 gallon containers, \$2.50; gallon con-tainers, \$1.25.

Dendrocalamus latiflorus. "Japan Giant Bamboo." The most desirable of the Giant Bamboos, forming clumps of large stems often measuring 4 to 5 inches in diameter and fifty feet high, and clothed with long, broad leaves. Strong clumps, established in 5 gallon containers, \$3.00; gallon containers, \$1.50.

**Dendrocalamus strictus.** "Male Bamboos." India. 20 to 50 ft. A fast growing Bamboo reaching considerable height, making a solid, compact clump. The canes become 1 to 3 inches in diameter and the leaves which are numerous, are long and slender. This is one of the most useful varieties for general purposes. Potted, strong clumps in 5 gallon containers, \$2.50 each.

"Black Bamboo." 10 to 12 ft. Bambusa nigra. unique variety making a thick handsome clump, and dis-tinctive because the canes are jet black after the first year. Strong clumps in 5 gallon containers, \$3.00; gallon containers, \$1.25.

#### MUSA. Banana

Musa ensete. "Abyssinian Banana." 15 to 20 ft. A popular foliage banana with great broad leaves, borne on a heavy stout trunk. Does not sprout from the base. Has no fruit. 5 gallon containers, 3 to 4 ft., \$4.00.

Musa Rosacea. Pink Flowering Banana. 15 ft. A rare decorative Banana with great, bright green leaves and stalks, and beautiful, deep rose pink, blooms. A won-derfully novel and decorative plant, lending a luxuriant, tropical effect where planted. Should only be planted where frosts are not severe. Established plants in 5 gallon containers, \$5.00.

#### PAMPAS GRASS

Pampas Grass. White. Argentina. 10 ft. Forms a large clump of grass-like leaves, surmounted by great silvery white plumes which last for a long time and may be used for indoor decoration. In gallon containers, \$1.00

Pampas Grass. "Roi des Roses." Similar to the above except for the color of the plumes, which are a faint lavender pink. In gallon containers, \$1.00.

#### PHORMIUM

Phormium tenax Veitchianum. "Variegated New Zea-land Flax." An excellent plant for lawn clump and other situations, having a distinct and unusual character. Has long, rigid ribbon-like leaves, 4 to 6 ft. in length, marked with creamy-white stripes on a light green ground. The reddish-purple flower stalk becomes 10 or more feet high. In gallon containers, 3 to 4 ft., \$1.50.

Asparagus plumosus. Owing to its handsome lace-like foliage it has become known as Asparagus Fern. The tendency is to grow bushy in a pot; while in the ground, partially shaded, it forms long climbing sprays. In 6 in. pots, \$1.00; 5 in. pots, 75c each, \$6.00 per 10; 4 in. pots, 50c each, \$4.00 per 10.

Asparagus Sprengeri. Desirable for potted plants or suspended baskets, hardy and easily grown. In 10 inch hanging baskets, \$3.00; 6 in. pots, \$1.00; 5 in. pots, 75c each, \$6.50 per 10; 4 in. pots, 50c each, \$4.00 per 10.

Nephrolepsis bostoniensis. "Boston Fern." The stand-ard indoor pot fern, dark green, graceful and healthy. In 8 in. pots, \$2.50; 7 in. pots, \$1.75; 6 in. pots, \$1.25; 5 in. pots, 75c; 4 in. pots, 60c.

Nephrolepsis exaltata. "Sword Fern." The common easily grown fern so fine for planting outside in shaded situations. Perfectly hardy, spreading from the roots. In 3 inch pots, 40c each, \$3.50 per 10, \$25.00 per 100.

Nephrolepsis Hillsii. Similar to the above but more dwarf; bushy and compact, with leaves more ruffled. Potted, 7 in. pots, \$1.75; 6 in. pots, \$1.25; 5 in. pots, 75c; 4 in. pots, 60c.

Nephrolepsis Rooseveltii. "Roosevelt Fern." Like the Boston except the foliage is beautifully waved and finely cut. Potted, 7 in. pots, \$2.00; 6 in. pots, \$1.50; 5 in. pots, \$1.00; 4 in. pots, 75c.

Woodwardia radicans. The best hardy fern for outdoor planting, doing best in partial shade. Bright fronds 2 to 4 feet long. A native of the California mountains. Very large clumps. In 3 gallon containers, \$1.25 each, \$11.00 per 10; gallon containers, 75c each, \$6.50 per 10.

CALIFORNIA FAN PALMS Interset with Italian Cypress

# **Vines and Trailers**

Nothing detracts more from the homelike and restful appearance of a place than blank walls, bare fences, and arbors without a covering of vegetation. Climbing and trailing plants are an essential part of house beautification, and we grow an excellent assortment for covering pergolas, porches, arbors, walls, banks, etc.

#### AMPELOPSIS

**Ampelopsis quinquefolia.** "Virginia Creeper." Large green foliage, changing to brilliant scarlet in the fall and later dropping the leaves. 50c each, \$4.00 per 10.

Ampelopsis sempervirens. Beautiful evergreen slender climbing vine, with daintily cut leaves. Nothing can be more admirably adapted for covering pillars and light festooning. Potted, 50c each, \$4.00 per 10.

Ampelopsis veitchi. "Japan or Boston Ivy." A grace-ful clinging vine useful for covering walls, chimneys and stone work. The leaves change from green in summer to gorgeous tints of scarlet and yellow in the autumn, and for a time in the winter season is leafless. 50c each, \$4.00 per 10. "Japan or Boston Ivy." Ampelopsis veitchi.

### BIGNONIA. Trumpet Flower

**Bignonia cherere.** Red Trumpet Vine. A beautiful evergreen climbing shrub bearing long, tubular flowers; blood red, yellow at the base. Gallon containers, \$1.00 each, \$9.00 per 10; 4 in. pots, 60c each, \$5.00 per 10.

Bignonia siderafolia. A magnificent rampant deciduous trumpet vine, which covers an enormous space in one season when established. Many trumpet-shaped, yellow flowers. Gallon containers, \$1.00; 4 in. pots, 60c.

**Bignonia tweediana.** A yellow trumpet vine with many long slender shoots, clinging to any surface and making a dense mat of foliage. Excellent for Arizona and Im-perial Valley. In gallon containers, \$1.00; 4 in. pots, 60c each, \$5.00 per 10.

Bignonia venusta. The vivid orange colored flowers are borne in great masses all during the winter. Con-spicuous in color, handsome in foliage, and vigorous in growth, but somewhat tender. In 4 inch pots, 75c.

Bignonia violacea. One of the most beautiful of the Trumpet Vines, being covered in spring with large flowers of a delicate violet shade. Beautiful evergreen foliage. In gallon containers, \$1.00 each, \$9.00 per 10; 4 in. pots, 60c each, \$5.00 per 10.

#### BOUGAINVILLEA

Bougainvillea Braziliensis. One of the showiest plants in cultivation. Bears a mass of brilliant reddish-purple flowers, against a background of bright green leaves. A wonderful vine for the coast regions, although it is too tender for the interior. In gallon containers, \$1.00; 4 in. note 75c pots, 75c.

Bougainvillea Crimson Lake. A wonderful new Bougain-Dougainvillea Crimson Lake. A wonderful new Bougain-villea similar in habit of growth to the other varieties but immensely different in color of the flowers, which are large and a brilliant brick red or crimson lake, ex-ceedingly rich and brilliant. Strong potted plants, 4 in. pots, \$2.00.

#### CHAYOTE

**Chayote edulis.** The fastest growing vine we have, often making a growth of 40 or 50 feet in one season from the seed. The numerous large fruits are edible and can be used in many ways. Fruits, ready to sprout, 25c each.

#### FICUS. Fig Vine

Ficus repens. "Creeping Fig." The best evergreen ricus repens. "Creeping Fig." The best evergreen vine for covering stone, brick or wood, making a close mat of foliage which clings to any surface. Small heart-shaped leaves. Very hardy, thriving anywhere. In gallon containers, 75c each, \$6.50 per 10; 4 inch pots, 50c each, \$4.00 per 10.

#### HARDENBERGIA

Hardenbergia comptoniana. A handsome evergreen twining vine with long slender clusters of violet blue pea-like flowers in winter. Enjoys at least partial shade. In gallon containers, \$1.00; 4 inch pots, 75c.

Hardenbergia monophylla. Similar to the above but with larger foliage, making a half-climbing shrub. Has beautiful deep blue flowers and likes partial shade. In gallon containers, \$1.00; 4 inch pots, 75c.

#### HEDERA. Ivy

100

Hedera helix variegata. "Variegated English lvy." Center of leaves light and dark green with creamy yellow margin. Plant in shady place. 4 in. pots, 75c.

#### JASMINUM. Jasmine

Jasminum lucidum. A good white flowered Jasmine. Evergreen, fast growing, hardy, with shining green foliage and fragrant blooms. In 4 inch pots, 60c each, \$5.00 per 10.

Jasminum primulinum. "Primrose Jasmine." A very excellent yellow flowering vine, blooming profusely in the summer and very strong growing. Potted, gallon con-tainers, \$1.00 each; 4 in. pots, 60c each, \$5.00 per 10.

#### LONICERA. Honeysuckle

Lonicera japonica Halliana. "Hall's Japan." Ever-green, vigorous climber; flowers pure white, changing to yellow; delightfully fragrant; the best vine for the Imperial Valley since it enjoys warm weather. In gallon containers, 75c each, \$6.50 per 10; 4 in. pots, 50c each, \$4.00 per 10.

#### MANDEVILLA. Chile Jasmine

Mandevilla suaveolens. "Chile Jasmine." A fast grow-ing tall climber with large, very fragrant white flowers tinged with blush. In gallon containers, \$1.00; 4 in. pots, 60c.

#### MUEHLENBECKIA. Wire Vine

Muchlenbeckia complexa. "Maiden Hair Vine." Rapid growing, twining vine, with dark wiry stems and tiny round leaves. Strong plants in gallon containers, \$1.00 each, \$9.00 per 10; 4 in. pots, 60c each, \$5.00 per 10.

#### PASSIFLORA

Passiflora edulis. "Purple Granadilla." A fast growing rassinora eduns. Purple Granadilla. A tast growing vine excellent for covering arbor and trellis, bearing large edible purple fruits about the size of a hen's egg; cul-tivated commercially in Australia. Must be planted in frostless situations. In gallon containers ,\$1.25.

#### PLUMBAGO. Leadwort

**Plumbago capensis.** A semi-climbing plant covered all summer with lovely clear azure blue flowers. If not trained makes a large satisfying shrub which gets quite large in time and requires plenty of room. Will quickly fill a corner or hide a fence. In gallon containers, 75c each, \$6.50 per 10; 4 inch pots, 50c each, \$4.50 per 10.

#### PUERARIA. Kudzu Vine

**Pueraria hirsuta.** Kudzu Vine. For producing a quick effect this vine has no equal, since it often makes a growth of 40 to 60 ft. in one season. A perennial, with very large leaves and pea-shaped, purple flowers. Field grown roots, 35c each, \$2.50 per 10.

#### HYNCHOSPERMUM. Star Jasmine

**Rhyncospermum jasminoides.** "Star Jasmine." A very delightful, deliciously fragrant, hardy evergreen climber, rather slow growing, which may be trained over a pergola or against a porch, thriving in either sun or shade. The sweet scented, star-like flowers cover the plant in summer. In 4 inch pots, 75c.

#### **RUBUS.** Evergreen Raspberry

Rubus ellipticus. "Golden Evergreen Raspberry." A very fast growing raspberry excellent for covering fences and sheds, making a dense mat of foliage. Bears small but edible yellow berries. Strong plants, gallon con-tainers, 75c; 4 in. pots, 50c each, \$4.00 per 10.

#### SOLANUM

**Solanum jasminoides.** A good hardy trailing vine with loose twining shoots and white flowers. Gallon containers, \$1.00; 4 in. pots, 60c each, \$5.00 per 10.

Solanum Wendlandi. A robust vine with luxuriant, large glossy green leaves and big clusters of lavender blue blooms, each flower 2 inches across. Showy but rather tender. In gallon containers, \$1.25; 4 inch pots, 75c.

#### SOLLYA. Australian Bluebell

Sollya heterophylla. Australian Bluebell Creeper. A trailing shrub with many slender, twining stems, of great value for covering banks, low fences, and arbors, or for twining over the trunks of trees and shrubs. Brilliant blue, small, bell-shaped flowers. Potted gallon containers, \$1.00; 4 in. pots, 50c each, \$4.00 per 10.

#### **TECOMA.** Trumpet Flower

**Tecoma capensis**. "Cape Honeysuckle." May be grown as a half climber or a large shrub. Has thick bright green foliage and clusters of bright red flowers in the fall and winter. Gallon containers, \$1.00 each, \$9.00 per 10; 4 in. pots, 60c each, \$5.00 per 10.

per 10; 4 in. pots, 60c each, \$5.00 per 10. Tecoma grandiflora. "Chinese Trumpet Flower." A handsome half-climbing deciduous plant, the most flor-iferous and gorgeous of all Trumpet Vines. Flowers very large, of a brilliant orange hue, in large terminal clus-ters. Grafted, field grown, \$1.50. Tecoma jasminoides. "Bower Vine." A vigorous shiny-leaved climber with many small cream colored funnel-shaped flowers with rose spotted throats. A delightful and lovely vine. In gallon containers, 75c; 4 inch pots, 50c.

inch pots, 50c.

Tecoma Mackenii. A very strong growing evergreen climber with divided leaflets and many trumpet-shaped bright pink flowers, striped with red. Potted, gallon con-tainers, \$1.00; 4 in. pots, 60c each, \$5.00 per 10. Tecoma radicans. "Trumpet-creeper." Fast growing large vine with orange scarlet flowers, losing its leaves in winter. Very hardy. In gallon containers, 75c.

Tecoma stans, Makes a thick dense bush and in the autumn is a blazing mass of brilliant yellow, trumpet-shaped flowers. Tender. In gallon containers, \$1.00.

#### VINCA

Vinca Major. "Periwinkle." Bright blue, flowering, evergreen trailer for banks, borders, hanging baskets, window boxes, etc. Covers ground rapidly. In 21/4 in. pots, 25c each, \$2.00 per 10; flats of 100, \$5.00.

Vinca Major variegata. Same as the above, has white and green variegated foliage. Potted, 2¼ in. pots, 25c each, \$2.00 per 10, \$10.00 per 100.

#### WISTARIA

Wistaria chinensis, "Chinese Wistaria." The strongest grower and most prolific bloomer of all Wistarias. Flow-ers are blue, pendulous and cover the vine in spring. Field grown, \$1.00.

Wistaria chinensis alba. "White Chinese Wistaria." A fine variety with white flowers; otherwise same habit as preceding. \$1.00.

Wistaria chinensis violaceo-pleno. "Double Chinese Wistaria." A beautiful blue flowered form with double blossoms; very rare in cultivation. \$2.00.

Wistaria Multijuga. "Japanese Wistaria." Probably the most beautiful of all Wistarias, because of the ex-treme length of its flower racemes, which are sometimes over two feet long. The color is a delicate lilac. \$1.50.

#### Grasses and Clovers

For best lawns plant 1/3 pound White Clover seed and 2/3 pound Kentucky Blue Grass seed to 200 square feet. (20x10 feet.)

Bermuda Grass. A very enduring grass suitable for hot dry situations where other grasses will not grow. 60c per lb.

Kentucky Blue Grass. The best lawn. Finest imported Kentucky seed. 70c per lb., \$6.50 per 10 lbs.

Pacific Rye Grass. A good hardy lawn for severe dry climates and for shady places. 35c per lb., \$3.00 per 10

White Clover. May be sown alone or with Blue Grass. Gives quick results. \$1.00 per 1b., \$9.00 per 10 lbs.

#### Garden Herbs

Lavender. Bushy, low; gray foliage. Spikes of laven-der flowers in spring. Balled, 8 to 12 in., \$1.00; potted, 3 in. pots, 25c each, \$2.00 per 10.

**Rosemary.** Balled, very bushy, 1 to  $1\frac{1}{2}$  ft., \$1.00; potted, 4 in. pots, 25c.

Sage. In gallon containers, 75c. Thyme. In 3 in. pots, 25c. Thyme Variegated. In 3 in. pots, 25c.

WISTARIA CHINENSIS

Unsurpassed for Festooning on Porches and Pergolas

# **Bedding and Border Plants**

#### **Flowering Perennial Plants**

Aquillegia. "Columbine." A magnificent strain of Giant Long-spurred Hybrids. Best in cool locations. Supplied separately in shades of blue, pink or scarlet, or mixed colors. Field clumps, 40c each, \$3.50 per dozen; in  $2\frac{1}{4}$  in. pots, \$1.50 per dozen.

Bellis perennis. (English Daisy.) Excellent for low border; very double. Pink, white, and mixed, 75c per dozen.

**Canterbury Bells.** (Single or Cup and Saucer.) These charming old fashioned flowers are easy to grow and are very beautiful in spring. Mixed colors, in  $2\frac{3}{4}$  in. pots, \$1.50 per doz., \$10.00 per 100.

**Campanula pyramidalis.** "Chimney Bellflower." Makes a perfect 6 foot pyramid of porcelain blue flowers in spring. In  $2\frac{1}{4}$  inch pots, \$1.50 per dozen, \$10.00 per 100.

Carnations. No flower garden is complete without a few fragrant, everblooming, easy-to-grow carnations. 3 inch pots, 25c each, \$2.00 per dozen. In

Dr. Choate. Crimson. Rose-Pink Enchantress. Bright Rose Pink. White Enchantress. Pure White.

Centaurea Montana. "Perennial Cornflower." Grows 2 ft. high, with many large deep blue flowers from July to September. Field clumps, 40c each; 3 in. pots, \$2.00 "Perennial Cornflower." per dozen.

**Coreopsis lanceolata.** Bears golden yellow flowers on long stems all through the summer and fall. Invaluable for cutting and grows anywhere. In  $2\frac{1}{4}$  in. pots, \$1.25 per do2., \$7.50 per 100.

Delphinium Belladonna. "Perennial Larkspur." One of Depinitum Belladonna. Perennial Larkspur. One of the most satisfactory perennials of all, bearing clear turquoise blue flowers in long spikes 8 months in the year. For massing, borders and cut flowers they are unexcelled. Field clumps, 40c each, \$3.50 per dozen;  $2\frac{1}{4}$  in. pots, \$1.50 per doz., \$10.00 per 100.

**Delphinium bellamosum.** Habit of growth the same as the preceding but with intensely rich, deep blue flowers. In  $2\frac{1}{4}$  inch pots, \$1.50 per dozen, \$10.00 per 100.

Delphinium hybrids. A very fine strain with large strong flower spikes, in various shades of blue. Large, balled, field clumps, 40c each, \$3.50 per doz.; in 21/4 in. pots, \$1.50 per doz., \$10.00 per 100. Large,

Dianthus barbatus. "Sweet William." Low plants with large clusters of many colored flowers all summer long. In  $2\frac{1}{4}$  in. pots, \$1.50 per doz., \$10.00 per 100.

Dianthus Heddewigi. "Chinese Pink." Large flowers of many colors and markings, and the flowers are often deeply and oddly cut. Single mixed or double mixed, in  $2\frac{1}{3}$  in. pots, \$1.50 per doz.

Dianthus plumarius. "Clove Pink." The old-fashioned garden "Pinks" with sweet clove fragrance, many colors and jagged, fringed petals. In 21% in. pots, \$1.50 per doz doz.

Digitalis. "Foxglove." Majestic tall spikes of small thimble-like flowers, 4 to 6 ft. high, in many colors, in-cluding white, lilac, purple, rose, etc. Mixed colors, in 3 in. pots, \$2.00 per dozen.; in 2¼ in. pots, \$1.50 per doz.

Gaillardia grandiflora. "Blanket Flower." Very showy, easily grown perennial with big single flowers, yellow and orange, striped and margined with red and marcon. In  $2\frac{1}{4}$  in. pots, \$1.50 per doz., \$10.00 per 100.

Felicia amelloides. "Blue Daisy." An old favorite bedding plant, 1 to 2 ft. high, with small rounded leaves and exquisite sky-blue daisy-like flowers. In  $2\frac{1}{4}$  inch An old favorite pots, \$1.50 per dozen.

Gazania. Makes a close mat of foliage low on the ground and covered with myriads of large, showy flowers. Excellent for ground cover or low border. Orange or lemon-yellow flowers. In  $2\frac{1}{4}$  inch pots, \$1.50 per dozen, \$10.00 per 100.

Gerbera Jamesoni Hybrids. "Transvaal Daisy." Lovely, dainty, daisy-like flowers on long slender stems, ranging in color from straw through yellow, orange, salmon and rose to bright scarlet. Must be given good drainage and not planted too deep. In 4 inch pots, 40c each, \$4.00 per dozen.

Geum "Mrs. Bradshaw." Handsome low hardy border plant about 15 inches in height bearing brilliant double scarlet flowers on long stalks all summer. Field clumps, 40c each, \$3.50 per doz.; in 2¼ in. pots, \$1.50 per doz., \$10.00 per 100.

Geum "Lady Stratheden." The same as the above but the blooms are a rich golden yellow. In  $2\frac{1}{4}$  inch pots, 25c each, \$2.00 per dozen.

Hollyhocks. We can supply the following colors all double: Newport Pink, Rose Pink, Salmon Pink, Scarlet, Crimson, Blood Red, Maroon. In 4 in. pots, 40c each, \$3.50 per doz.

Linum flavum. "Yellow Flax." Hardy perennial, grow-ing to a height of 1 or 2 ft., and bearing golden yellow, showy bell-shaped blooms. Potted, 4 in. pots, 35c each, \$2.50 per 10.

Lippia repens. A grassy ground cover making a dense mat of foliage, thriving in any soil, in hot locations and requiring little water. Stand trampling, requires no mowing and spreads rapidly. Per flat (plants 200 square feet), \$2.00.

Lythrum roseum superbum. (Loose-strife.) A strong growing plant, 3 to 4 feet high, producing large spikes of rose colored flowers from July to September. In  $2\frac{1}{4}$ A strong inch pots, \$1.50 per dozen.

Michaelmas Daisy. (Hardy Asters.) Showy late flow-ering plants, 3 to 4 feet high, giving a wealth of bloom in late fall, the flowers being usually pink, blue and violet. In  $2\frac{1}{4}$  inch pots, \$1.50 per dozen.

Papaver Orientalis. Oriental Poppy. Magnificent great blooms 6 inches or more across in very vivid colors. Do best in cool locations. Crimson, or mixed colors. In  $2^{1}$ 4 in. pots, \$1.50 per dozen.

**Pentstemon.** "Sensation." A beautiful strain of Giant Flowered Hybrids, ranging in color from white to dark crimson. Few perennials bloom over as long a period as these satisfactory flowers. Field clumps, 40c each, \$3.50per doz.; in  $2\frac{1}{4}$  in. pots, \$1.50 per doz., \$10.00 per 100.

Pentstemon barbatus Torreyi. Has spikes of brilliant scarlet flowers, 3 to 4 feet high. In 21/4 inch pots, \$1.50 per dozen.

Scalies howers, 5 to 4 reet high. In 224 high pois, \$1.50 per dozen.
Phlox. The improved types of perennial Phlox make a wonderfully impressive display of color all through the summer and autumn. They last for a number of years and require very little care. We supply domant divided roots at 25c each, \$2.50 per dozen.
Beacon. A fine tall bright cherry red.
B. Compte. Rich satiny amaranth red.
Bridesmaid. White with purple eye.
Mrs. Chas. Dorr. Beautiful soft lavender.
Mrs. Jenkins. Pure white. Best of its color.
Rynstrom. Deep carmine rose.
Thor. Deep salmon with red eye.
Wolfgang von Goethe. Rosy pink, lavender eye.
Scabiosa caucasica. "Pincushion." Resembles the annual "Pincushions" but have larger flowers of a light lilac-blue color. In 214 in. pots, \$1.50 per dozen.
Shasta Daisy. "Pasadena." A new strain of this popular flower with much larger flowers and longer, stiffer stems than the ordinary type. As it is everblooming, it is unexcelled for cut flowers. In 214 in. pots, \$1.50 per doz.
Statice latifolia. "Sea Lavender." A valuable plant

Statice latifolia. "Sea Lavender." A valuable plant for border or foreground planting with its tufts of broad shiny leaves and immense candelabra-like heads of pur-plish blue flowers, which can be cut and dried if desired. In 4 in. pots, 40c each, \$3.50 per doz.;  $2\frac{1}{4}$  in. pots, \$1.50ner doz. Statice latifolia. "Sea Lavender." per doz.

Statice Perezii. An even more showy variety than the preceding, the individual flowers being larger and the panicles flatter. In 4 in. pots, 40c each, \$3.50 per doz.;  $2\frac{1}{4}$  in. pots, \$1.50 per doz.

Stokesia cyanea. "Cornflower Aster." Low growing plants with blue, white, purple and rose colored flowers resembling both asters and corn flowers. In  $2\frac{1}{4}$  in. pots, \$1.50 per doz.

\$1.50 per doz. Verbenas. For beds and borders these showy, frag-rant flowers, borne the year around, are extremely pop-ular. In 2¼ inch pots, \$1.50 per dozen, \$10.00 per 100. Beauty of Oxford. Bright rose pink. Crimson King. Deep glorious crimson. Lavender Queen. Soft pure lavender. Purple Prince. Vivid bluish purple.

Mayflower Mixed. Mammoth flowers, pastel shades. Violets—Princes of Wales. Large, single flowers, long stems, deliciously fragrant. In 2¼ in. pots, \$1.00 per dozen, \$7.50 per 100

Violets—President Herrick. A beautiful new violet, with a very rich dark color, wonderfully fragrant, with heavy dark green foliage. In 2¼ in. pots, \$1.25 per dozen, \$10.00 per 100.

#### **Bulbs and Bulbous Plants**

Amaryllis Hybrids. This is the finest strain of Amary-llis in existence. Magnificent large flat blooms, 9 to 10 inches across, borne in clusters on 3 foot stems. The colorings vary from white to darkest crimson. Strong bulbs ready to bloom next spring, 75c each, \$7.50 per dozen.

Calla Lily. We have the Godfrey Calla, a bushy low plant with refined, pure white flowers on slender, strong stems. The very best type. In gallon containers, 75c stems. The very b each, \$6.50 per 10.

Calla Elliottiana. Yellow Calla. Grows the same as the white Calla, but the flowers are a rich, golden yellow, and the foliage is a beautiful deep green, spotted silvery Calla Elliottiana. white. Gallon containers, 85c.

Gladiolus. The easiest bulbs to grow and the most satisfactory. If planted from December to April at intervals, a continuous succession of blooms can be had all summer long.

Alice Tiplady. Orange-saffron. Byron L. Smith. Lavender pink. Hadley. Delicate salmon. Mrs. Dr. Norton. Creamy white shaded pink. Mrs. Francis King. Scarlet. Mrs. Frank Pendleton. Salmon pink with deep red blotch

Prince of Wales. Coral pink.

Schwaben. Yellow. Virginia. Magnificent ruby red.

Prices on Gladiolus, 15c each, \$1.00 per dozen, \$6.00 per 100. Alice Tiplady, Byron L. Smith and Virginia, \$10.00 per 100.

Cannas. Few flowers are as showy and give such rich color effects as the Canna. They thrive in any good soil, in a sunny exposure. Dormant roots, 25c each, \$2.50 per dozen.

City of Portland. (31/2 ft.) Clear pink, bright green foliage.

Hage. Eureka. (4 ft.) Creamy white flowers; green foliage. Flamingo. (4 ft.) Pink, spotted orange. King Humbert. (4 ft.) Flowers scarlet; foliage

bronze Queen Helene. (3 ½ ft.) Large flowers of beautiful shades of yellow, spotted red. Green foliage. Wintzers Colossal. (6 ft.) Vivid scarlet. Green

foliage.

Moraea irioides. A bulbous plant resembling the Iris and requiring the same treatment. The flowers are white in color, shading to golden yellow at the base, with markings of purple. Gallon containers, 75c each, \$6.50 per 10.

We carry an excellent assortment of Dahlias and Chrysanthemums, and a complete list of varieties and prices will be sent upon request. Dahlias ready for shipment February 1st; Chrysanthemums March 1st.

### Instructions for Planting and Culture

#### Care of Shipment on Arrival.

Open all bales and packages as soon as possible after Open all bales and packages as soon as possible after arrival and do not allow them to lay around unopened, as the plants may suffer from the delay. Observe the con-dition of the plants or trees and if the roots are dry, give them a good soaking with water. If plants do not seem to be in good shape or are unsatisfactory in any way, notify us at once, as it is to our interests as well as yours to have your stock reach you in good condition.

#### Citrus Trees.

Citrus Trees. Nearly all citrus trees which we send out, including oranges, lemons, pomelos, etc., are dug and shipped with a ball of earth wrapped in burlap on the roots. In hand-ling these trees, lift the balls carefully and do not drag them over the ground or jar them more than necessary as this is liable to loosen the earth, resulting in injury to the roots. If not ready to plant at once, the trees may be held for a few days with perfect safety if placed out of the direct sunlight and the balls kept moist. In planting all balled trees, do not remove the burlap covering, but place the ball in the hole as it is, so that the surface of the ground is one or two inches higher than the top of the ball. When the soil is one half or one third filled in around it (use good surface soil) cut throw in the remainder of the soil. See illustration 1. This procedure keeps the ball of earth intact and the bur-lap soon rots in the ground. Firm the earth well and leave a shallow basin around the tree which should be filled with water to settle the earth. Place no fertilizer of any kind in the hole. No pruning is necessary at planting in the case of cit-ure tree where it is to cut off a limb hroken by acci-

No pruning is necessary at planting in the case

of any kind in the hole. No pruning is necessary at planting in the case of cit-rus trees, unless it is to cut off a limb broken by acci-dent. In warm dry weather, or if the trees have become dry, all leaves should be removed with a sharp knife, and as a matter of precaution, we sometimes remove all the foliage before shipment. Yucca or paper tree protectors are advisable for all citrus trees, to guard against injury from sun scald or rodents, and the 24 inch size is commonly used. These are listed on page 62 of our Catalog. It is very important when irrigating balled trees the first season after planting, to apply the water to the trees thoroughly and for a long period of time, so that the moisture will penetrate entirely through the ball and not merely run down around the sides of it and be wasted. As a rule citrus trees should be irrigated once very ten days or two weeks until established. Occasionally, for long distance shipments, or in special cases, we ship citrus trees with bare roots. We pack them in sphagnum moss and they should be very care-fully kept moist at all times until placed in the ground, when they should be given a good irrigation. The ton-age is always removed and tops are cut back more than is the case with the balled trees. The best time to plant citrus trees is during the period from February to May although they may safely be plant-ed one or two months earlier or later in locations near the coast with a mild climate.

#### Avocados.

The same instructions for planting balled citrus trees apply to balled Avocados. Dig a generous hole large enough to allow the tree to

be planted two or three inches deeper than in the nursery.

The Avocado likes good drainage and should not be planted over a hard subsoil unless the hole is blasted previous to planting. Never place fertilizer in the hole or close to the tree during the first year. It extremely important to irrigate Avocado trees thoroughly during the first season so that the balls are completely pene-trated by the moisture and it is a good idea to let the water stand in a basin directly around the trunk of the trees as they are not injured at all by this procedure, usually an irrigation twice a month for the first season, and once a month thereafter is sufficient.

As with Citrus trees, it is often advisable to cut off As with Citrus trees, it is often advisable to cut off all leaves at planting, to lessen evaporation and partic-ularly is this necessary in warm weather. No pruning is necessary on an Avocado tree except to form a low bushy, shapely tree. Yucca tree protectors are desirable for young trees, and also it is advisable to shade the tender varieties during the first season by means of burlap tacked to four stout stakes on the top, south, and west sides and west sides.

The early spring months are the best for planting Avocados, but in localities where they do best in Califor-nia, they may be planted at almost any time during the vear.

#### Other Sub-tropical Fruits.

Most fruits of this class should be given the same cultural treatment as Citrus trees, and should be planted from February to June. They may be boxed or balled and in either case should be planted so as to avoid dis-turbing the earth around the roots. As a rule they require more careful handling than most other plants and should be afforded some measure of protection against weather extremes. Olives are shipped bare root, and before shipment we cut them back for planting. They should be planted in the same way as deciduous fruit trees.

#### **Deciduous Fruit Trees.**

Deciduous Fruit Trees. All fruit trees listed under this heading in our Cat-alog are shipped bare root as dug from the nursery row. After unpacking, the roots should be protected at all times, and never exposed to dry air or frost, and if trees are not to be planted at once, cut the bundles open and place roots in shallow trench, keeping them moist. If trees are dry and withered on arrival, bury roots and tops in moist earth for several days. In planting, have the soil worked up and pulverized as much as possible, and dig a large hole, placing tree at same depth as it was in the nursery, with roots in normal position. Fill hole with good surface soil, furning it well as earth is thrown in and settling with water almost full. Never place fertilizer in hole. Before planting cut off all broken roots and shorten until they are in the ground and then prune them back spears, nectarines, apples, quinces, cherries, persimmons, almonds, and chestnuts should be pruned as follows: Whips should be cut off at from 18 to 30 inches, depend-ing on the caliper of the tree, while strong, well branched be qually spaced branches left on, which should each be cut off to 3 o 4 inches from the main trunk. See illus-ter of to 3 o 4 inches from the above prunning is suffi-cient for planting in the family orchard. The pruning

the second winter after planting is devoted in the main developing the main framework of not more than four well spaced branches.

Figs should be pruned back to 24 inches or less and the wound covered with asphaltum paint or grafting wax.

Walnuts and pecans should be headed at 5 or 6 feet. The Pomegranate may be trained as a tree by develop-ing a main trunk and a framework of branches on it, or grown as a large bush and merely thinned out.

A coating of whitewash containing a little carbolic acid is advisable on all young deciduous trees as soon as planted, to prevent sun-scald and attacks from borers. Yucca or paper tree protectors will serve the same pur-pose and prevent injury by rodents.

#### Grapes.

Grape Vines should be carefully handled before plant-ing, like all deciduous fruit trees, and the roots pro-tected from dry air, hot sun, or frost. They may be heeled in and kept safely for several days if the earth over the roots is kept moist. All vines should have the roots cut back before planting, to 6 inches from the cutting, and all broken or bruised roots removed. The top of the vine should be pruned back to the one strong-est cane which is left about 4 inches long, so that it has 2 or 3 good strong buds. All vines should be planted deep, leaving only about 2 inches of the original cutting exposed. exposed.

exposed. The next winter any vines which have made a weak growth should be cut back just as they were at plant-ing, and strong vines should have the stoutest cane cut back to 10, 15, or 18 inches, depending on where the vine is to be headed. Then the third winter, or even the second if the growth has been very strong, the head is formed by leaving from 2 to 4 spurs, symmet-trically arranged, and each cut back to two strong buds. Vines should be staked the first summer after planting if possible, and on arbor or trellis should have canes left longer and tied in place where they are to be trained. left longer and tied in place where they are to be trained.

Grapes are usually planted about 8x8 or 8x10 feet, but the distance will vary according to the location and method of culture of each individual planting.

#### Berries.

Derries. The culture methods used for berries vary greatly, and only general directions can be given. Blackberries do well on almost any soil of reasonable depth and the ground should be plowed or spaded before planting. The distance at which the plants should be set varies with the variety. Crandalls can be set 4 to 6 feet apart in rows 6 to 8 feet apart. Himalaya and Mammoth Thorn-less, being very strong growers, should be spaced at least 8 to 10 feet apart respectively, in the row. The last two should be supported by evenly spaced wires running between single stakes, while the Crandall does best when supported between two parallel wires. Each season, the Crandall should have all wood which has borne the previous year removed and the new growth thinned out to a desirable number of canes. Each grow-ing season the new growth should be pinched back to

thinned out to a desirable number of canes. Each grow-ing season the new growth should be pinched back to force out bearing laterals for the next year. The Mam-moth Thornless and Himalayas bear on the same laterals year after year and should merely be thinned out and kept convenient for picking. Raspberries should be planted 4 to 5 feet apart and supported on parallel wires. Canes which have borne fruit should each year be removed. The new canes should be topped when they reach a height of 3 feet and the laterals from them should also have the tips pinched off. A succession of new bearing wood is thus secured.

The Loganberry and Dewberry may be grown on the ground or preferably on a low trellis, and the bearing wood renewed each year.

Strawberries may be planted in single rows,  $2\frac{1}{2}$  to  $3\frac{1}{2}$  feet apart, or in double rows  $1\frac{1}{2}$  to 2 feet apart, with the plants about 1 foot apart in the rows. Provision should plants about 1 foot apart in the rows. Provision should always be made for running irrigation down the rows. In planting, do not cover the crown of the plant with earth. Remove all runners at all times, unless they are needed to fill rows or to furnish new plants. Con-stant irrigation is needed during the growing and bearing season if good berries are to be secured.

#### Rose Bushes.

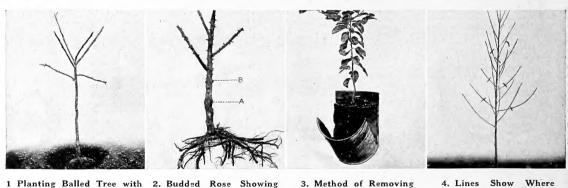

Rose Bushes. That as soon as possible after unpacking, keeping the roots moist and protected in the meantime. If the plants have dried out excessively during shipment, bury them, tops and all in moist earth before planting. Roses do well in almost any soil, and prefer a fully exposed sunny position. Before planting, the earth should be spaded to a depth of 18 inches and if possible a small amount of well-rotted manure mixed thoroughly with the top soil. Manure which is fresh or nearly so, must not be in direct contact with the roots. The majority of roses which we send out are budded on wild stocks and to prevent suckers coming from below the bud, they should be planted deep, and about 4 inches of the bud placed below the ground. In illus-tration 2, A is the point of union of bud and stock. The point B, about 4 inches higher, is the depth at which the plant should be set. This should eliminate suckering, but if a sucker should appear from below of growth and removed. Budded roses, as a rule, make budded and we grow them on their own roots. All roses shipped by us are pruned back ready for planting. Rose bushes should be given a heavy pruning in the winter season from November to February, while Another lighter pruning is advisable in the middle of sum the plant is sould be removed, leaving only several large stocky canes as shown in illustration. Another lighter pruning is advisable in the middle of sum the plant is usually dormant for a short budden is the plant is usually dormant for a short another lighter pruning is advisable in the middle of sum between blooming periods. Marking of light rainfall, and should never be allowed

time between blooming periods. Roses require a large amount of water, particularly in regions of light rainfall, and should never be allowed to dry out during the growing season. The foliage need not be moistened except for an occasional sprinkling in the early morning to wash off the dust. Roses will respond to liberal application of fertilizer, and a mulch of well-rotted manure on top of the ground will serve the purpose of feeding the plants and keeping the ground moist moist.

#### **Ornamental Trees and Plants**,

Handle and plant bare rooted shade trees as described for deciduous fruit trees. Balled and burlapped orna-mentals should be planted like balled citrus trees. Usually

mentals should be planted like balled citrus trees. Usually no pruning is necessary on ornamentals at planting ex-cept to improve the shape of the plant or tree. When plants are in cans, the latter may be removed by cutting down each side with a chisel, knife or hatchet, as shown in illustration 3, and pulling the sides apart so that the can may easily be taken off. Pots may easily be removed by turning the plant upside down and tapping the edge of the pot on a hard surface. Boxed plants should be placed in the hole and the box knocked off gently win a hatchet. In each case, the soil in the container should be fairly moist so that it will hold together, and care should be used to keep all earth possible on the roots.
